**Benefits:** API POND ALGAEFIX effectively controls these types of algae: Green or Green water algae (*Chlorella*), String or Hair algae (*Cladophora*) and Blanketweed (*Oedogonium*) in ornamental ponds. Will not harm fish and plants when used as directed.

**Directions for Use:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For synthetically treated pond and fountain use only, where all water is contained without any outflow.

**Warm Weather Caution:** Before using, make certain that the pond has vigorous aeration, i.e., a fountain or aerator device to avoid fish loss due to low oxygen levels. When algae is controlled and removed, the filter or aerator should be increased to prevent re-formation. If adequate aeration is not provided in warm weather, pond water can carry much less oxygen. Therefore, when using during warm weather and high water temperatures, vigorous, 24-hour aeration is required for the duration of the treatment. Do not shut off pond pumps and aerator devices at night.

**To ensure accurate dosing, determine pond volume before use. Add 1 teaspoon (5 ml) for each 50 U.S. gallons (190 L) / 1/4 cup (60 ml) for each 600 gallons (2,275 L) of pond or fountain water. Thoroughly mix into pond water by adding near the pump outflow, waterfall, or aerator device. It can be mixed in a bucket of pond water and dispersed evenly around the pond. Repeat dose every 3 days until algae is controlled. Be prepared to siphon out dead filamentous algae. Once algae growth is under control, add one dose per week. Weekly doses will control algae growth and reduce pond maintenance.**

**Caution:** Do not use with freshwater crustaceans, including: shrimp, crab, and lobsters.

**Precautionary Statement: Hazards to Humans & Domestic Animals:**

**Caution:** Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. **Note:** This product contains a chemical known to the state of California to cause cancer. **First Aid:** If on Skin, thoroughly wash with soap and water and remove contaminated clothing. **If in Eyes,** hold eye open and gently flush with water for 15 minutes. **If Swallowed,** call a Poison Control Center or Doctor immediately for treatment advice.

**Storage and Disposal:** Nonrefillable container. Do not reuse or refill this container. Rinse thoroughly before disposing of container. Offer for recycling, if available. Do not contaminate water or feed by storage or disposal.

ALGAEFIX®

CONTROLS ALGAE GROWTH
• Keeps ponds, water gardens and fountains clean and clear

WORKS FAST

BENEFITS: API POND ALGAEFIX effectively controls these types of algae: Green or Green water algae (Chlorella), String or Hair algae (Cladophora) and Blanketweed (Oedogonium) in ornamental ponds. Will not harm fish and plants when used as directed.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For synthetically lined pond and fountain use only, where all water is contained without any outflow.

WARM WEATHER CAUTION: Before using, make certain that the pond has vigorous aeration, i.e., a fountain or aeration device to avoid fish loss due to low oxygen levels. When algae is controlled and removed by the filter or settles to the bottom of the pond, the oxygen level may drop to harmful levels if adequate aeration is not provided. In warm weather, pond water carries much less oxygen. Therefore, when using during warm weather and high water temperatures, vigorous, 24 hour aeration is required for the duration of the treatment. Do not shut off pond pumps and aeration devices at night.

To ensure accurate dosing, determine pond volume before use. Add 1 teaspoon (5 ml) for each 50 U.S. gallons (190 L) / 1/4 cup (60 ml) for each 600 gallons (2,275 L) of pond or fountain water. Thoroughly mix into pond water by adding near the pump outflow, waterfall, or aeration device. It can be mixed in a bucket of pond water and dispersed evenly around the pond. Repeat dose every 3 days until algae is controlled. Be prepared to siphon out dead filamentous algae. Once algae growth is under control, add one dose per week. Weekly doses will control algae growth and reduce pond maintenance. CAUTION: Do not use with freshwater crustaceans, including: shrimp, crabs and lobsters.

PRECAUTIONARY STATEMENT: HAZARDS TO HUMANS & DOMESTIC ANIMALS. CAUTION: Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. NOTE: This product contains a chemical known to the state of California to cause cancer. FIRST AID: IF ON SKIN, thoroughly wash with soap and water and remove contaminated clothing. IF IN EYES, hold eye open and gently flush with water for 15 minutes. IF SWALLOWED, call a Poison Control Center or Doctor immediately for treatment advice. STORAGE AND DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Rinse thoroughly before disposing of empty container. Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.
