ADJUVANT CH
Acid Activator for Chlorine Dioxide
WA Reg. # 700

Product Description: ADJUVANT CH is recommended for use as an acid activator with AQUA-CLEAR 15, CLEAN-FINISH, DISIN-FINISH 75 or an equivalent dose of sodium hypochlorite in the mechanical generation of chlorine dioxide.

Directions for Use: ADJUVANT CH is used for the activation of sodium hypochlorite solutions in a chlorine dioxide generator. ADJUVANT CH is typically fed into the generator at one to three times the feed rate of the sodium hypochlorite product. Your CH2O technical sales representative can guide you in the proper feed rate during installation of the chlorine dioxide generator.

NEVER combine the chloride and acid products without using a generator. When the two products are mixed, the reaction can be explosive and liberate heat and toxic gases. Proper use of a generator will contain any reaction and deplete the chlorine dioxide to a safe and usable strength.

Storage & Disposal: Store this product in a cool, dry, well-ventilated area away from sources of ignition. Keep container tightly closed when not in use. Store only in approved containers that have been properly labeled. Proper disposal of the final product is mandatory.

Disposal of all product and waste in accordance with local, state, and federal regulations. Empty containers may contain hazardous materials which could contaminate the environment if improperly managed. Handle empty containers carefully, and dispose of them in accordance with all pertinent regulations. Do not reuse empty containers, labels, or equivalent during mixing and handling.

First Aid: EYES: Flush with large amounts of water, lifting upper and lower lids occasionally. Get medical attention if irritation persists. SKIN: Wash exposed areas thoroughly with soap and water. Remove contaminated clothing and launder before reuse. If skin feels slippery, continue washing until slick feeling is gone. Contact a physician if irritation persists.

Inhalation: Give large quantities of water. DO NOT induce vomiting. If vomiting occurs, administer additional fluids. Contact a physician for further directions. Never give anything by mouth to an unconscious person. INHALATION: Remove individual to fresh air if breathing is difficult, give oxygen. Contact a physician if irritation persists.

Spill Procedures: Only trained personnel equipped with proper protective gear should enter the area. Step spill in excess. Clean exposed area if possible for new. Contaminated contaminated material for disposal. After all visible losses have been removed, Air over area to prevent any further loss or contamination. Care must be taken when using or disposing of chemical materials under these conditions to prevent any further contamination.

DANGER:
Principal Functioning Agent(s)........21%
Hydrochloric acid, nitric acid, phosphoric acid, sulfuric acid.

Constituents ineffective as spray adjuvants........79%
All ingredients are exempt from the requirement of a tolerance under 40 CFR 180.

IN CASE OF EMERGENCY CALL CHEMTREC AT: 1-800-424-9300
KEEP OUT OF REACH OF CHILDREN

NON-WARRANTY: As the use of this material is subject to conditions beyond the seller's control, the seller makes no warranty express or implied as to this material or its use other than its chemical analysis when packed. The total liability of seller shall be limited to the purchase price of the product. Any disputes or claims must be settled by arbitration in accordance with the purchase details on your invoice.

PRODUCT MUST BE STORED ABOVE 45 DEGREES FAHRENHEIT (7 DEGREES CELSIUS)
