**ACTIVE INGREDIENT:** Poly[oxyethylene(dimethyliminio)ethylene (dimethylimino)ethylene dichloride]: 4.50%

**OTHER INGREDIENTS:** 95.50%

**Keep Out of Reach of Children**

**CAUTION**

See back panel for precautionary and first aid statements.

**PRODUCT #169A**

**BENEFITS:**

API POND ALGAEFIX effectively controls these types of algae:
- Green or Green water algae (Chlorella)
- String or Hair algae (Cladophora)
- Blanketweed (Oedogonium) in ornamental ponds.

It will not harm fish and plants when used as directed.

**DIRECTIONS FOR USE:**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. For synthetically lined pond and fountain use only, where all water is contained without any outflow.

**WARM WEATHER CAUTION:** Before using, make certain that the pond has vigorous aeration, i.e., a fountain or aerator device to avoid fish loss due to low oxygen levels. When algae is controlled and removed by the filter or settles to the bottom of the pond, the oxygen levels may drop to harmful levels. If adequate aeration is not provided. In warm weather, pond water can become much less oxygen. Therefore, when using during warm weather and high water temperatures, vigorous 24 hour aeration is required for the duration of the treatment. Do not shut off pond pumps and aerator devices as tight aeration is required.

To ensure accurate dosing, determine pond volume before use. Do not overdose. Add 1 teaspoon (5 ml) for each 50 U.S. gallons (190 L) / 1/4 cup (60 ml) for each 600 gallons (2,275 L) of pond water. Thoroughly mix into pond water by adding near the pump outflow, waterfall, or aerator device. It can be mixed in a bucket of pond water and dispersed evenly around the pond. Repeat dose every 3 days until algae is controlled.

**STORAGE AND DISPOSAL:**

Store in a cool, dry place.

Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. If not, rinse thoroughly before disposing in trash.
