Precautionary Statements

Hazardous to Humans and Domestic Animals

CAUTION: Harmful if ingested through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the bathroom. Remove and wash contaminated clothing before reuse.

DO NOT USE ON CATS OR KITTENS. Use only on adult dogs. Do not apply to puppies under 6 months of age. Consult a veterinarian before applying this product on medicated, dehydrated, aged, pregnant, or nursing dogs. Sensitivities may occur after using any pesticide product for pets. If signs or symptoms occur, bathe your dog with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

This product contains a combination of ingredients that provide rapid knockdown and kill of the treated insect. This highly effective water-based formula can be used on dogs.

The combination of ingredients in this product kills adult fleas and ticks on contact. The first active ingredient is the botanical, Pyrethrins, an extract of a Chrysanthemum flower, which provides effective insecticide and quick-kll of listed insects. The second active ingredient is Permethrin, a synthetic pyrethroid, which gives residual long term control of fleas. The third active ingredient is Pesticide, the insect growth regulator which inhibits the development of the immature stages of the flea for 7 months preventing them from reaching the adult stage. This is similar to insect growth hormones that occur naturally in insects.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labelling. READ ENTIRE LABEL BEFORE EACH USE.

Precautions and Restrictions: Do not use on cats or kittens. Do not apply to puppies under 6 months of age. Do not apply this product in a manner that will contaminate other, either directly or through drift. Do not allow children or adults to enter until sprays have dried. Do not use treated article until spray has dried.

For use on dogs: Spray animal with spray nozzle about 4-12 inches from the body. Start spraying animal at the tail, making sure to spray entire coat of the animal, including legs, tail, and underbelly. With your hand, fluff coat against the direction you are spraying to ensure the spray penetrates to the skin. Refer to chart above to apply the appropriate amount of product to animal. Do not exceed the maximum number of pumpray applications for animals body weight: Do not saturate the animal and do not use in face or on cycloids. Apply no more than once every 14 days (every 2 weeks).

For use in dog areas: Treat dog bedding and other pet resting places, as there may be hiding areas for fleas and ticks; no need to remove pet bedding after treatment. To reduce infestation, spray around sleeping areas, basements, window and door frames, wall cracks, local areas of flies, and other resting places until the surface is slightly moist. Also spray the entire inside surface of dog houses and kennels. Do not allow pets to use treated areas until completely dry.

For best results, protect your pet apparel and to minimize reinfestation of adult fleas from outdoors, use a registered flea and tick product on the dog and flea and tick collar, pet powder, flea spray, pet dip, pet shampoo, flea or tick and pet shampoos.

Storage and Disposal

Do not contain any water, food, or feed by storage and disposal. Pesticide Storage: Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food. Pesticide Disposal and Container Handling - Nonrefillable container: Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
