BIO-SUL

Slug & Snail Bait

Active Ingredient:
Sulfur.......................................................1.0%

Other Ingredients...................................................99.0%

Total..............................................................100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

EPA Registration Number 71096-16
EPA Establishment Number 66876-OR-001

FRST AID
If in eyes: Hold open and rinse slowly and gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Eye irritation may develop. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

Hotline Number
Calls to the product container or distributor may also be made to the National Poison Control Network at 1-800-222-1222 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS
Harmful to Insects and Domestic Animals. Caution: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

Personal Protective Equipment (PPE) Requirements:
- Application and other handlers must wear: long-sleeved shirts and long pants, shoes plus socks, chemical-resistant gloves made of any waterproof material and protective eyewear. Follow manufacturer’s instructions for maintaining PPE. If such instructions are not available, use disposable gloves and foot protection. Keep and wash PPE separately from other laundry.
- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, or to areas where surface water is present or to riparian areas below the mean high water mark. Do not contaminate water when disposing of equipment or waste.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

DISPOSAL: Nonhazardous container: Disposal to sewage treatment plant and in non-shelving containers, or in a nonhazardous container, or by incineration, or a landfill allowed by state and local authorities by burning. If burned, may emit smoke.

Do not apply this product, in a manner that will contact workers or other persons, either directly or through drift. Only persons trained may be in the area during application. For any requirements specific to your state of residence, consult the State or Tribal agency representative responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product in accordance with its labeling and with the Worker Protection Standard (40 CFR Part 170). This standard contains requirements for the protection of agricultural workers on farms, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on the label about Personal Protective Equipment (PPE) and the restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard (WPS).

Do not enter or allow workers to enter areas treated within 24 hours of treatment.

PPE is required for entry to treated areas that are permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water in containers or on tray fork, trowel handles, and filter assemblies made of any waterproof materials, shoes plus socks, and protective eyewear.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not enter or allow workers to enter until application site is dry.

GENERAL INFORMATION ABOUT BIO-SUL SLUG & SNAIL BAIT AND HOW IT WORKS
This product is a unique blend of the active ingredient, sulfur, with slug and snail test additives. Sulfur is an element found in nature and is used in many industries. The bait will degrade and become a part of the soil.

The bait is attractive to slugs and snails and lures them from their hiding places. Exposure of the bait will cause them to cease feeding. After eating the bait, the slugs and snails continue feeding, become less mobile, and begin to die within three days. Dead slugs and snails may not be visible as they often remain buried in undisturbed places to die. Plant protection will be observed in the decrease in plant damage.

This product is effective against a wide variety of slugs and snails and will protect plants from damage. It is effective in lawns and all other areas, even pastures, vegetable gardens, lawns, and orchards. It can also be applied in the soil or on the surface around all vegetable plants, flowers or fruit trees or bushes to be protected.

NET WT. 40 Lbs.
COMMERCIAL AGRICULTURE

HOW TO APPLY: Scatter the slug and snail bait pellets on the soil around or near the plants to be protected. For broadcast application, use standard broadcast spreaders. For new application, use standard granular spreaders. Apply the higher rates if the infestation is severe in the area to be watered or after long periods of heavy rain. Reapply as the bait is consumed at least once every three weeks.

Do not place in piles. If the ground is dry, wet it before applying bait. The product works best when soil is moist but with little or no standing water. See specific directions for different plant types and for inside greenhouses.

WHEN TO APPLY: Evening is the best time to apply the bait, as slugs and small animals travel mostly at night or early morning.

WHERE TO APPLY: All likely areas of infestation should be treated, especially around the perimeter of garden plots because these pests travel into plant areas from daytime refuge sites. They favor damp places around vegetable plants such as beans, tomatoes, lettuce, cabbage, celery, and squash, and in weeds or dibgings around field margins. Other favorable areas are flower gardens, melons, cucumbers, eggplants, garlic, lettuce, onions, parsley, peas, peppers, potatoes, radishes, rutabagas, spinach, squash, Swiss chard, tomatoes, and tulips. Scatter the bait around the perimeter of the vegetable plantings at the rate of 1.0-4.4 lbs per acre (0.01-0.05 kg per 1,000 square feet) to provide a protective barrier for slugs and snails entering the vegetable plantings. If slugs or snails are found in the rows, then scatter the bait on the soil around the base of the plants and between rows.

