DESECT™
DIATOMACEOUS EARTH INSECTICIDE

Kills ants, cockroaches and other insects.
For use on crops, orchards, gardens & plants.
For use in homes, apartment buildings, hotels, farms, ranches, animal stalls, animal bedding, stored grains and insulation.
Aids in the control of fleas, ticks, mites and other pests on pets, poultry and livestock.
Odorless, non-staining.

ACTIVE INGREDIENTS:
Silicon Dioxide, from diatomaceous earth .......................... 85%
Other Elemental Oxides .......................................................... 10%
Moisture ................................................................. 5%
Total .......................................................... 100%

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for additional Precautionary Statements and Directions for Use

The Diatomaceous Earth Experts
DEsect Diatomaceous Earth Insecticide contains an amorphous diatomite that is harmless to humans and domestic animals. It kills insects by piercing their outer body covering with millions of sharp, microscopic particles of diatomite. The insect struggles and dries out, succumbing to the product’s effect. DEsect Diatomaceous Earth Insecticide is not a residual and is not ideal for controlling insects that live within the material they infest. It is best suited for controlling insects after they have infested the material. DEsect Diatomaceous Earth Insecticide should be applied directly to the interior or exterior surfaces of food contact areas. It can be applied to the grain or other agricultural products at the time of storage and grading procedures.

To the extent that any statements made in this label are inconsistent with this document, the statements in this document prevail.

CAUTION: This is a label for Diatomaceous Earth Insecticide physically and behaviorally similar to the material that the products are designed to control. DEsect Diatomaceous Earth Insecticide is physically and behaviorally similar to the material that the products are designed to control. DEsect Diatomaceous Earth Insecticide is a physical product that is harmless to humans and domestic animals. It kills insects by piercing their outer body covering with millions of sharp, microscopic particles of diatomite. The insect struggles and dries out, succumbing to the product’s effect.
