CAUTION
Read the entire label before using this product.

- This labeling must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

DIRECTIONS FOR USE
Refer to product label for General Use Precautions, Mixing and Application instructions.

| WATERMELONS (57) | 1/2 - 3/4 | Apply uniformly with ground equipment in a minimum of 20 gallons of water per acre.
| Direct-seeded: (Bare ground) | Preemergence - Apply SANDEA after planting, but prior to soil cracking. Use the lower rate on lighter textured soils with low organic matter. Where soil is fumigated prior to planting, allow at least five days after soil fumigation before an application of SANDEA.
| | Do not apply more than 1 oz of SANDEA per acre per crop-cycle, not to exceed 2 oz per acre per 12-month period (includes applications to the crop and to row middle).
| | Consult “Use Precautions” and “For Optimum Results” sections for important usage information.
