DIRECTIONS FOR USE

This is a solution of Peroxide-Lam. Use this product in the manner described on the label. This product is designed specifically as a general cleaner and disinfectant for use in hospital, office, schools, and manufacturing facilities. Always pre-treat and allow to dry before cleaning or sanitizing. Include all surfaces, corners, and crevices when applying this product. This product is not intended for cleaning: food contact surfaces; hot surfaces; greasy, oily surfaces; soiled surfaces; glass, crystal, or glazed porcelain, glass, china, glassware, china, silver, copper, silver-based, stainless steel, plastic, painted, finished, or unfinnished metal, mouse or rat holes; and any inconspicuous area or opening. Aerosol sprays with spray foam are not intended for direct contact with food. This product is not intended for use on medical devices or equipment, medical patient care areas, animal housing areas, or any other area where infection control is required or when food is being prepared or handled. This product is not a substitute for disinfectants and must be allowed to remain wet for 3 minutes. It is not for use on critical or semi-critical medical device surfaces. Fill or refill the 32 oz. 2 in 1 Cleaner and Disinfectant spray bottle with refill. Pour product into spray bottle over sink or tub basin. Place cap on bottle and shake vigorously. Make sure cap is on tight and no liquid is lost. Shake vigorously for 15 seconds after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. If not available, puncture and dispose in a sanitary landfill. Turn the bottle over onto its other end and tip it back and forth several times. Triple rinse as follows: Fill container ¼ full with water and rinse with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or taking medications.嫘

FOR REFILL SPRAY BOTTLE:

CONTAINER DISPOSAL

Do not contaminate water, food, or feed by storage or disposal of pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Protection Agency for guidance.

PESTICIDE DISPOSAL:

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL. PESTICIDE STORAGE: Store in a child-resistant container and store out of reach of children. Do not store container or spray mixture near food, drink, or food preparation areas. Pesticide waste is acutely hazardous. Improper disposal of excess pesticides and/or admixtures, for example, in/on garbage, may contribute to destroying the environment. Contact your local health department or environmental agency for proper disposal. EPA-registered pesticide products have been tested and approved for storage and disposal. For proper disposal, contact the State Pesticide office or local environmental agency. Store and use this product away from water courses. Ramos Environmental Corporation recommends that any solution or rinse that contains this product be disposed of according to your local environmental office or public works office. Ramos Environmental Corporation recommends that any solution or rinse that contains this product be disposed of according to your local environmental office or public works office.

 IF SWALLOWED:

Call a poison control center or doctor for treatment advice. You may contact 1-800-424-9300 for emergency medical treatment guidance.

IF IN EYES:

Rinse with water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor immediately for treatment advice. There may be a place of water or a doctor may be necessary. Do not induce vomiting unless told by the poison control center or doctor. Do not give anything by mouth to a unconscious person. IF INHALED: Have this product by a mouth. If a person is more breathing, call 911 or a station in an area where you work with this product. If a person develops difficulty in breathing or loses consciousness, get medical attention right away. If the person is unconscious, move to a resting position after the flow begins to drip. Repeat procedure two more times. Offer for recycling or reconditioning, if available. For recycling or reconditioning, if available. Once it is not more times. Offer for recycling or reconditioning, if available. If there are any problems with the spray bottle, contact the manufacturer. The disposer must not be discarded, but must be returned to the manufacturer. No recycling or reconditioning, if available. If there are any problems with the spray bottle, contact the manufacturer. The disposer must not be discarded, but must be returned to the manufacturer.

KEEP OUT OF REACH OF CHILDREN

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is designed specifically as a general purpose disinfectant and cleanser to be used on non-porous surfaces. Avoid contact with eyes. Wash hands thoroughly after handling and before eating, drinking, changing clothes or using tobacco.

**1. CLEANING:**

Remove gross/filth or heavy soil prior to application of the product. Hold container six to eight inches away from the surface and spray in a sweeping motion. (Do not spray directly on Food Contact Surfaces). For plastic and painted surfaces, you may use an inconspicuous area before use. A rinse with potable water is required for surfaces that are in direct contact with food. This product may be used on non-porous inanimate surfaces which come in contact with food including: floors, walls, metal surfaces, stainless steel surfaces, countertops, glass controls, glazed ceramic, tile, porcelain, surfaces, dishes, bowls, oven surfaces, metal surface, window frames, plastic, painted surfaces, and cabinets. For plastic and painted surfaces, you may use an inconspicuous area before use. A rinse with potable water is required for surfaces that are in direct contact with food. This product may be used on non-porous inanimate surfaces which come in contact with food including: floors, walls, metal surfaces, stainless steel surfaces, countertops, glass controls, glazed ceramic, tile, porcelain, surfaces, dishes, bowls, oven surfaces, metal surface, window frames, plastic, painted surfaces, and cabinets.

**2. DISINFECTION, DEODORIZING**

A rinse with potable water is required for surfaces in direct contact with food. Do not use in food preparation areas. For plastic and painted surfaces, you may use an inconspicuous area before use. A rinse with potable water is required for surfaces that are in direct contact with food. This product may be used on non-porous inanimate surfaces which come in contact with food including: floors, walls, metal surfaces, stainless steel surfaces, countertops, glass controls, glazed ceramic, tile, porcelain, surfaces, dishes, bowls, oven surfaces, metal surface, window frames, plastic, painted surfaces, and cabinets.

**3. STERILIZATION**

This product is designed for use on hard surfaces in areas where housekeeping is of prime importance in controlling the hazard of cross-contamination. It is formulated to disinfect hard, non-porous inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, countertops, glass controls, glazed ceramic, tile, porcelain, surfaces, dishes, bowls, oven surfaces, metal surface, window frames, plastic, painted surfaces, and cabinets. This product kills on hard, non-porous inanimate surfaces when allowed to remain in contact for 30 seconds. This product kills on hard, non-porous inanimate surfaces when allowed to remain in contact for 30 seconds.

**4. ANTIMICROBIAL ACTIVITY (BACTERIA):**

This product kills on hard, non-porous inanimate surfaces when allowed to remain in contact for 3 minutes. This product is designed for use on hard surfaces in areas where housekeeping is of prime importance in controlling the hazard of cross-contamination. It is formulated to disinfect hard, non-porous inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, countertops, glass controls, glazed ceramic, tile, porcelain, surfaces, dishes, bowls, oven surfaces, metal surface, window frames, plastic, painted surfaces, and cabinets. This product kills on hard, non-porous inanimate surfaces when allowed to remain in contact for 3 minutes.
