BC-177

ACTIVE INGREDIENT(S)
Polyoxyethylene(dimethylimino)ethylenediamine
Dimethylenediamine(dimethylamino)ethylenediamine dichloride
INERT INGREDIENTS

TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN

CAUTION

If in Eyes
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing for at least 5 minutes.
- Call a poison control center or doctor for further treatment advice.

If on Skin
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

If Swallowed
- Call poison control center or doctor immediately for treatment advice.
- Do not induce vomiting unless told to do so by the poison control center doctor.
- Do not give anything by mouth to an unconscious person.

If Inhaled
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferablymouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

INFORMATION:

- This pesticide should be used only by and under the direct supervision of a licensed applicator.
- Do not use this product in an area where fish or shellfish are taken for food.

SAFETY PRECAUTIONS

CAUTION: Use in a well-ventilated area.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes, or clothing. Wear chemical-resistant eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or smoking. Remove and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish, aquatic organisms, and clams. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in written. Prior to discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

BC-177 is used to control the growth of algae in swimming pools, heated swimming pools, exterior spas, hot tubs, whirlpools, hot tubs, and saunas. It is also used to control algae, bacteria, fungi, and mollusks in industrial cooling water systems, food processing equipment, and other systems where control of bacteria is required. BC-177 is used to control the growth of bacteria in food processing equipment and other systems where control of bacteria is required.

INDUSTRIAL FRESH WATER SYSTEMS: BC-177 is used to control the growth of algae, bacteria and fungi in holding and processing tanks of industrial fresh water systems supplying water to pulp and paper mills, and other manufacturing plants. It can be used as a biocidal supplement to the conventional treatment with chlorine or chlorine compounds. In pulp and paper mills, treatment of the fresh water with BC-177 makes an important contribution to its stable condition. The use of BC-177, as described, reduces the development of slime in freshwater pipes, fresh water spraying nozzles, and on the pulp and paper mill.
