<tbody>
<tr>
<td>Have the product container or label with you when calling a poison control center or doctor, or going for treatment.</td>
</tr>
<tr>
<td>IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.</td>
</tr>
<tr>
<td>IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.</td>
</tr>
<tr>
<td>IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.</td>
</tr>
<tr>
<td>IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.</td>
</tr>
<tr>
<td>NOTE TO PHYSICIAN: Reversible mucosal damage may contraindicate the use of gastric lavage.</td>

ACTIVE INGREDIENT:
Allyl (50% C14, 40% C12, 10% C16) dimethyl benzyl ammonium chloride 40.0%

INERT INGREDIENTS: 60.0%

TOTAL: 100.0%

Product weighs 8 lbs./gallon

NET CONTENTS 1 GALLON (3.78 L)
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. KEEP OUT OF REACH OF CHILDREN. Corrosive. Causes reversible eye damage and skin burns. Harmful if inhaled. Avoid breathing vapor or spray mist. Harmful if swallowed. Do not get into eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield, or safety glasses), rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD: This product is toxic to fish.

PHYSICAL OR CHEMICAL HAZARDS: Do not use or store near heat or open flame. Do not mix with oxidizers, soap or anionic detergents or other water treating chemicals.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Do not use water containing residues from use of this product to irrigate crops for food or feed. This product requires no special equipment for treating swimming pool water. The correct use dilution may be added directly to the pool in any spot or added to the water circulation equipment. This product works best when added by itself directly to pool water.

INSTRUCTIONS FOR USE WITH HALOGEN BASED POOL SANITIZERS

This product is formulated to complement most swimming pool sanitizers. When using other products outlined in directions for this product, always follow directions on those products. This product is effective against the growth of algae. This product is effective in controlling the growth of the following types of algae: Chlorella pyrenoidosa (green algae), Phormidium iridium (blue-green algae) and Phormidium nitzschi. This product is efficient and non-staining when used as directed. This product will not evaporate and its algae lighting abilities actually increase as pool water temperature increases.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturers' directions. Adjust pH to between 7.2-7.6. Adjust chlorine residual to 1-3 ppm. In a chlorine treated pool, add stabilizer to establish a minimum level of 400 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Check for metals and if present add a stain and scale inhibitor to prevent staining of pool surface due to metals. Check chlorine residual and adjust to 1-3 ppm. Maintain sanitizer residual in accordance with label directions found on your sanitizer of choice. Ensure that water quality conditions are maintained for the successful use of the product.

DOSAGES - For pools which are free of algae or contain algae growth.

Initial Application: Backwash the filter thoroughly. Vacuum algae debris and thoroughly brush pool. For an initial application, pour directly into pool at a rate of 32 oz. of this product per 50,000 gallons of water (2 ppm) or ratio thereof. Add this product directly into pool by pouring around entire outside perimeter of pool.

Maintenance: Pour directly into pool at a rate of 8 oz. per 50,000 gallons of water (0.5 ppm) every 5-7 days depending on weather and pool factors. After each rain of consequence, add 8 oz. per 50,000 gallons of water. Even when the pool may not be in use for periods of time, algaeicide additions must be made since a heavy accumulation of algae growth is difficult to remove. The appropriate amount of this product must be added by pouring a portion of the specified amount into several areas of the pool and the required quantity has been added. Recirculation accomplished by running the filter will assure rapid dispersal of product. Swimmers are allowed to re-enter the pool 15 minutes after maintenance rate of product is applied.

Booster Application: Add 4 oz. of this product per 25,000 gallons of water after a heavy or prolonged rainfall or when there is a heavy bathing load.

The above directions must be followed even when the pool is not in use. If algae growth is noticeable, apply initial dose.

Vacation Treatments: When you are going to be away for one week or more add 6.4 ounces of this product per 10,000 gallons of water for each week unattended. Pour product around the edges of the shallow end of the pool, if shock is also being applied is the deep end of pool.

FOR WINTERIZING POOLS BEFORE FREEZING (not applicable in California)

Test the water and adjust to the proper levels. After pool is no longer in use, super-chlorinate, using a recommended winter shock treatment, according to label directions. Allow pump to circulate for several hours or overnight.

Add winterizing algicide directly to pool water, walking around the pool, so that it is evenly distributed. Use at the rate of 32 ounces (6.7 ppm) per 15,000 gallons. Allow to circulate for a few hours.

Clean pool water line, shut down filter, drain pump, and winterize as per manufacturers' instructions. Cover with a solid cover if possible. Pools without a solid cover may need a second treatment later in the non-swimming season.

RIDGEWAYS FOR USE IN SPAS

Dose: Add 2.2 ounces of this product per 5,000 gallons of water. Initial dose is used upon filling of spa.

Maintenance Dose: Add 0.8 ounces of this product per 5,000 gallons of water. Maintenance dose must be added at 3-5 day intervals. If high temperatures prevail or spa has unusually heavy use, add maintenance dose more frequently. Drain and clean spa at least once a month or as needed depending upon bather load.

TO DETERMINE POOL CAPACITY

Rectangular Pools: Length x width x half average depth in feet x 7.5 = gallons.

Round and Oval Pools: Long diameter x short diameter x average depth in feet x 5.9 = gallons.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Nonrefillable container. Store in original container in areas inaccessible to small children.

Keep from freezing. Do not reuse empty container. Triple rinse container after emptying. Wrap and discard in trash or recycle.

100% MONEY BACK GUARANTEE

We would like to hear from you with any complaints or suggestions. In the continental U.S. or Canada, you can call toll-free at 1-888-501-0332 from 8 a.m. to 5 p.m. CST Monday through Friday. You can also send us an email using the feedback icon on the Sam's Club.com.