Fruits including Citrus

The bait can be used to protect the following fruits from slugs and snails: apples, apricots, cherry, almonds, peaches, plums, prunus, pears, cherries, currants, grapes, and lemons. For seedlings, spread the bait around the base of the stem. Apply at 0.16 oz, or 1 level teaspoon, per square yard, in a 6 inch circular area around the base of the plant to be protected. For older trees, spread the bait around the base of the tree to intercept slugs and snails traveling to the trunk. Apply the bait at 0.05-0.1 lb, per 1000 square feet for orchards, using standard broadcast granular spreaders. Use the higher rates for heavy infestations.

Berries

The bait can be used to protect the following berries from slugs and snails: strawberries, blackberries, blueberries, boysenberries, huckleberries, raspberries, boysenberries, blackberries, blueberries, and raspberries. Spread the bait around the perimeter of the plant in 1-2 oz (0.25-0.5 kg) per 1000 square feet area and scatter by hand or with granular spreaders. If slugs and snails are already in the plot, then carefully spread bait between the tunnels near the base of the plants. For small plants, treat around the base of the plants that are to be protected. Do not spread over the entire area but apply selectively.

Field Crops

The bait can be used to protect the following field and seed crops from slugs and snails: beans, field corn, sweet corn, soybeans, sugar beets, sugar cane, sorghum, beets, broccoli, Brussels sprouts, cabbage, carrots, cauliflower, cucumbers, lettuce, onions, peas, peppers, potatoes, radishes, strawberries, tomatoes, and turnips. At the seeding and later stages, apply the bait between the rows and around the perimeter of the field. Scatter pellets at a rate of 10-44 lbs per acre (0.3-2.3 kg per 1,000 square feet). Use the higher dosage rate for heavier infestations.

Artichokes

The bait can be used to protect artichokes from slugs and snails. At the seeding and later stages, scatter the bait within the rows and around the perimeter of the field. Scatter pellets at a rate of 10-44 lbs per acre (0.3-2.3 kg per 1,000 square feet). Use the higher dosage rate for heavy infestations.

Outdoor Ornamentals

Select bait in a 6 inch circular band around the base of the plants to be protected. At 0.16 oz, or 1 level teaspoon, per square yard, 8 plants next to a gravel area, spread the bait between the ornamentals and the grass. Slugs and snails traveling to the plants will encounter the bait before reaching the plant. In these situations, scatter the bait around the perimeter of the plant at approximately 1 lb, per 1000 square feet to intercept slugs and snails traveling to the plant.

Greenhouses

Where slugs or snails are a problem in greenhouses, scatter the bait in the plant pots or plants being damaged or around pots on greenhouse benches. Apply about 1/2 teaspoon per 9 inch pot.

Outdoor Container-Grown Nursery Plants

Where slugs or snails are a problem in outdoor nurseries, scatter the bait in the plant containers at the rate of 1 tablespoon per container of plants being damaged, or scatter around the soil near the containers at the rate of 1 teaspoon per square yard (24-44 lbs per acre).

Lawn

The bait can be used to protect lawns. When slugs or snails are detected, scatter the bait at a rate of approximately 0.05-0.1 lb, per 1000 square feet (0.05-0.1 kg per 1,000 square meters) for orchards, using standard broadcast granular spreaders. Use the higher rates for heavy infestations.

Grass Green for Seed Production and Wheat

The bait can be used to protect grasses grown for seed production and wheat. When slugs or snails are detected, scatter the bait at a rate of approximately 0.25-1 lb, per 1000 square feet (0.5-2 kg per 1,000 square meters) for orchards, using standard broadcast granular spreaders. Use the higher rates for heavy infestations.

Non-Crop Areas

The bait can be used to protect the following non-crop areas: fallow land, barrier strips, urbanized non-agricultural areas, recreational areas, non-food or non-feed brush, weed or dense vegetation areas, railroad rights-of-way, and road sides, parks and trails, lumberyards, storage areas, industrial facility sites, and yard and walkways around industrial buildings. Paving areas, parks, golf courses, other public areas, and similar non-crop areas. Apply at a rate of approximately 25-44 lbs per acre (0.5-2 kg per 1,000 square meters) for orchards, using standard broadcast granular spreaders. Use the higher rates for heavy infestations.

CONDITIONS FOR SALE

Important: Read these entire Directions and Conditions for Sale before using BIO-SUL Slug & Snail Bait. Do not apply to any plants that you are planning to eat. The manufacturer makes no other express or implied warranty. To the extent consistent with applicable law, the manufacturer shall not be liable for consequential or indirect damage resulting from the use or handling of this product.
