ClearView™ Poly Power 60 is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot tubs, and decorative fountains.

**Swimming Pools, Heated Swimming Pools, Exterior Whirlpools, and Hot Baths**
For maximum effectiveness of Poly Power 60 in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using Poly Power 60. For pools having just visible algae growth, add an initial dose of 11-17 fluid ounces of Poly Power 60 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 6-11 fluid ounces of Poly Power 60 per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 2-4 fluid ounces of Poly Power 60 per 10,000 gallons of water must be made every 5-7 days after the initial treatment. Uniform distribution of Poly Power 60 throughout the water in the pool is necessary for maximum effectiveness. Poly Power 60 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Poly Power 60 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Poly Power 60 with concentrated dry or liquid chlorine products.

**Decorative Fountains**
Poly Power 60 is used to control the growth of algae in decorative fountains. Systems containing heavy growths of algae must be manually cleaned prior to treatment. Fountains with just visible algae growth require an initial dose of 1.0-2.0 fluid ounces of Poly Power 60 per 1000 gallons of water in the system. To treat a freshly cleaned and filled fountain, add 0.5-1.5 fluid ounces of Poly Power 60 per 1000 gallons of water. If maintenance dosages of 0.2-0.5 fluid ounces of Poly Power 60 per 1000 gallons of water must be added every 5-7 days as needed. Additions of Poly Power 60 should be made at a point to ensure uniform distribution throughout the system. Poly Power 60 may be used in fountains treated with chlorine chemicals, but do not mix Poly Power 60 with concentrated dry or liquid chlorine products.

**Storage and Disposal**
DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

**Residential Use**
Keep container closed when not in use. Store in an area inaccessible to children and persons unfamiliar with its use. Leaking or damaged containers must be placed in a plastic bag and discarded in the trash. Mop up spills with clean water. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If not, discard in trash. PESTICIDE STORAGE: Spills must be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**Container Handling**
Nonrefillable container. Do not reuse or refill. Triple rinse (or equivalent), then offer for: recycling or reconditioning, or puncture and dispose in a sanitary landfill, incineration, or, if allowed by state and local authorities, burning if burned, stay out of smoke.

**Product Labeling**
ClearView Poly Power 60 is identified as a toxic material under the Occupational Safety and Health Act (OSHA) and the U.S. Environmental Protection Agency (EPA). It is classified as a restricted-use pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). It is recommended for use by trained professionals and should be applied in accordance with the product label. The product label contains instructions for use, precautions, and warnings related to the safe and effective use of the product. The label also includes information about the proper disposal of the product and its containers.
