SEGWAY® O
Ornamental Fungicide

ACTIVE INGREDIENT:
Carbendazim 34.7%

OTHER INGREDIENTS:
Benzyl alcohol 10.0%
Water 55.3%

TOTAL: 100.0%

40-ounce (1.14L) Sprayer (400 grams per liter)
EPA Reg. No.: 751213-59807
EPA Est. No.: 9322-TN-001

KEEP OUT OF REACH OF CHILDREN

CAUTION
See section for First Aid, Precautionary Statements, Directions For Use, Storage And Disposal, and Warranty And Disclaimer. Read entire label carefully and use only as directed.

Produced for OHP Inc., PO Box 52121, Marietta, PA 19451
(800) 355-4647
Active Ingredient: Manufactured in Germany
Formulated in France
1072900
Net Contents: 1 pint (473 mL)

FIRST AID (continued)

If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

If on skin
• Take off contaminated clothing.
• Wash skin immediately with plenty of soap and water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes
• Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed
• Call a poison control center or doctor without delay for emergency treatment.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER
For 24-Hour Medical Emergency Assistance
Human or Animal: Call 1-800-355-4647.
For Chemical Emergency: Spill, Leak, Fire or Accident; Call ChemTREC 1-800-424-9309.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Harmful if inhaled through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Do not take internally.

Personal Protective Equipment (PPE)
Applicator and other handlers must wear long-sleeved shirt and long pants, sturdy shoes, and chemical-resistant gloves made of any waterproof material.

Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing. Do not allow contact of contaminated clothing with unprotected skin. Follow manufacturer's instructions for cleaning/sterilizing PPE. If not in an enclosed place for washing, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements
When handlers use dosed systems, enclose cab, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pest control (29 CFR 1910.146).

User Safety Recommendations
Read and follow all precautions and directions on label.

AVOIDING SPRAY DRIFT AT THE APPLICATION SITE IS THE RESPONSIBILITY OF THE APPLICATOR. The interaction of many equipment-and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when making decisions. Where states have more stringent regulations, they should be observed.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. PPE (to follow USE DIRECTIONS AND PRECAUTIONS ON THE LABEL MAY RESULT IN PLANT RUMP OR POOR DISEASE CONTROL. DO NOT apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, contact the agency responsible for pesticide regulation.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 190. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. This statement must appear on the statement of this label about personal protective equipment (PPE), and restricted entry intervals. See requirements at first use, then apply only to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted entry interval (REI) of twelve (12) hours. PPE required for early entry to the treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
- coveralls;
- chemical-resistant gloves (made of any waterproof material), and;
- shoes plus socks.

GENERAL INFORMATION

SEGWAY O is a systemic, non-volatile concentrate that controls Pythium and Phytophthora and certain soil-borne diseases of ornamental plants grown in commercial greenhouses and nurseries. Applications by home owners to residential turf is prohibited.

INTEGRATED PEST MANAGEMENT

SEGWAY O is an excellent disease control agent when used according to label directions for control of Pythium and Phytophthora. Although SEGWAY O has limited systemic activity, it should be utilized in a targeted fungicide and applied to the disease affecting the crop. Depending upon the level of disease pressure, good protection of the crop against disease can be expected over a period of 7 to 28 days.

SEGWAY O is recommended for use as part of an Integrated Pest Management (IPM) program, which may include the use of disease-resistant crop varieties, cultural practices, crop rotation, biological disease control agents, post-harvest and disease forecasting programs aimed at preventing economic pest damage. Practices known to reduce disease development should be followed. Consult your state cooperative extension service or local agricultural authorities for additional IPM strategies established in your area.

SEGWAY O may be used in State Agricultural Extension Advisory of disease resistance. SEGWAY O is not cross-resistant with other classes of fungicides that have different modes of action.

PLANT TOLERANCE

Refer to the (Contact). Although SEGWAY O has been tested on several plants with no indication of phytotoxicity, neither the manufacturer nor the seller has determined whether or not SEGWAY O can be used safely on ornamental and nursery plants not specified on this label. The producer/owner should determine if SEGWAY O can be used taking into consideration the use by following a small number of the type of plants to be treated at recommended rates for that particular disease for phytotoxicity.

MIXING INSTRUCTIONS

NOTE: Slowly invert SEGWAY O container several times to assure uniform mixture of formulation before adding to the spraying tank. Fill the mixing tank with half of the required amount of water. The required amount of SEGWAY O should be added slowly into the spray tank during mixing by the required solution. Keep agitation running while filling spray tank and during spraying operations. Do not allow empty mix to stand overnight or for prolonged periods of time. Prepare only the amount of the spray mixture required for immediate use. Containing equipment should be thoroughly cleaned immediately after the application is completed.

Applying SEGWAY O is sufficient to obtain adequate coverage of the foliage. Gallonage to be used will vary with crop and amount of plant growth.

