- Call a poison control center or doctor for treatment advice.

If on Skin or Clothing:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for treatment advice.

**NOTICE TO USER:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency medical treatment call 1-800-255-9242. For customer service or to obtain product information, including the RSSG, call 1-800-542-8916 or 1-816-233-8853.

**Environmental Hazards:** This product is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. To protect the environment, do not allow pesticides to enter or run off into storm drains, ditches, creeks, ponds, wells, or surface waters. Do not contaminate water when disposing of equipment, containers, or unused product.

**Physical or Chemical Hazards:** Capsules are sensitive to heat and humidity. Do not expose to extreme humidity above 50%, or temperature above 70°F for extended periods, such as 1-3 hours, as this may affect the level of capsule fragmentation.

FRAGILE. HANDLE WITH CARE.

IMPORTANT:

- The soft gel capsule coating is sensitive and can be damaged by certain ambient conditions and rough handling.
- Do not expose capsules to relative humidity above 50% or temperatures above 70°F for any extended period over 1 hour, or this may affect the life of capsule fragmentation. Refraining may be possible in some cases, refer to Precautionary Statements section of label.
- Do not refrigerate or expose to freezing conditions, this may permanently damage capsules.
- Remove the capsules from container only when ready to apply to the animal and keep containers sealed at all other times.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of product application.

- In the field do not remove the capsules from container until ready to apply.
- For best results transport the capsules in original sealed packaging until loading into Application Device.
- Apply only with a SmartVet ™ Approved VetCap Application Device (see instructions) and in accordance with its use instructions and treatment method recommendations.
- Never leave the capsules in any Application Device - return all unused capsules to original container and store as directed.
- Only apply when animal is between 15 feet and 30 feet distance from the user.
- Do not apply treatment while bystanders are within 30 feet of the animal.
- Do not apply to any animals in or within 10 feet of bodies of water.
- Do not leave intact capsules in the field.
- Do not allow farm dogs or other farm animals to come in contact with the pesticide or residues.

SmartVet ™ is designed for use with only a compatible applicator device that carries the "Approved VetCap Application Device" label. Using any other applicator device or method could result in ineffectiveness and or cause harm or injury.

How to Apply: Apply the capsules to the middle of the side of the animal’s body, anywhere between the front shoulders and 6 inches ahead of the base of the tail.

Amount to use: Apply AM-L at the dosage shown on the following chart. Care must be taken to apply the correct dosage.

Horn Flies, Face Flies, Biting Lice and Sucking Lice

</table>

AM-L can be used on beef cattle of all ages provided they are greater than 600 lbs. For flies. Treatment is effective up to 2 weeks and the product is not more effective than once every 2 weeks and do not apply more than once every 6 months within any 6-month period. For optimal fly control, an initial application followed by a second treatment 2 weeks later is recommended. AM-L does not control cattle grubs.
