For the entire family and pets! Coleman® Naturals Insect Repellent Snap Band is a DEET Free mosquito repellent band for the entire family featuring a snap & wrap design with safety reservoir that releases repellent vapor into space around you, not into your skin.

How does it work? Unlike other repellent bands, Coleman® Naturals Snap Band active ingredients are confined to a safety reservoir, not built into the band itself. Removing the reservoir plugs allows vapors to be released that repel mosquitoes from the immediate area.

Directions: 1. Remove band from resealable plastic container. 2. Using fingertips or a tweezer, carefully remove one or more plugs from the reservoir, depending on insect activity. Dispose of the plugs in the trash. 3. Snap & wrap band around wrist, ankle, belt loop, hatband, pet collar, tarp pole, umbrella, etc. in any area where mosquitoes may be a problem. 4. When not in use, return band to resealable container, closing tightly to prolong repellency.

PRECAUTIONS Read and follow label instructions before use. For external use only. Keep out of eyes and mouth. Avoid breathing vapor near snap band reservoir. Adult supervision required for use on children. Avoid using this product if you have sensitive skin or known hypersensitivity to any of the ingredients.

STORAGE AND DISPOSAL Store in a cool dry place, sealed in original package with all label instructions. Store in area inaccessible to children. Dispose of unused band and package in the trash.

WARNING This product contains metal parts. Please do not fold excessively and repeatedly.

FIRST AID: If skin reaction occurs, wash the affected area with clean water immediately. If swallowed or feeling sick after use, seek medical attention immediately and bring original labeling. No specific antidote, treat symptomatically.

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions.
