READ THE LABEL FOR APPLICATION INSTRUCTIONS AND PRECAUTIONS PRIOR TO USE.
This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Bonide represents that the ingredients qualify for exemption from registration under FIFRA.

DIRECTIONS FOR USE
FOR RESIDENTIAL USE ONLY. SHAKE WELL BEFORE USING.
This product is a contact, non-selective, broad spectrum, foliar applied weed killer. It will only control actively growing emerged green vegetation. It is effective on annual, perennial and grassy weeds. This product does not translocate and will affect only those plants that are covered with the spray solution. Use along boarders, on driveways, sidewalks, around mature tree bases, around buildings, along fence lines, around barns & pastures, in greenhouses, school grounds, flower beds and other areas where weed control is desired.

Spray to the point of run-off, making sure that all of the foliage is wet. One quart of finished spray solution covers approximately 375 sq.ft. Repeat application may be necessary if new growth appears.

Multiple applications will be required for control of larger weeds, or weeds that are stressed due to lack of moisture or high temperatures. Best results are achieved from spring/early summer applications to actively growing young weeds. Only contacted vegetation will be affected. Rainfall within one hour after application will reduce effectiveness, and will have to be re-applied. People, pets and other animals may re-enter a treated area after the application has dried.
Avoid application to reactive metals such as aluminum, tin, iron, or items such as fencing or lawn furniture in order to prevent staining, mottling, or otherwise interfering with finished metal surfaces.

**NOTE:** All contacted vegetation will be affected. Avoid contact with desirable vegetation. If product contacts desirable vegetation, wash off immediately with water.

**TYPICAL WEEDS CONTROLLED, BUT NOT LIMITED TO:**
