TRIPLE ACTION TABLETS

Power crystals clarify pool water
Innovative, patented, exclusive technology

ACTIVE INGREDIENTS:
Trichloro-s-Triazine-trione ........................................ 93.5%
Copper Sulfate pentahydrate* .................................... 1.5%
OTHER INGREDIENTS .......................................... 5.0%
TOTAL ............................................. 100.0%
Available Chorine ........................................... 84%
*Metallic copper equivalent 0.36%

KEEP OUT OF REACH OF CHILDREN
DANGER
Contamination or improper use may cause fire or explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not mix this product with a small amount of water. Only add directly to your pool. Do not remove basket or other dispensing device from water for more than five minutes if it contains a tablet or tablet residue.
See back panel for Precautionary and First Aid Statements.

NET WEIGHT 50 LBS. (22.68 KG)
**DIRECTIONS FOR USE**
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THE PRECAUTIONARY STATEMENTS BEFORE USE.**

**METHOD OF APPLICATION:** Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or place in skimmer.

Do not allow this product to get damp or wet before use.

Do not allow this product to contact other water treatment products.

Use in a new chlorinating device or any device which has previously contained only this product or trichloro-s-triazinetrione. When placed in the skimmer, run the filter pump a minimum of eight hours daily.

**DO NOT** Use in floaters or feeders that have been used with other water treatment products. Make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in the skimmer.

**DO NOT** Throw tablets directly into pool.

**DO NOT** Permit tablets to contact plastic pool linings or metal objects.

**DO NOT** Use with any other tablets or sticks in the same skimmer, floater, or feeder.

**DO NOT** Use in any chlorinating device which has been used with other chlorinating compounds.

**DO NOT** Use bare hands when handling product.

**DO NOT** Mix with other products or dissolve before use.

**DO NOT Pre-mix this product. Only add this product directly to your pool.

**WATER BALANCE:** To provide optimum product performance, swimmer comfort and crystal clear water, always maintain pH from 7.2 to 7.6, total alkalinity from 80 to 120 parts per million (ppm), and calcium hardness above 200 ppm. Test frequently using a test kit that measures all these ranges. Make any necessary adjustments promptly with the appropriate pool care products. Re-entry into treated pools is prohibited with chlorine levels above 4 ppm for risk of bodily injury.

**ROUTINE CHLORINATION:**
Add one tablet per 10,000 gallons of pool water every week or as often as needed to maintain a chlorine residual of 1.0 to 4.0 ppm.
Follow "METHOD OF APPLICATION." This dosage may vary depending upon bather load, water temperature and other conditions. Pool must not be entered until the chlorine residual is 1.4 ppm as measured with a reliable test kit.

**SHOCK TREATMENT:**
As a preventative treatment, you must shock treat your pool once per week to prevent pool problems. In addition to weekly shock treatment, you must shock treat to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms, or if algae does develop with resulting green color and slimy feeling. Adjust pH to 7.2 to 7.4 with pH adjusters per label directions.

Shock treat weekly to kill bacteria, control algae, burn out organic material and to keep water sparkling clear. Follow label directions.

**ALGAE CONTROL:** If pool surface develops algae or seems slippery, follow shock treatment directions. Immediately after shock treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If necessary, repeat the procedure. Pool must not be entered until chlorine residual is 1.4 ppm.

**PRECAUTIONARY STATEMENTS:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**
DANGER: Corrosive. Causes irreversible eye burns and skin irritation. May be fatal if inhaled. Harmful if swallowed.

- Do not get in eyes, on skin or on clothing. Wear safety goggles or face shield, and rubber gloves when handling this product. For additional skin protection, wear long sleeves and long pants.
- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Keep away from heat and from flame and burning material (like a lighted cigarette).

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms.

Do not discharge effluent containing this product into lakes, ponds, streams, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authorities. For guidance contact your State Water Board or Regional Office of the EPA.

**STORAGE AND DISPOSAL:**
Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Keep product in its tightly closed container when not in use in an area inaccessible to persons unfamiliar with its use. Store in cool, dry, well-ventilated area. Keep away from heat or open flame.

**Disposal:**
Disposal of this product is regulated by federal law. Ask your local waste disposal facilities for more information.
