DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barriers or otherwise enter normally sterile areas of the body.

CLEANING: Use one or more wipes, as necessary, to wet surface sufficiently and to thoroughly clean the surface.

DISINFECTING: To disinfect hard, non-porous surfaces, use one or more wipes, as necessary, to thoroughly wet the surface to be treated. Treated surface must remain visibly wet for one minute to achieve complete disinfection of all pathogens listed on this label. For visibly soiled surfaces, clean before following disinfecting instructions. Allow surfaces to air dry. For surfaces that may come in contact with food, a potable water rinse is required.

DISPELLING INSTRUCTIONS:
To Dispense Wipes: Open lid, remove entire cover, remove and discard seal. From center of wipes roll pull up a corner of the wipe, twist it and thread it through the hole in the container cover. Pull through about one inch. Replace cover tightly. Pull out first wipe and tear off at a 45° angle. Remaining wipes feed automatically, ready for next use. When not in use, keep the tip of the exposed wipe inside the well in the cover, and the lid snapped closed.
