Children can fall into bucket and drown. Keep children away from bucket with even a small amount of liquid.

Los niños pueden caer dentro de el balde y ahogarse. Mantenga a los niños alejados de los baldes aunque solo contengan un poco de liquido.

ALL-IN-ONE CHLORINATING GRANULES

- Dissolves Quickly & Completely
- Controls Algae & Bacteria

FREE POOL CARE ADVICE
1-800-SOS-POOL

FIRST AID: Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth, if possible. IF SWALLOWED: Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

ACTIVE INGREDIENT:
Sodium Dichloro-s-triazinetrione-Dihydrate...99.0%
OTHER INGREDIENTS..............................................1.0%
TOTAL..............................................................100.0%
(56.0% Available Chlorine)

KEEPS OUT OF REACH OF CHILDREN
DANGER

See back panel for additional precautionary statements
DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

ATTENTION: Never mix this concentrated chemical with any other substance except generous amounts of water. See CHEMICAL HAZARDS on this label.

The use of AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES also requires the one time use of AQUA GUARD™ STABILIZER CONDITIONER as described in the directions below under Start Up. This two-component system results in a longer-lasting chlorine residual and reduced chlorine consumption. Both products are completely soluble.

VINYL-LINED POOL CARE: Vinyl-lined pools are easily damaged by chemicals used to treat and maintain pools. AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES are well suited for use in these pools, especially the above-ground pools which have 3-4 foot depths and are not equipped with a bottom drain. AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES dissolve quickly and completely (is easily pre-dissolved in a bucket of water to help avoid potential problems), so direct contact with the pool liner is reduced and there are no residues to be swept or vacuumed from the pool bottom. AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES also simplifies pH control because it's pH neutral, compared to other forms of chlorinating products which contain calcium hypochlorite, sodium hypochlorite, and trichloroisocyanuric acid (NOTE: Insoluble crystal-forming reaction will result when using sodium bisulfate (dry pool acid) to adjust pH when used in conjunction with calcium hypochlorite. AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES will not cloud water even when super chlorinating which often occurs with calcium hypochlorite products.

START UP: Step 1. Condition pool water with AQUA GUARD™ STABILIZER CONDITIONER as per directions on its label. Thereafter, regular use of AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES alone will maintain proper stabilization. NOTE: Omit Step 1 if pool is already conditioned with a similar stabilizer. Concurrently with Step 1, super chlorinate pool water by adding 12 oz. of AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES per 10,000 gallons of pool water. See additional super chlorination instructions below.

DAILY CARE: After Step 1 and 2 above, regularly check chlorine residual with a test kit and chlorinate daily as needed. See the label. NOTE: One ounce of this product per 5,000 gallons of pool water will increase an existing chlorine residual by 0.8 ppm (1/8 rounded cup = 1 oz.). Broadcast AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES directly into the pool water. pH: Keep pH of water between 7.2 and 7.6. Use AQUA GUARD™ pH DOWN (dry acid) to lower pH and AQUA GUARD pH UP (soda ash) to raise it.

SUPER CHLORINATION: Whenever the pool water loses its sparkle or turns green or the chlorine residual falls rapidly after regular chlorination, super-chlorinate. Experience shows that during summer months, water will need to be super chlorinated with 12 oz. of AQUA GUARD™ ALL-IN-ONE CHLORINATING GRANULES per 10,000 gallons of pool water every 10 to 14 days. Do not use the pool until the chlorine residual has dropped to 3 ppm.

GENERAL: The following tables are a handy reference to average chlorine requirements, but must not be substituted for regular use of a test kit since pools and conditions vary considerably. Test water frequently and control chlorine as needed. Anticipate an increased chlorine consumption with increased swimming, hot water or weather, rain, a dirty or neglected pool, etc.

NOTE: Do not allow direct contact of this product on the following pool surfaces: vinyl, metallic, fibreglass, painted or colored plaster. Always dilute in the water; direct contact with surfaces will bleach color.

PRECAUTIONARY STATEMENTS: Hazards to humans and domestic animals

DANGER: CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL / CHEMICAL HAZARD: STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE AND EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460° F TO 480° F WITH LIBERATION OF HARMFUL GASES. MIX ONLY WITH WATER. USE CLEAN DRY UTELS. DO NOT ADD THIS PRODUCT TO ANY DISPENSING DEVICE CONTAINING REMNANTS OF ANY OTHER PRODUCT. SUCH USE MAY CAUSE A VIOLENT REACTION LEADING TO FIRE OR EXPLOSION. CONTAMINATION WITH MOISTURE, ORGANIC MATTER OR OTHER CHEMICALS MAY START A CHEMICAL REACTION WITH THE GENERATION OF HEAT, LIBERATION OF HAZARDOUS GASES AND POSSIBLE GENERATION OF FIRE OR EXPLOSION. IN CASE OF FIRE, IF POSSIBLE, ISOLATE CONTAINER IN OPEN AIR OR WELL-VENTILATED AREA. FLOOD WITH A LARGE VOLUME OF WATER. IN CASE OF CONTAMINATION OR DECOMPOSITION, DO NOT RESEAL CONTAINER.

STORAGE AND DISPOSAL:

STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry well-ventilated area away from heat or open flame.

CONTAINER DISPOSAL: IF EMPTY: Nonrefillable container. Do not use or refill this container. Place in trash collection or offer for recycling if available. IF PARTLY FILLED: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
