**STEP 1**

**BALANCE**

Member's Mark Quality Guaranteed Chlorinating Granules

99% ACTIVE INGREDIENT

**STEP 2**

**CHLORINATE**

CHLORINATING GRANULES FOR ALL POOLS & SPAS

- NOT BLENDED (NO FILLERS)
- KILLS BACTERIA AND CONTROLS ALGAE
- ELIMINATES CHLORINE ODOR
- 3-IN-1 SANITIZER, ALGAEICIDE AND SHOCK

**STEP 3**

**SHOCK**

Active Ingredient:
Sodium Dichloro-Disinfectant Hexahydrate 99%
Other Ingredients: 7%
Total: 100%
Available Chlorine: 15.5%

**STEP 4**

**ALGAEICIDE**

KEEP OUT OF REACH OF CHILDREN

DANGER

See back panel for additional precautionary statements and First Aid.

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE

CAUSES IRREVERSIBLE EYE DAMAGE

MAY BE FATAL IF INHALED

HARMFUL IF SWALLOWED OR ABSORBED THROUGH SKIN

Do not get in eyes, on skin or on clothing. Do not breathe dust, vapors or spray mist. Wear protective eyewear, respiratory face shield, or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using toothbrush or other mouth aids. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans, or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS

STRONG OXIDIZING AGENT: Use only dry chlorination. Mix only into water. Contamination with dirt, organic matter or other chemicals (including other pool chemicals) or any other foreign material may start a chemical reaction with generation of heat, liberation of hydrogen peroxide and possible generation of fire and explosion. Avoid any contact with fibers or burning material such as a lit cigarette. Do not use this product in any chlorinating device which has been used with any organics or unchlorinated chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

**FIRST AID**

IF IN EYES

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes then continue rinsing eyes.
- Call a poison control center or doctor for treatment advice.

IF INHALED

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING

- Take off contaminated clothing and wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

IF SWALLOWED

- Call a poison control center or doctor immediately for treatment advice.
- Have the product container or label with you when calling a poison control center, doctor, or going for treatment.

YOU MAY ALSO CONTACT 1-800-420-9236 FOR EMERGENCY MEDICAL TREATMENT INFORMATION.

NOTE TO PHYSICIAN

Probable mucosal damage may contaminate the use of gastric lavage.
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool disinfecting agent. The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system. Some of the factors that will vary the required dosages are water temperature, bather load, exposure to wind-driven debris, thunder or rain storms and length of filtration cycle.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. Add stabilizer to establish a minimum level of 30-40 ppm to reduce degradative effects of sunlight upon the chlorine residual. Check for metals. Before using this product, add stain and scale inhibitor to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, always follow directions on those products.

With pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1.3 ppm chlorine is established as determined by the use of a test kit. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool. NEVER ALLOW UNDISCLOSED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1.3 ppm available chlorine in the pool water. An average daily dose requirement is 2.3 oz. of this product per 10,000 gallons of water. After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.

FOR SUPERCHLORINATION: Broadcast one pound of this product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. NEVER ALLOW UNDISCLOSED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. In water temperatures less than 70°F, or as an alternate application procedure, pre-disolve this product prior to applying evenly to the deep end of the pool. Disolve this product outdoors, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water; NEVER add water to product. NEVER add more than 1 pound of this product to 3 gallons of cool water. Do not mix with other products when pre-disolving.

REENTRY: Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine due to risk of bodily harm.

FOR SWIMMING POOL ALGAE: When used as directed, this product kills algae and will rid your pool of unattractively green algae spots. This product is ideal for use in vinyl-lined, fiberglass or polymer coated pool surfaces.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. Check for metals and if present, add stain and scale inhibitor to prevent staining of pool surface.

When using other products as outlined in the directions for this product, follow directions on those products.

Before using the product, broadcast all surface-acting agent as directed. After brushing, allow algae to soak special attention to algae along skimmer and light areas. At night, or when pool is not in use, broadcast this product directly into the deep end of the pool with pump running. Use two pounds per 10,000 gallons for medium to heavy algae growth and one pound per 10,000 gallons for light algae growth. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. Brush any remaining algae and clean backwash filter. If algae is still visible, repeat treatment.

