DESECT™ Diatomaceous Earth Insecticide aids in the control of fleas and ticks. It acts on insects physically by abrading the exterior skeleton and dehydrating the insect.
Directions for Use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Precautionary Statement
Hazard to Humans and Domestic Animals:

Caution: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling. Use adequate ventilation and avoid breathing dust. Wear a suitable dust mask when using this product during prolonged exposure. Respirators fitted with filters certified to standard N95 as meeting N95 efficiency are suitable.

CA Prop 65 Statement: Warning: This product contains crystalline silica, a chemical known to the State of California to cause cancer.

For use in homes, apartment buildings, hotels, farm buildings, stored grains, animal bedding and insulation.

Stored Grains and Other Commodities:
DESECT™ Diatomaceous Earth Insecticide can be used with feed grains, seed, stored grains and other raw agricultural products including barley, buckwheat, corn, oats, rice, rye, sorghum, wheat, flax, peas, soybeans, peanuts, popcorn, cocoa beans and mashes of these grains. DESECT™ Diatomaceous Earth Insecticide is an effective insecticide for killing exposed insects such as Rice Weevils, Granary Weevils, Angoumois Grain Moths, Mediterranean Flour Moths, Indian Meal Moths, Red Flour Beetles, and Tribolium in empty bins, warehouses, binnacer, containers, slabs, and silos. Moisture content of grain should be regulated to less than 12% for effective insect control. DESECT™ Diatomaceous Earth Insecticide can be applied to the grain or other agricultural products at the time of storage and should be added at a point where sufficient blending can occur. DESECT™ Diatomaceous Earth Insecticide can be applied at a rate of 1 to 7 pounds per ton and can be mixed throughout the entire grain mass, or used as a top and/or bottom dressing. Uniformity of blend is important for efficient pest control. For dressings, treat the top and bottom 3-4 feet of the bin. Apply DESECT™ Diatomaceous Earth Insecticide at the recommended rate since treated grain may have reduced flowability. USDA direct and U.S. General advice states that grain properly identified as containing DESECT™ Diatomaceous Earth Insecticide will not be downgraded solely based on diatomite content. Refer to the USDA Directive for proper identification and grading procedures.

Surface Applications:
Apply DESECT™ Diatomaceous Earth Insecticide at a rate of 4 pounds per 1000 square feet of surface area over the top of the grain bed, if surface is disturbed so that protective barrier is breached, reapply DESECT™ Diatomaceous Earth Insecticide at a rate of 4 pounds per 1000 square feet.

Empty Storage Area Treatment:
DESECT™ Diatomaceous Earth Insecticide should be dusted lightly at an approximate rate of one (1) pound per 1000 square feet on all interior wall and floor surfaces of empty storage areas. Pay special attention to those areas of harborage for insects (cracks and crevices).

Insulation:
DESECT™ Diatomaceous Earth Insecticide can be mixed with cellulose insulation to aid in the control of roaches, slugs, ants, earwigs, grasshoppers, crickets, silverfish, millipedes, centipedes, sowbugs, pill bugs, mice and rats in insulated areas. Mix 1 lb. of DESECT™ Diatomaceous Earth Insecticide with 20-25 lbs. of cellulose insulation before blowing material into treatment site.

Aids in Control of Fleas and Ticks:
Domestic Animals: USE ONLY ON DOGS AND CATS. Do not use on dogs and cats under 12 weeks old. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or medicated animals. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Directions for use: Work DESECT™ Diatomaceous Earth Insecticide thoroughly into animal fur with a brush. Wipe excess off with a damp cloth being careful not to remove product that is near the animal's skin and in contact with insect. Applications over the entire animal is necessary. Reapply every two or three days. Frequent use may dry animal's skin. Apply DESECT™ Diatomaceous Earth Insecticide liberally to pet's bedding and in sleeping quarters, particularly in corners, cracks and crevices.

Carpet Application: Sprinkle lightly over carpet and work into nap with broom or carpet rake. Vacuum carpet 48 hours after application to remove dust. Reapply when icing infestations are apparent.

Roaches, Slugs, Ants, Earwigs, Grasshoppers, Crickets, Silverfish, Millipedes, Centipedes, Sowbugs, Pill Bugs, Mice, Rats, Box Elder Bugs, and Carpet Beetles: Apply DESECT™ Diatomaceous Earth Insecticide in areas frequented by these pests such as cabinets, drawers, cupboards, and cracks and crevices. Build a barrier about ½ high that pests will crawl through. Remove and replenish as necessary.

Product Description: DESECT™ Diatomaceous Earth Insecticide diatomaceous earth acts on insects physically by abrading the exterior skeleton and dehydrating the insect. DESECT™ Diatomaceous Earth Insecticide insect control utilizes the physical qualities of diatomaceous earth.

Storage and Disposal: Do not contaminate water, food or feed by improper storage or disposal. Store in a cool dry place. Pesticide Disposal and Container Handling: Non-refillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling, if available, or if not, follow your local solid waste agency for disposal instructions.
