IMPORT™

Water Conditioning Agent/ pH Adjuster for Glyphosate

PRINCIPAL FUNCTIONING AGENTS
Monocarboxamide dihydrogen sulfate, tallow amine ethoxylate, polyoxyethylene triacid ether phosphate
Constituents Ineffective as Spray Adjuvants
Total

All ingredients are approved for use under 40 CFR 180
WA Reg. No. 9349-14001

KEEP OUT OF REACH OF CHILDREN
DANGER / PELIGRO. CORROSIVE.

Si usted no entiende la etiqueta, busque a alguien para que le explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

PRECAUTIONARY STATEMENTS
Before using this product, read the entire label, including the conditions of sale. Corrosive. Causes irreversible eye damage. Causes skin burns. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles or face shield) and chemical-resistant glove. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators or other handlers of this chemical must wear goggles or face shield, chemical resistant gloves, coveralls worn over long-sleeved shirt, long pants, socks and chemical resistant footware when handling this product. When mixing and loading wear a chemical-resistant apron. Wear air purifying mask with appropriate canister when used in a non-ventilated area. Consult the MSDS for further information.

FIRST AID

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

If In Eyes: Hold eyes open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

If On Skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for treatment advice.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

GENERAL INFORMATION
IMPORT is a specialized utility modifier that acts as a pH adjuster and water conditioner with built in compatibility agents that widen the conditions under which glyphosate and other weak acid herbicides can be applied. IMPORT maintains the integrity of the spray diluent (water) and protects herbicides from deactivation by hard water cations and micronutrient based tank mix partners.

FOR USE WITH PESTICIDES REGISTERED FOR AGRICULTURAL, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, RIGHTS-OF-WAY AND OTHER APPROPRIATE USES. NOT FOR AQUATIC USE.

DIRECTIONS FOR USE
Always mix and apply this product in accordance with the instructions found on the pesticide label regarding adjuvants. In the absence of specific instructions follow the application and mixing guidelines below.

USE RATES
Using the guidelines below, apply IMPORT at 1–4 quarts per 100 gallons of spray solution (1–4 liters per 400 liters of spray solution) or 0.25–1.0% v/v.

0.25–0.5% v/v use rates:
• When replacing 8.5 lbs of ammonium sulfate per 100 gallons of spray solution.
• When used as an ammonium sulfate replacement for “loaded” glyphosate herbicides.

0.5–1.0% v/v use rates:
• When replacing 17 lbs of ammonium sulfate per 100 gallons of spray solution.
• When used as an ammonium sulfate replacement for “unloaded” glyphosate herbicides.

1% v/v use rate:
• When tank mixing with micronutrients, apply up to 2.5 lb. per acre of manganese sulfate. In a manganese and zinc sulfate combination, apply up to a total of 2 lb. per acre in a 3 to 1 (Mn:Zn) ratio.

MIXING
In the absence of specific mixing instructions found on the pesticide label, fill the spray tank with at least 50% of the desired finished carrier volume. When premixing in a mixing vessel or inductor, fill with at least 20% of the desired finished carrier volume. While the carrier is agitating, add tank mix ingredients in the following order:
1. Compatibility agent and/or antifoam, if needed
2. AMS, dry formulations (WP, DF, WDG, SP), and dry drift retardants
3. Dry soluble and suspension fertilizers / micronutrients
4. Liquid drift retardants and flowable formulations (F & FL)
5. Liquid concentrates, suspension and microencapsulated (LC, SC, ME)
6. Emulsifiable concentrates (E, EL or EC)
7. Solutions and soluble liquids (S or SL)
8. Liquid micronutrients and fertilizers
9. Water conditioners (IMPORT) and other adjuvants (COC, HSOC, MSO, NIS)
10. Finish filling to desired spray volume level and continue agitation

STORAGE AND DISPOSAL
This product must be stored above 32°F (0°C). Failure to do so will cause irreversible damage and render the product unfit for use. Keep containers sealed when not in use. Store in original container only. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org

Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

CONDITIONS OF SALE
Note: Read the information contained herein before buying or using this product. If the stated terms are not acceptable, return the product at once, unopened. It is critical that this product be used and mixed only as specified on this label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling. Precision Laboratories, LLC warrants that this material is reasonably fit for use as stated herein and even though the product is reasonably fit for use as stated herein and even though plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks include, but are not limited to, damage to plants and/or crops to which the material is applied, or lack of complete control and damage caused by drift to other plants or crops. Such risks may occur even though the product is reasonably fit for use as stated herein and even though