FOR WINTERIZING POOL: To avoid costly spring problems (algae, stains, cloudy water, high chlorine demand) properly prepare your pool for the winter using this product. This product oxidizes organic wastes, provides long lasting chlorine protection, helps keep pool surfaces clean, and helps protect water during the off season months.

NOTE: For WHITE PLASTER POOLS, broadcast this product directly into the pool water. FOR VINYL, FIBERGLASS, PAINTED AND COLORED PLASTER POOLS, PRE-DISOLVE THE RECOMMENDED DOSE.

Dissolve this product outdoors, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water; NEVER add water to product. NEVER add more than 1 pound of this product to 3 gallons of cool water. Do not mix with other products when pre-disolving.

Before treating the pool, chemically balance the water and adjust pH to 7.4-7.6. Brush and vacuum the pool. Backwash the filter and clean skimmer, pump baskets, and filter.

Sprinkle the powder or pour the pre-disolved treatment directly into the pool water. FOR VINYL, FIBERGLASS, PAINTED AND COLORED PLASTER POOLS, PRE-DISOLVE THE RECOMMENDED DOSE. Use one pound of this product per 10,000 gallons of water.

Circularize water for several hours, and then apply a wintertizing algicid treatment following appropriate directions. Cut off pump. Drain equipment or add swimming pool antifreeze to equipment to prevent freezing damage. Install pool cover. A second treatment of the product in mesh covered or non-covered pools may be required prior to water freezing (mid-winter). If second treatment is required, re-disolve treatment (see NOTE above) and pour along edges of the pool.

FOR SPA AND HOT TUB DISINFECTANT: When used as directed, this product is effective as a spa and hot tub water disinfecting agent. Ensure all spa and hot tub equipment is working properly. Backwash/clean the filter system following manufacturer's directions. Adjust pH to between 7.2-7.6. When using other products as outlined in the directions for this product, always follow directions on those products.

MAINTENANCE DOSES: With pump on, add 1/2 teaspoon of this product per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as an initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3-5 ppm of available chlorine is established as determined by test kit. A test kit must be used regularly to determine the frequency of additional doses of this product needed to maintain the chlorine residual of 3-5 ppm.

SUPERCHLORINATION: Use one teaspoon of this product per 100 gallons of water (or 1/4 cup per 1,000 gallons). Superchlorination may be needed on a weekly basis in a heavily used spa or as infrequently as once a week in a moderately used spa.

REENTRY: Reentry into treated spas and hot tubs is prohibited above levels of 3 ppm of chlorine due to risk of bodily harm.

HOW TO CALCULATE POOL CAPACITY

<table>
<thead>
<tr>
<th>SHAPE OF POOL</th>
<th>GAL OF WATER (DIMENSIONS IN FEET)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rectangular</td>
<td>Average depth x average length x average width x 7.5</td>
</tr>
<tr>
<td>Circular</td>
<td>Diameter x diameter x average depth x 5.9</td>
</tr>
<tr>
<td>Oval with straight sides</td>
<td>Full width x full length x average depth x 6.7</td>
</tr>
<tr>
<td>Irregular</td>
<td>Consult pool builder</td>
</tr>
</tbody>
</table>

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet roofs. In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. Oxidizing material. Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or re Fill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling, if available. EMERGENCY HANDLING: In case of contamination or decomposition do not reseal container. If possible, isolate container in open, well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area.

WARRANTY

Seller warrants that this product conforms to the chemical description and is reasonably fit for the purposes stated on the label when used in accordance with label directions under normal conditions of use. But to the extent consistent with applicable law neither this warranty nor any other warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.

100% MONEY BACK GUARANTEE

We stand behind this from you with any comments or suggestions. Do the following:
U.S. or Canada, you can call us toll free at 1-800-301-8332 from 8 a.m. to 5 p.m. CST Monday-Friday, locate your authorized reseller, or email us using the feedback form on SanChlor.com.

WARNING

AVISO

Children can fall into bucket and drown. Keep children away from bucket with even a small amount of liquid.
Los niños pueden caerse a esta cubo y ahogarse. No deje que los niños se acerquen a este cubo aunque sólo contenga una pequeña cantidad de líquido.
