1. Make sure the hose-end sprayer is firmly connected to the hose.
2. Make sure the sprayer is in the OFF position.
3. To apply product, turn the control valve to the ON position. Water and product are now being mixed at the proper rate.

LAWNS AND TURFGRASS (domestic lawns & recreational areas): To control ants, armyworms, centipedes, chiggers, chinch bugs, crickets, cutworms, earwigs, fleas, grasshoppers, mosquitoes, sod webworms, sowbugs and ticks, spray when pests first appear. For sod webworms, delay watering or mowing the treated area for 12 to 24 hours after treatment. Spray grass starting at the edge of the lawn furthest from the faucet. Walk backwards away from spray mist toward faucet. This avoids contact of shoes and hose with treated grass. Always point sprayer away from body. Use when wind is calm to avoid splash back. Do not spray on a windy day. Sweep sprayer left and right to ensure an even coverage. Apply entire contents evenly over 1000 square feet of lawn.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to fresh water and estuarine fish and invertebrates. Do not apply directly to water. This product is highly toxic to bees exposed to direct treatment or residues on blooming corps or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

PHYSICAL HAZARDS
Do not use water-based sprays of product in conduits, motor housings, junction boxes, switch boxes or other electrical equipment because of possible shock hazard.

GENERAL INFORMATION:
This product is designed for use in typical spray equipment, such as a hand pump-up sprayer, spray bottle or hose-end sprayer.

HOSE-END SPRAYER USE DIRECTIONS:
Mixing Instructions: Fill sprayer bottle halfway with water, then add 8 tablespoons of product. Add water to fill bottle. Shake well. Attach to your garden hose and follow these simple instructions:
1. Make sure the hose-end sprayer is firmly connected to the hose.
2. Make sure the sprayer is in the OFF position. Turn water supply on at the faucet. For best results, turn hose faucet to maximum. Water pressure will build in the hose.
3. To apply product, turn the control valve to the ON position. Water and product are now being mixed at the proper rate.

Spray Equipment Use Directions:
For best results, spray from a distance of at least 6 feet. Do not spray in or near pools, ponds, streams, rivers as this product is toxic to aquatic life. Do not spray food crops. DO NOT spray plants in bloom or on calm days. DO NOT spray near streams or rivers. Before spraying, test to make sure this product is safe on your plants. Spraying on blooming crops or weeds if bees are visiting the treatment area.

This product is extremely toxic to fresh water and estuarine fish and invertebrates. Do not apply directly to water. This product is highly toxic to bees exposed to direct treatment or residues on blooming corps or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.
DIRECTIONS FOR USE

Before applying this product, read and follow all directions on product label. Do not handle this product when pregnant. Keep out of reach of children. In case of contact with skin or eyes, wash thoroughly with water. In case of ingestion, do not induce vomiting. Consult a physician immediately. Store in original container out of the reach of children.

DILUTION CHART

For Perimeter Pests:

<table>
<thead>
<tr>
<th>Amount of Product per</th>
<th>Amount of Product per</th>
<th>Amount of Product per</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/2 Gallon of Water</td>
<td>1/4 Gallon of Water</td>
<td>1/8 Gallon of Water</td>
</tr>
<tr>
<td>5 tbsp</td>
<td>2 1/2 tbsp</td>
<td>1 1/4 tbsp</td>
</tr>
</tbody>
</table>

Ants, army ants (including fall, yellow-striped, etc.), bear tick, billbugs (adult), black legged tick, borer bugs, brown dog ticks, centipedes, chiggers, chinch bugs, earwigs, cockroaches, crickets, cutworms, dashing ground beetles, deer ticks, digger wasps, easter skippers, field crickets, feny skippers, flea beetles, fleas, grasshoppers, turf grass weevils, Japanese beetles (adult), lawn moths, leafhoppers, love star ticks, scorpion, silverfish, firebrats, sod webworms, sowbugs, spiders, spur bugs, springtails.

For Lawn Pests:

<tr>
<td>8 tbsp of 1 oz</td>
<td>4 tbsp of 1 oz</td>
<td>2 tbsp of 1 oz</td>
</tr>
</tbody>
</table>

Arms, bear ticks, black legged ticks, carpenter ants, centipedes, chiggers, crickets, deer ticks, field crickets, grasshoppers, pillbugs, scorpions, sowbugs, spiders, springtails.

Fire Ants: Mix 6.0 fl oz (3/4 cup) of product with one gallon of water in a watering can. Apply 1 gallon of diluted product per mound to thoroughly wet the area. Direct application at the mound and 12 inches around to allow solution to flow into ant tunnels. More or less than 1 gallon of dilution may be used depending on the size of the mound. Wait 7-10 days, then treat the mound again if necessary. Do not disturb mounds before treatment. Do not use pressurized sprays. For best results, apply in cool weather (60°- 80°F) or in early morning or late evening hours. Treat new mounds as they appear.

Fleas & Ticks: Mix 4.0 fl oz (4 tablespoons) of product in one gallon of water. Apply as a coarse, wet spray to areas where fleas and ticks are most likely to be found, such as dog houses, kennels, runways, cracks and crevices in sidewalks, paths or patios, under plants, shrubs, bushes, trees or other

To help prevent infestations of buildings, mix product with water in accordance with the Dilution Rate table and apply where pests are active and may find entrance. For example, treat a band of soil or lawn up to 6-10 feet wide around and next to buildings and treat the foundation to a height of 2 to 3 feet. Apply 1.0 gallon of diluted spray per 1000 sq ft of surface area. Thoroughly and uniformly wet the barrier area, but do not allow runoff to occur.
