LEISURE TIME Brominating Granular

Fast-dissolving granular sanitizer

ACTIVE INGREDIENTS:
Sodium dichloro-triazinetrione, *aqua*, 84.15
Sodium Bromide                                       14.70%
Other Ingredients                                      1.05%
Total                                                  100.00%

Available chlorine: 49.7%

KEEP OUT OF REACH OF CHILDREN

DANGER

Read all precautionary statements on back label and all first aid statements before use.

FIRST AID:
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present and after 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for further treatment advice.

IF SWALLOWED: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the Poison Control Center or doctor. Do not give anything by mouth to an unconscious person. Call Poison Control Center or doctor immediately for treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

Have product container or label with you when calling a Poison Control Center or doctor, or going for treatment advice.

IN CASE OF EMERGENCY CALL: 1-800-854-6911

WHY YOU SHOULD USE THIS PRODUCT:
Leisure Time® Brominating Granular is a sanitizer for spa and hot tub water. It is rapidly and completely dissolved without cloudy or insoluble residue in water to provide effective bromine sanitation.

DIRECTIONS FOR USE:
It is advisable of Federal law to use this product in a manner inconsistent with its labeling.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE FOR SPA OR HOT TUB START UP:
To start a new spa or hot tub, or for one recently drained:
- Clean all surfaces, backflush or the filter, chemically balance the calcium hardness and total alkalinity, treat for metals, if present (iron, copper and magnesium), and adjust the pH to 7.2 – 7.8.
- Add 7.5 grams (1 1/2 teaspoons) of this product per 300 gallons of water directly to the spa or hot tub with the circulation system on. Measure bromine residuals after 15 minutes and repeat dosage until an active bromine concentration of 2 to 4 ppm in residential spas is established. The presence of organic debris, high buffer rates and other factors may require a higher dosage.
- Use test strips to monitor for bromine regularly. Do not allow cyanuric acid level to exceed 100 ppm. It is recommended that spas and hot tub be drained every 30 – 90 days, more often if under heavy use.

SHOCK TREATMENT:
Water soluble, non-filterable wastes can accumulate in spa or hot tub water and cause dull or cloudy water and can stimulate algae growth. Supercilication or superchlorination with a suitable oxidizing shock treatment must be done on a regular basis to remove these wastes and maintain clear sparkling water.
- Add 30 grams (6 teaspoons) of this product per 300 gallons of water directly to the spa or hot tub with the circulation system on.
- Re-entry into treated Spas or Hot Tubs is prohibited for at least 8 hours after shock treatment.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Corrosive. Contamination of improper use may cause fire or explosion or the release of toxic gases. Do not mix this product with a small amount of water. Do not clean equipment with pressure washer or high pressure washer. Do not enter swimming pool or hot tub. Do not allow product to contact any foreign matter, including water treatment products. Do not add water to product. If product is exposed to small amounts of water, it can react to cause explosions or the release of toxic gases. Causes irreversible eye damage or skin burns. Harmful if swallowed or absorbed through the skin. May be fatal if inhaled. Open in a well-ventilated area. Do not breathe dust, vapor, or spray mist. Do not get in eyes or on skin when using. Wear protective glasses, face shield or goggles and rubber gloves. For additional protection, wear long sleeves and long pants. Wash thoroughly after contact with this product and before eating, drinking, using tobacco or going to the toilet. Remove contaminated clothing and wash clothing before reuse.

PHYSICAL & CHEMICAL HAZARDS:
DANGER. Strong oxidizing agent. This product can increase fires intensity. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases. Do not add water to this product. Always add product only into large quantities of water.
- Do not attempt to become wet or drip before use. Can react with other materials, including water treatment products, to cause fire, explosion, and the release of toxic gases.

Keep all foreign matter, including other water treatment products, away from this product. Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before adding this product to a skimmer. Avoid spilling this product.

Exposure to hot water can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases.
- Store in a cool, dry, well-ventilated area away from heat or open flame. Keep away from heat and from flammable materials (like a lighted cigarette).

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:
Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat and open flame. Avoid moisture getting into container. Keep off wet floor. Non-refillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not discard in trash. Disposal of a contaminated or decomposing product, see "EMERGENCY HANDLING.""
