This product is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is predicted for the next 24 hours will help ensure that wind or rain does not blow wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to eating. Remove contaminated clothing and wash before reuse. Avoid contamination of feed and foodstuffs.

If Inhaled:
- Move person to fresh air.
- If not breathing, call 911 or an ambulance. Then give mouth-to-mouth respiration at a rate of 12 to 20 breaths per minute, unless instructed to do otherwise by a poison control center or doctor.
- Do not give any liquid by mouth to an unconscious person.

If Swallowed:
- Call a poison control center or doctor. Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin or on Clothing:
- Clean immediately the skin or clothing with soap and water or with a pesticide to which the skin or clothing has been exposed.
- Change clothing if it is contaminated.

If on Eyes:
- Hold eye open and rinse slowly and gently with water for 15 to 20 minutes, or until irritation subsides. Do not rub eye.

If Exposed to Insects:
- Remove protective cap, hold container upright and spray from a distance of 12 to 15 inches. Apply in a steady stream of fine mist. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before smoking or eating. Remove contaminated clothing and wash before reuse. Avoid contamination of feed and foodstuffs.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this entire label and follow all use directions, use restrictions and precautions.

Use Restrictions
- Do not breathe dust, vapors or spray mist.
- Do not apply when food is present.
- When used in dairy barns and facilities: Close milk bulk tank lids to prevent contamination from spray and from dead or fallen insects. Remove or cover milking utensils before application. Wash tests of animals before milking.
- When applying as a space spray, remove people and pets from the area before spraying. Except when applied to pets or livestock, do not enter or allow others to enter until spray has dried.

Shake Well Before Using

Remove protective cap, hold container upright and spray from a distance of 12 to 15 inches.

In Animal Quarters and Milk Rooms:
- For rapid control of House Flies, Mosquitoes, Gnats, Weeps, Bees, and Small Flying Moths. Remove animals prior to treatment, close windows and doors and spray at the rate of 2 to 3 seconds per 100 cubic feet of cube. For best results, keep area closed for 10 minutes after spraying. Do not remain treated area and ventilate after treatment is completed.

To Treat Livestock:
- To protect beef cattle, dairy cattle, goats, sheep, hogs and horses from attacks of Stable Flies, Horse Flies, Deer Flies, Face Flies, House Flies, Horn Flies, Mosquitoes, Ticks and Gnats: Spray the area with a fine mist. Spray 2 to 3 seconds per 100 cubic feet of space. For best results, keep area closed for 15 minutes after spraying. Do not remain treated area and ventilate after treatment is completed.

Wound Spray and to Kill Screw Worms, Flies, and Maggots Infesting Beef Cattle, Horses and Sheep:
- Hold can about 4 to 8 inches from the area to be treated with muzzle pointed at wound. Spray the wound should also be sprayed. This product is not recommended for use in deep wounds.

Note on Resistance: Some strains of screw worm may develop resistance to pyrethroids. This will be observed by lack of response to treatment. Where pyrethroid resistance is known or suspected, this product should not be used.
TO CONTROL BLOOD SUCKING LICE:
Apply to the infested areas of the animals, using a stiff brush to get the spray to the base of the hair. Repeat every three weeks if required.

TO CONTROL POULTRY LICE:
Spray roosts, walls and nests or the cages thoroughly. This should be followed by spraying over the birds with a fine mist.

FOR CONTROL OF BEDBUGS AND MITES IN POULTRY HOUSES:
Spray crevices of roost poles, cracks in walls and cracks in nests where the bedbugs and mites hide.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE STORAGE: Store in a cool, dry secure area in original container.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER HANDLING: Non-refillable container. Do not reuse this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
