Kitchens*** and Bath Wipes for Hard, Non-Porous Surfaces Cleans, Deodorizes and Kills Common Household Germs

**A thorough rinse with potable water is required for surfaces in direct contact with food.

Dispenser DIRECTIONS:

To start: wet, remove cover and discard flip. From center of towelette roll, pull out a towelette corn. Twist it a point and thread it through the hole in the container cover. Pull out about one inch. Replace cover. Pull out first towelette and tear off a 60° angle. Remaining towelettes feed automatically, ready for next use. When not in use, keep cover closed to prevent solution loss.

Cleaning INSTRUCTIONS:

Use one MaxiWipe LA towelette to completely clean and disinfect surfaces. For use as a disinfectant: Use one MaxiWipe LA towelette to thoroughly wet the surface. Repeated use of the product may be required to ensure that the surface remains visibly wet for 2 minutes at room temperature (68°F/20°C).

MaxiWipe LA effectively kills Human Immunodeficiency Virus Type 1 (HIV), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV) on precontaminated environmental surfaces/objects previously soiled with visible body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects can be associated with the potential for transmission of HIV, HBV and HCV.

MaxiWipe LA effectively kills Mycobacterium tuberculosis var. bovis (BCG), Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella enterica, Trichophyton mentagrophytes, Methicillin Resistant Staphylococcus aureus (MRSA), Vancomycin Resistant Enterococcus faecalis (VRE), Staphylococcus aureus with Reduced Susceptibility to Vancomycin, Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).

MaxiWipe LA is effective against the following microorganisms on hard, non-porous surfaces when used as directed:

- **Mycobacterium tuberculosis var. bovis**
- **Staphylococcus aureus**
- **Pseudomonas aeruginosa**
- **Salmonella enterica**
- **Trichophyton mentagrophytes**
- **Methicillin Resistant Staphylococcus aureus (MRSA)**
- **Vancomycin Resistant Enterococcus faecalis (VRE)**
- **Staphylococcus aureus with Reduced Susceptibility to Vancomycin**
- **Hepatitis B Virus (HBV)**
- **Hepatitis C Virus (HCV)**
- **Hepes Simplex Virus Types 1 and 2**
- **Human Immunodeficiency Virus (HIV-1)**
- **Influenza A2 Virus**

ACTIVE INGREDIENTS:

- Disinfectant wipes consisting of a 2% (w/w) solution of nonylphenoxietoxyethyl dimethyl benzyl ammonium chloride.
- Iodopropynol.

INERT INGREDIENTS:

- Butyl Methacrylate
- Total: 100.00%

Does not include the weight of the dry towelette.

KEEP OUT OF REACH OF CHILDREN

CAUTION:

See other panel for additional precautionary statements.

Net Contents: 65 Pre-Saturated Towelettes (9" x 12")

Net Weight: 12 x 2 lb. 1 oz. Canisters/Case

65 Pre-Saturated Towelettes (9" x 12")

Net Weight: 2 lb, 1 oz.

Special Instructions for Cleaning and Decontamination Against HBV, HCV, and HIV on Surfaces or Objects S偶iled With Blood or Body Fluids:

**Personal Protection:** When using this disinfecting towelette, wear appropriate barrier protection such as disposable protective gloves, protective gowns, face mask, and eye covering.

**Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this disinfecting towelette. A MaxiWipe LA towelette can be used for this purpose.

**Contact Time:** Thoroughly wet surface with a new MaxiWipe LA towelette. Discontinued use of the product may be required to ensure that the surface remains visibly wet for 2 minutes. This contact time will not be sufficient for some of the organisms listed on the label. Refer to label for contact time against other organisms.

**Disposal of Infectious Materials:** Cleaning materials used that may contain blood or other body fluids must be autoclaved and disposed of in accordance with Federal, State and local regulations for infectious materials disposal.

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that is (1) introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or enters normally sterile areas of the body. This product may be used to prepare or decontaminate critical or semi-critical medical devices prior to sterilization/high-level disinfection.

