Treats northern & southern grasses
Kills the weeds not the lawn

Keep Out Of Reach Of Children
CAUTION
This product contains unlabeled use of a pesticide
Keep out of reach of children.

Net Wt.: 12 LBS (5.44 kg)
3. When To Apply:
This product may be applied as a single application or as split applications in the spring, early summer, or fall.

For annual grasses such as crabgrass (smooth, southern, and large) and foxtail (green, yellow, and giant) apply in the spring and early summer. For best results, apply this product 2 to 2 weeks before weed germination until the weed is 4 inches tall. For dense populations, make a second application no sooner than 30 days after the first application.

For broadleaf weed control: Spring applications: Dandelion, white clover, Broadleaf plantain, Wood sorrel. Fall applications: common chickweed, Oxalis, Herb. For best results, apply when broadleaf weeds are young and actively growing with adequate soil moisture and favorable temperatures (50° to 80°F).

4. How To Apply:
- This product needs to stick to the leaves of broadleaf weeds and should be applied when the grass is wet from rain or dew.
- For best results, apply when the grass is dry. When dry conditions exist, irrigate or water the turfgrass 24 hours before application.
- For best results, apply after the application. However, do not irrigate or water sooner than 24 hours after application.
- This product when the wind is calm.
- Do not spray granules onto flowers, vegetables, and ornamental shrubs.
- This product is applied on top of soil, not in the soil. Do not mix with soil.
- Clippings from the first three mowings should be left on the treated area and do not use clippings from the treated areas to compost for use in gardens.

5. How Much To Use
Uses a drop or rotary spreader designed to apply granular herbicides. Avoid skips or excessive overlaps as poor weed control or turfgrass injury may result.

- Apply 2 to 4 pounds of product per 1,000 square feet, per application to established turf. The maximum broadcast application rate is 2 pounds per 1,000 square feet. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum annual (seasonal) rate is 4 pounds per 1,000 square feet.

6. CALIBRATION INSTRUCTIONS
- For 2 pounds of product per 1,000 square feet, check your spreader on 400 square feet and adjust to apply at the rate of 1 pound of product per 400 square feet.

7. STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal of product. Pesticides Storage: Keep in original container in a cool, dry place, away from children and pets. Do not store with food or feeds.

- Keep product in original containers. Do not sell or re-tail this product. Completely empty bags into a garden disposal system or compost heap to avoid contamination if recycling is not available.
- Store in a cool, dry place.
- Keep out of the reach of children and pets.

8. PRECAUTIONARY STATEMENTS
-cloth or other material. To maintain the environment, do not allow pesticides to enter or run off into storm drains, drainage ditches, gutters or surface waters.
