ADJUVANT H
Acid Activator for Chlorine Dioxide

DIRECTIONS FOR USE: ADJUVANT H is used as an acid activator in the activation of sodium chlorite solutions in a chlorine dioxide generator.

ADJUVANT H is typically used at one to three times the feed rate of the sodium chlorite product. Your CH2O technical sales representative can guide you in the proper feed rate during installation and set-up of the chlorine dioxide generator system.

NEVER combine the chlorite and acid products without using a generator. When the two products are mixed, the reaction can be explosive and liberate heat and toxic gases. Proper use of a generator will contain any reaction and dilute the chlorine dioxide to a safe and usable strength.

Be sure to read the Material Safety Data Sheet for this product before handling or use.

DANGER

PRECAUTIONARY STATEMENTS: ADJUVANT H is an extremely acidic product. Eye contact will cause burns. Prolonged or repeated skin contact will cause irritation, typically with burns. Ingestion will cause damage to the stomach and other tissue contacted. Excessive inhalation of product mist can cause irritation and/or burns to the respiratory system. Wear impervious gloves and safety glasses or goggles when handling the product. If vapors are present at or above TLV, respiratory protection must be worn. Wear additional protective clothing as necessary to minimize contact with product. When making solutions, add product slowly to the surface of cold water while stirring, thus avoiding spattering.

FIRST AID: if exposed, immediately contact Poison Control Center or physician. EYES: Flush with large amounts of water for several minutes, lifting upper and lower lids occasionally. Remove contact lenses if present and continue rinsing. Get medical attention if irritation persists. SKIN: Wash exposed areas thoroughly with soap and water. Remove contaminated clothing and launder before reuse. If skin feels slippery, continue washing until slick feeling is gone. Contact a physician if irritation persists. INGESTION: Give large quantities of water. DO NOT induce vomiting. If vomiting occurs administer additional fluids. Contact a physician for further directions. NEVER give anything by mouth to an unconscious person. INHALATION: Remove individual to fresh air. Keep at rest in a position comfortable for breathing. If breathing is difficult, give oxygen.

STORAGE & DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Store in locked, well-ventilated area above 45 F. Keep container tightly closed when not in use. Dispose of contents/container in accordance with local, state and federal regulations. Care must be taken when using or disposing of chemical materials and/or their containers to prevent environmental contamination.

Principal Functioning Agent(s): Hydrochloric acid, citric acid, phosphoric acid
Constituents ineffective as spray adjuvants: TOTAL: 15%

All ingredients are exempt from the requirement of a tolerance under 40 CFR 180