**PRECAUTIONARY STATEMENTS:**

**Hazards to Humans and Domestic Animals:**

**CAUTION:** Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

**KEEP OUT OF REACH OF CHILDREN**

See other panel for additional precautions.
DO NOT USE AS A BABY WIPE. Not For Use On Skin.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

MaxiWipe LA Disinfecting Towelettes are non-woven disposable towelettes intended for use on hard, non-porous surfaces in health care settings such as hospitals, emergency medical settings, neonatal units, surgical centers, isolation areas, out-patient surgical centers, nursing homes, dental offices, ophthalmic offices, eye surgical centers, patient care areas, dialysis centers, donation centers (blood, plasma, semen, milk, urine), veterinary facilities, salon settings, emergency vehicles, correctional facilities, schools, health club facilities, tanning salons, kitchens**, non-food contact surfaces in food preparation areas**, bathrooms, day care centers, police and fire vehicles, cadaver processing areas, laundry rooms, and other critical care areas where control of cross contamination between treated surfaces is required.

MaxiWipe LA will clean and disinfect, when used as directed, such items as interior and exterior surfaces of infant incubators, bassinets, cribs and warmers, infant/childcare equipment surfaces, diaper changing stations, oxygen hoods, operating room tables and lights, laboratory equipment and surfaces, physical therapy equipment surfaces, ambulance equipment surfaces, slitt lamps, hard, non-porous exterior surfaces of ultrasound transducers or probes, exam tables, gurneys, IV poles, dental unit instrument trays, operator light switches, exterior surfaces of amalgamators and dental curing lights, exterior surfaces of anesthesia machines and respiratory therapy equipment, SilkPed™ with Dermallusion™, workstations, dental counter tops, loupes, exterior surfaces of endodontic equipment, such as apex locators, pulp testers and motors, stools, nail/hair care implements, tanning beds, salon surfaces, non-food contact surfaces**, exterior surfaces of refrigerator units**, exterior surfaces of appliances such as refrigerators, microwaves, food processors and stoves**, vanity tops**, floors, walls, handrails, door knobs, bed railings, tables, chairs, bathroom fixtures, exterior toilet surfaces, garbage cans, keyboards, carts, shopping carts, weight-lifting surfaces, drained whirlpool tank surfaces, cabinets, lights, telephones, which are made of plastic (i.e., polycarbonate, polypropylene, polyvinyl chloride, polystyrene), and use sites listed on this label consisting of non-porous vinyl, stainless steel, painted surfaces, Plexiglas®, Formica® and glass.

Kitchen** and Bath Wipes for Hard, Non-Porous Surfaces Cleans, Deodorizes and Kills Common Household Germs

**A thorough rinse with potable water is required for surfaces in direct contact with food.

Dispenser Directions

To start feed, remove cover and discard seal. From center of towelette roll, pull up a towelette corner, twist it into a point and thread it through the hole in the container cover. Pull through about one inch. Replace cover. Pull out first towelette and tear off at a 90° angle. Remaining towelettes feed automatically, ready for next use. When not in use, keep cover cap closed to prevent solution loss.

Cleaning Instructions:

Use one MaxiWipe LA towelette to completely pre-clean surface of all gross debris. For use as a virucide*, including HIV-1, HBV and HCV applications and effectiveness Against Methicillin Resistant Staphylococcus aureus (MRSA), Vancomycin Resistant Enterococcus faecalis (VRE) and Staphylococcus aureus with Reduced Susceptibility to Vancomycin: Use a second MaxiWipe LA towelette to thoroughly wet the surface. Repeated use of the product may be required to ensure that the surface remains visibly wet for 2 minutes at room temperature (68°F/20°C).

For use as a disinfectant:

Use a second MaxiWipe LA towelette to thoroughly wet the surface. Repeated use of the product may be required to ensure that the surface remains visibly wet for 3 minutes at room temperature (68°F/20°C) for Tuberculosis activity and effectiveness against Staphylococcus aureus, Pseudomonas aeruginosa, Trichophyton mentagrophytes and Salmonella enterica.

To disinfect external surfaces of ultrasound transducers:

Pre-clean ultrasound gel from external transducer to be disinfected. Then thoroughly wet the probe with a MaxiWipe LA towelette. Repeated use of the product may be required to ensure that the surface remains visibly wet for 5 minutes at 20°C.

MaxiWipe LA effectively kills Human Immunodeficiency Virus Type 1 (HIV-1), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV) on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of intimate surfaces/objects with blood/body fluids, and in which the surfaces/objects can be associated with the potential for transmission of HIV-1, HBV and HCV.
