This product is used to raise the pH in spa water. The water in the spa should be maintained at a pH of 7.2-7.8 and total alkalinity from 80-120 ppm. Test water frequently with suitable test kit to ensure proper pH is maintained. This product is compatible with all sanitizers including bromine, chlorine and biguanide.

PRECAUTIONARY STATEMENTS

CAUTION

IRRITANT, HARMFUL IF SWALLOWED. Causes irritation to the eyes. Continuous contact may irritate skin. Keep away from heat. Store in a cool dry area, away from acids. Mix only with water. Contains sodium carbonate.

FIRST AID

IF IN EYES: Immediately flush with water for at least 15 minutes, lifting eyelids intermittently. Call a physician.

IF ON SKIN: Wash with plenty of soap and water. If irritation occurs, call a physician.

IF SWALLOWED: Rinse mouth with water. Dilute by giving 1 or 2 glasses of water. Do not induce vomiting. See a physician immediately.

IF INHALED: Remove to fresh air. If breathing difficulty or discomfort occurs, obtain medical attention.

DIRECTIONS FOR USE

This product should be used if pH is below 7.2.
1. Turn on air blower, jets or filter system.
2. Premix 1 oz. of this product with water in plastic pail and add diluted product to spa.
3. Retest water after 30 minutes.
4. Follow steps 1-3 until pH and total alkalinity are in the range of 7.2-7.8 and 80-120 ppm respectively.

NOTE: Always wait 30 minutes between doses and test water before each addition of this product.

STORAGE AND DISPOSAL

Store closed container in a cool, dry and well-ventilated space. When container is empty, rinse thoroughly with water, wrap securely in newspaper and place in trash collection.
