PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER
Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, skin or clothing. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. This product may cause skin sensitization reactions in some people. Do not breathe vapor or spray mist. Wear goggles or face shield. Wear a mask or respirator approved by the National Institute for Occupational Safety and Health.

PERSONAL PROTECTIVE EQUIPMENT (PPE):
Mixer, blenders and other exposed to methylisothiazolinone products must wear:
- Long-sleeved shirt and long pants
- Chemical-resistant apron
- Chemical-resistant gloves
- Non-skid shoes

Discard clothing or other absorbent materials that have been drenched or heavily contaminated with the product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS
Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove personal protective equipment immediately after handling this product. Wash the outside of gloves before removing. As soon as possible wash thoroughly.

FIRST AID
IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the 8 minutes, then continue rinsing the eye.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.
- Have person sip a glass of water if able to swallow.

IF INHALED:
- Move person to fresh air.
- If person is not breathing call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

TROYGUARD® CM1.5

EPA Reg. No. 5383-103
EPA Establishment Number 5383-NJ-001

ACTIVE INGREDIENT: ................................. % Weight
5-Chloro-2-Methyl-4-isothenzolin-3-one .................. 1.14%
2-Methyl-4-isothenzalin-3-one ......................... 0.36%
INERT INGREDIENTS: .............................. 98.50%
TOTAL: .................................................. 100.0%

ENVIRONMENTAL HAZARDS
This chemical is toxic to terrestrial and aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Troyguard® CM1.5 is a microbicide that is effective against bacteria, yeasts, and molds. It is used as an industrial microbiocide for adhesives, building materials, pigment dispersions, emulsions, paints and coatings.

Troyguard® CM1.5 is used to control bacteria and fungi in dispersed pigments such as kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, and magnesium silicate used in paint and paper production. Typical emulsions include printing components (inks, resins, waxes, and surfactants). Building materials include mastic, caulk, joint cements, spackling, plaster and stucco. Use as an in-can preservative in paints and coatings.

It is best if Troyguard® CM1.5 is added to the initial phase of production; however, if excessive temperatures or pH values occur, addition at the end of the manufacturing process is recommended. Typical usage rates are 0.05-0.04% (0.05-0.40 lbs per 100 lbs of formulation) based on the total weight of the formulation.

For Household, Industrial and Janitorial products use 0.05-0.15% (0.5-1.5 pounds per 1000 lbs.

Do not apply this product in a way that will contact workers or other persons.

The control of slime-forming and sulfate reducing bacteria in oil and gas field systems, including enhanced recovery injection fluids, drilling, fracturing and completion fluids, slug treat with 7-15 ppm depending on the severity of contamination. This product may be used for terrestrial and offshore oil drilling and producing fluids. Initial dose 1.5-2.0ppm. Add 4-8 gpm 0.5-1.0 gpm 0.1-0.2 1.0-2.0 pounds per 1000 barrels of water at a point in the system where it will be uniformly mixed. Repeat treatment after three days or as needed until control is achieved. Subsequent dose: Add 2.5-14 ppm 0.22-1.25 pounds per 1000 barrels of water every 7 days or as needed to maintain control.

Keep OUT OF REACH OF CHILDREN

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store between 32°F (0°C) and 90°F (32°C) and is recommended.

PESTICIDE DISPOSAL: Pesticide wastes are of great concern. Improper disposal of excess pesticides, spray mixtures, or residue is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State pesticide or environmental control agency or the hazardous waste representative at the nearest EPA regional office for guidance.

CONTAINER DISPOSAL: Nonrefillable containers. Do not reuse or refill container.

Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or into a tank. Fill the container 1/4 full with water. Replace and close closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end or tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. This procedure two more times. Then offer for recycling and reconditioning if available, or purge and dispose of in a sanitary landfill or incineration, or, if allowed by state or local authorities, by burning. If burned, store out of reach.