TANK MIX COMPATIBILITY

SEGWAY O is physically compatible with certain chemistries that contain products recommended for control of diseases and pests that are ornamental plant diseases and ornamental plant protection products. However, the physical compatibility of SEGWAY O with tank mix products shall be evaluated on a case-by-case basis to determine if the tank mix products can be used concurrently with other fungicide products. Segway O is not recommended for use with insecticides or herbicides because of potential for physical incompatibility.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this area apply to uses of this product that are not within the scope of the Worker Protection Standard. This product is not to be used on lawns or ornamental plant diseases and ornamental plant protection products. Do not apply to areas that are not required to have any contact with other ornamental plant diseases and ornamental plant protection products. Use only those products that are contained in the tank mix mixtures and tank mix products.
physical incompatibility in the jar test indicates that Segway® should not be used in the tank mix.

**ORNAMENTALS**

**Container Grown Plants – Soil Application**

For control of damping-off, root and stem rot diseases of ornamentals, including diseases of container grown ground covers and outdoor nursery stock, apply Segway® as a soil drench or soil surface spike. Do not make more than 3 applications of Segway® per crop cycle for control of Pythium or Phytophthora soil borne diseases. Segway® may also be applied via irrigation systems as noted below.

For drench applications by container plants, use strength of the specified water solution based on the root zone volume described on the label. It is sufficient for container growing in a container with 4-inch depth of growth media. Containers greater than 6-inch depth generally require from 1/2 to 2 pints of the injection.

**Field Grown (Bed) Plants – Soil Application**

For control of damping-off, root and stem rot of field grown (bed) plants, including koi pond runnels, with drench applications, use sufficient water solution to allow for penetration into the root zone.

**APPLICATION AND CALIBRATION TECHNIQUES FOR DRAIN IRRIGATION**

Apply this product only through micro-irrigation systems or micro-irrigation systems such as sprinkler-irrigation systems, and/or flow systems. DO NOT apply this product through any other type of irrigation system. Crop injury or lack of effectiveness, or drip points visible in the drip line may result from non-uniform distribution of treated water.
Always inject SEQUIN® O into irrigation water after it discharges from the irrigation pump and after it passes through the check valve. Never inject pesticides into the intake line on the suction side of the pump.

Pesticide injection equipment must be fitted with a functional, normally closed, semi-automatic, valve-type valve located on the intake side of the injection pump. Interlock this valve to the lower system, so as to prevent fluid from being withdrawn from the chemical supply tank while the irrigation system is either automatically or manually turned off.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of treated irrigation water back toward the water source. The pipeline must also be fitted with a vacuum relief valve and low-pressure drain, located between the injection water pump and the check valve, to prevent back-siphoning of treated irrigation water into the water source.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in original container, in a secured, dry place, away from food, feed, and fuel.

PESTICIDE DISPOSAL: Pesticide waste is toxic. Improper disposal of excess pesticide, pesticide empty or partially filled, or waste can result in violation of Federal law. If these wastes cannot be disposed of at the source, according to label instructions, contact your State Pesticide or Environmental Control Agency, or the HazMat/Radioactive Waste representative at the nearest EPA Regional Office for guidance.

WARRANTY AND LIMITATION OF DAMAGES

Seller warrants to those persons lawfully acquiring title to this product that, at the time of first sale of this product by Seller, it is in compliance with its chemical description and was reasonably fit for the purposes stated on the label when used in accordance with Seller's directions under normal conditions of use, to the extent consistent with applicable law. Buyers and users of this product assume the risk of any use contrary to such directions. EXCEPT AS PROVIDED ELSEWHERE IN WRITING CONTAINING AN EXPRESS REFERENCE TO THIS WARRANTY AND LIMITATION OF DAMAGES, SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OR GUARANTEE, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO. In no event shall Seller's liability for any breach of warranty or guarantee exceed the purchase price of the product to which a claim is made. To the extent consistent with applicable law, Buyers and users of this product are responsible for all loss or damage from use or handling of this product which results from or is transmitted by the control of Seller, including, but not limited to, incompatibility with other products unless otherwise expressly provided in Directions for Use of this product, weather conditions, cultural practices, moisture...
FIRST AID: • If swallowed: Take off container and clothing. • Rinse skin thoroughly with plenty of soap and water for 15 minutes. • Call a physician or a poison center or local emergency room. • If on skin: Wash off with plenty of soap and water. • Call a physician immediately. • Call a physician or a poison center or local emergency room. • If in eyes: Rinse eyes immediately with plenty of water. • Call a physician. • If inhaled: Move person to fresh air. • Call a physician or a poison center or local emergency room.

PRESERVATION AND STORAGE: Store in a cool, dry place. Store in original container and keep tightly closed. Avoid contact with eyes, mouth, and skin. Wash thoroughly with soap and water after exposure. Do not contaminate water, food, or feed by storage or disposal. Do not use near fish beds. For storage in a residential area, contact the local fire marshal or environmental health officer. For storage in an industrial area, contact the local health department or environmental protection agency.
