For use to control Ants (including Imported Fire Ants), Mole Crickets and other Insect pests on lawns in landscaped areas and perimeters around residential, institutional, public, commercial and industrial buildings, parks, recreational areas and athletic fields.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
If on skin or clothing:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
You may also contact:
CHEMTREC for fimenal and spill emergencies (800) 424-9300.
PAC Corp. for human health & animal health (900) 311-414.

NOTE TO PHYSICIAN
This product is a systemic. If large amounts have been ingested, milk, cream and other digestive fats and oils may increase absorption and should be avoided.

For Information Regarding the Use of this Product Call 1-800-321-5225 (Mon - Fri; Monday thru Friday).

PRECAUTIONARY STATEMENTS
Hazards to Humans (and Domestic Animals)
Caution
Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing.

Environmental Hazards
This pesticide is extremely toxic to fish and aquatic invertebrates. Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas.
To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticides off the treatment area. Sweeping any pesticide that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help prevent run-off to water bodies or drainage systems.

STORAGE AND DISPOSAL
Prohibitions
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage
Keep out of reach of children and animals. Store in original containers only. Store in a cool, dry place and avoid excess heat. Carefully open containers. After partial use close tightly.
In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. Contaminated spill. Call CHEMTREC (Transportation and spills) (800) 424-9300.
To contain spill—Cover to prevent dispersal. Place damaged package in a holding container, identify contents.

Pesticide Disposal
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal
Paper and plastic bags: Non-refillable. Do not re-use or refill this container. Completely empty bag into application equipment. Then offer for recycling, if available, or dispose of empty bag in a sanitary landfill or by incineration, or by burning. Do not burn unless allowed by local authorities. If burned, stay out of smoke.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic purposes or climate modification and being grown in interior plantscapes, ornamental gardens or parks, or lawns or grounds.

Do not apply more than 0.2 lb. active ingredient (a.i.) per acre per application on residential use sites (i.e., around private homes, apartment buildings, condominiums, non-agricultural outbuildings, non-commercial greenhouses, pre-schools or day care facilities). May be applied up to 0.4 lb. a.i. per acre per application on non-residential use sites (i.e., around institutional, public, commercial or industrial buildings, parks, recreational areas or athletic fields).
Do not broadcast apply more than 0.4 lbs. a.i. (200 lbs. LESCO CrossCheck® PL Granular Insecticide) per Acre per year.
Apply this product directly to the lawn or garden area. Water treated areas as directed on this label. Do not water to the point of run-off.
Do not make applications during rain.
Not for use on golf courses, sod farms, nurseries, in commercial greenhouse or on grass grown for seed.

**LAWN AND PERIMETER APPLICATIONS**

**Lawn Application:** Broadcast LESCO CrossCheck® PL Granular Insecticide with suitable application equipment to ensure uniform coverage over the treatment area.

**Perimeter Application:** Apply to ground areas 5 to 10 feet wide around and adjacent to the structure.

**Boundary Applications:** Apply to soil areas, ornamental gardens, pavement crevices, fencelines, planter areas, vegetation areas and mulch areas.

### APPLICATION RATES

The application rates listed in the table will provide excellent control of the respective pests under the listed conditions. For all applications, the amount of the appropriate application rate per 100 ft² of treated area is calculated below.

#### Application Rate per 100 ft²

<table>
<thead>
<tr>
<th>Area</th>
<th>Active Ingredient lbs per acre</th>
<th>Application Rate (Lbs/1,000 sq ft)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Perimeter</td>
<td>0.125</td>
<td>1.00</td>
</tr>
<tr>
<td>Lawn</td>
<td>0.075</td>
<td>0.75</td>
</tr>
<tr>
<td>Flower Bed</td>
<td>0.05</td>
<td>0.50</td>
</tr>
</tbody>
</table>

**Note:** The amount of LESCO CrossCheck® PL Granular Insecticide is based on the total area being treated. The area is determined by multiplying the linear distance by the width and then adding to that value the area of any attached structures. The linear distance is equal to the band width (no account for the treated area at the four corners of a rectangular structure).

### Fire ant mound treatment:

Apply 1 1/2 oz of LESCO CrossCheck® PL Granular Insecticide per mound. Mix the granular insecticide in water and apply at least two applications at a 2 week interval.

### INDUSTRIAL NON-AGRICULTURAL APPLICATIONS

Included Industrial Sites, Parks, Ball Fields and Cemeteries.

Broadcast Spot Applications: For the control of actively foraging ants (including Imported Fire Ants) broadcast uniformly 2.4 lbs. of LESCO CrossCheck® PL Granular Insecticide per 1000 sq. ft. (0.2 oz. per 1,000 sq. ft.). See comments section under Lawns for additional rate recommendations.

### LESCO CrossCheck® PL Spreader Setting Guide

#### Application Rate lbs/1,000 sq. ft.

| Speed | (mph) | Setting | Rainfall
|-------|-------|---------|---------|
| 5-7 | +1 | 2 | .024
| 8-10 | +2 | 1 | .052

#### för your area.

### Lawn Care

**Flea larvae:**

_Flea larvae develop in the soil of shaded areas that are accessible to pets or other animals. Irrigate the treated area with up to 0.5 inch of water immediately after application to activate (release from the granular) the insecticide._

**Imported Fire ants:** Control will be optimized by controlling broadcast applications that will control foraging workers that will control existing colonies as well as future colonies. The moth application should be timed to coincide with the full bloom stage of Vanghiae sp. (Vanghiae vanguardiae) and horse chestnut (Aesculus hippocastanum). The July application should be timed to coincide with the blooming of Rose of Sharon (Hibiscus syriacus).

**Chinch Bugs:** Chinch bugs thrive on the heat of grass plants and are often found in the flusher floor. Irrigate the treated areas with up to 0.5 inch of water immediately after application to activate (release from the granular) the insecticide. Chinch bugs can be one of the most difficult pests to control in grasses and the higher application rates may be required to control populations that contain both nymphs and adults during the summer.

**European Crane Flies:** Treatments should be made to control mid- to early-autumn larvae (approximately August-August) as they feed on plant crowns. Treatments made to late-autumn season (March-April) may only provide suppression. Consult your local extension agent for specific recommendations for your area.
