PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. May cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves (PVC or nitrile) when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or public waters unless in accordance with the requirements of the National Pollutant Discharge Elimination Systems (NPDES) permit and the Permitting Authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross fill such as feces, urine, etc. or with ammonia, acids, detergents or other chemicals will release hazardous gases irritating to the eyes, lungs and mucous membranes.

STORAGE AND DISPOSAL: PESTICIDE STORAGE: Store in a cool, dry area away from direct sunlight. In case of spill, flood area with large quantities of water.

PESTICIDE DISPOSAL: Product or rinsates that cannot be used should be diluted with water and disposed of in a sanitary sewer. CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. The Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¾ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke. Do not contaminate food or feed by storage, disposal or cleaning of equipment.

BC-50

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

ACTIVE INGREDIENT: % BY WT.
SODIUM HYPOCHLORITE 12.5%
INERT INGREDIENTS 87.5%
TOTAL 100%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

IF IN EYES
• Hold eye open and rinse slowly and gently with water for 15-30 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing the eye.
• Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING
• Take off contaminated clothing and wash before reuse.
• Rinse skin with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
• Get 2 full glasses of water or other non-alcoholic liquid.
• Call a poison control center or doctor immediately for treatment.
• Have person take a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

SWIMMING POOL WATER DISINFECTION
For a new pool or spring start-up, superchlorinate with a 50 to 104 oz. of product for each 10,000 gallons of water. Maintain 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with the test kit. Adjust and maintain pool water pH to be between 7.2 and 7.8. Adjust and maintain the alkalinity of the pool to between 100 to 150 ppm.

To maintain the pool, add manually or by a feeder device 11 oz. of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 to 1.5 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 1.5 ppm available chlorine. Test the pH, available residual chlorine and alkalinity of the water frequently with appropriate test kits, frequency of water treatment will depend upon temperature and number of swimmers. Every 7 days, or as necessary, superchlorinate the pool with 50 to 104 oz. of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Do not reenter pool until the chlorine residual is between 1.0 to 3.0 ppm.

At the end of the swimming pool season or when water is to be drained from the pool, chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate the pool 24 hours prior to draining.

WINTERIZING POOLS—While water is still clear & clean, apply 3 oz. of product per 1000 gallons, while filter is running, to drain a 2 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter and heater components for winter by following manufacturer’s instructions.

DISINFECTION OF DRINKING WATER (PORTABLE)
PUBLIC SYSTEMS: Mix a ratio of 1 oz. of this product to 100 gallons of water. Begin feeding the dosing system with a hypochlorinator until a free available chlorine residual of at least 0.2 ppm and no more than 0.6 ppm is attained throughout the distribution system. Check water frequently with a chlorine test kit. Scaled sample collection must be taken at a frequency determined by the National Primary Drinking Water Regulations, Contact your Local Health Department for further details.

INDIVIDUAL SYSTEMS: DUG WELL. Upon completion of casing (lining) wash the interior of the casing (lining) with a 100 ppm available chlorine solution using a stiff brush. This solution can be made by thoroughly mixing 1 oz. of this product into 10 gallons of water. After covering the well, pour sanitizing solution into the well through both the pipes opening and the pipe line. Wash the exterior of the pump cylinder also with the sanitizing solution. Start pump and pump water until strong odor of chlorine is noted. Stop pump and wait at least 24 hours. After 24 hours flush well until all traces of chlorine are gone. Contact your Local Health Department for further details.

NOTE: This product degrades with age. Use chlorine test kit and increase dosage if necessary to obtain the required level of available chlorine.

In CASE Of An EMERGENCY, CALL CHEMTEC AT 1-800-424-3360
