INERT INGREDIENTS .................................. 10.8%
Total ................................................................ 100.0%

*Equivalent to 0.8% (butycarboxyl) (6-propylpiperonylethyl) ether and 0.2% related compounds.

KEEP OUT OF THE REACH OF CHILDREN
CAUTION
FIRST AID
Call a Poison Control Center or doctor immediately for treatment advice.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.

IF IN EYES:
• Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.

Have the product container label with you when calling a Poison Control Center or doctor, or going for treatment.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

DIRECTIONS FOR USE
"READ ENTIRE LABEL BEFORE EACH USE"
"USE ONLY ON DOGS, CATS, THEIR BEDDING, PREMISES OR RUNS"

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

"DO NOT USE ON ANIMALS UNDER 12 WEEKS OLD"

FLEAS, TICKS, AND LICE: Lightly work the material into the hair of the animal. Use brush/comb to work material down to the skin. Pay strict attention to places where the animal cannot reach, such as the scalp. Dust the ears of the animal with care. Individual ticks observed on the animal should be dusted thoroughly. Do not reapply product for 30 days. "Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing animals or animals on medication. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with a mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately."

ANIMAL BEDDING: Dust the animal's bedding and areas where the animal sleeps, as well as cracks and crevices adjacent to them. Repeat once a month if necessary.

PREMISE APPLICATION: For animals confined to a specific area infested with fleas and ticks, dust the entire area with PERMA-GUARD PET INSECTICIDE.

DRY APPLICATION: Cover the affected area at the rate of 8 oz. to 16 oz. per 1,000 sq. ft.

FOR LARGE APPLICATION AREAS: The use of any hand applicator designed for the purpose of discharging powder will work. If using a small lawn fertilizer spreader, mix equal parts of dry sand with PERMA-GUARD PET INSECTICIDE for even flow. Dust thoroughly the first time and then re-apply every 4 months if necessary.

FOR WET APPLICATION: PERMA-GUARD PET INSECTICIDE can be mixed with water at the rate of 2 ounces per quart of water (one ounce is about 8 level teaspoons). To help keep it in suspension, add one teaspoon of a mild detergent, and agitate the sprayer now and then while applying.
