INSECTICIDAL PASTE

KILL AND REPELS FACE FLIES, HORN FLIES, STABLE FLIES, HOUSE FLIES, BLACK FLIES AND BOT FLIES ON HORSES AND FOALS.

ACTIVE INGREDIENTS:
* Permethrin................................................................. 7.6%
** Piperonyl butoxide .............................................................. 14.0%
*** N-Octyl bicycloheptene Dicarboximide........................... 21.0%
OTHER INGREDIENTS........................................... 57.4%
TOTAL................................................................. 100.0%

*Cis/Trans ratio: Min. 35% (=/-) cis and max. 65% (+/-) trans.
**Consists of butylcarbityl (6-propylpiperonyl) ether and other related compounds.
***MGK 264
EPA Reg. No. 47000-185 EPA Est. No. 47000-IA-01

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DIRECTIONS FOR USE

CAUTION: Harmful if swallowed or absorbed through the skin. Avoid contact with skin, eyes or clothing. Do not contaminate food, feed or water after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and aquatic animals. Do not contaminate any body of water with this product by disposal of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS

Do not use on or near food or on food contact surfaces.

READ THIS LABEL: Read the entire label and follow all use directions, use restrictions and precautions.

APPLICATION RESTRICTIONS: Do not use this product on horses intended for human food. Do not apply to a wet animal since the product will not adhere to moist hair. Wash thoroughly with soap and water after handling.

APPLICATION TECHNIQUES

For Adult Horses:

Full Body Fly Control: Apply 12 grams to the neck, back, and rump to provide maximum Face Fly control. It is very important to place the product around the inside corner of the eye where the tear and bottom lid meet. If too much formulation is placed here, the resulting outward discharge will usually occur until 1 to 2 days after application. The reason for this is it takes time for the formulation to release into the horse's hair. Because War Paint is not only insecticidal, but also an effective repellent, you will notice that in the case of face fly activity, the application area will appear unless white if not immediately after application. After a period of one to two weeks, as the insecticide is released into the horse's hair, you will find that that War Paint becomes powdery and will not leave the horse's hair having no adverse effects on the horse's appearance.

Full Body Fly Control: Apply 12 grams to the neck, back, and rump to provide maximum Face Fly control. It is very important to place the product around the inside corner of the eye where the tear and bottom lid meet. If too much formulation is placed here, the resulting outward discharge will usually occur until 1 to 2 days after application. The reason for this is it takes time for the formulation to release into the horse's hair. Because War Paint is not only insecticidal, but also an effective repellent, you will notice that in the case of face fly activity, the application area will appear unless white if not immediately after application. After a period of one to two weeks, as the insecticide is released into the horse's hair, you will find that that War Paint becomes powdery and will not leave the horse's hair having no adverse effects on the horse's appearance.

For Horses with Long Hairs:

Full Body Fly Control: Apply 12 grams to the neck, back, and rump to provide maximum Face Fly control. It is very important to place the product around the inside corner of the eye where the tear and bottom lid meet. If too much formulation is placed here, the resulting outward discharge will usually occur until 1 to 2 days after application. The reason for this is it takes time for the formulation to release into the horse's hair. Because War Paint is not only insecticidal, but also an effective repellent, you will notice that in the case of face fly activity, the application area will appear unless white if not immediately after application. After a period of one to two weeks, as the insecticide is released into the horse's hair, you will find that that War Paint becomes powdery and will not leave the horse's hair having no adverse effects on the horse's appearance.

For Horses with Short Hairs:

Full Body Fly Control: Apply 12 grams to the neck, back, and rump to provide maximum Face Fly control. It is very important to place the product around the inside corner of the eye where the tear and bottom lid meet. If too much formulation is placed here, the resulting outward discharge will usually occur until 1 to 2 days after application. The reason for this is it takes time for the formulation to release into the horse's hair. Because War Paint is not only insecticidal, but also an effective repellent, you will notice that in the case of face fly activity, the application area will appear unless white if not immediately after application. After a period of one to two weeks, as the insecticide is released into the horse's hair, you will find that that War Paint becomes powdery and will not leave the horse's hair having no adverse effects on the horse's appearance.

APPLICATION TECHNIQUES

FACE FLIES: Turn the applicator wheel 1/4 turn to place 2 grams of War Paint on the top of the applicator. Then apply 1/4 by 1 inch stripe under the horse's mane on the withers. Place the product far enough up the withers so the product will not end under the saddle or blanket if the horse is to be ridden.

BOT FLIES AND HORSEFLIES: Turn the applicator wheel 1/4 turn to place 2 grams of War Paint on the top of the applicator. Then apply the material to the front of the horse's leg for inches below the knee or hock. Touch the applicator to the spot to be treated and move the applicator in the same direction up the horse's leg. Four strokes should do the job. Smooth out the material using the tip of the applicator to avoid streaking. This should be done instead of applying War Paint to the front of the legs, since this application will also control stable flies and bot flies simultaneously. If this technique is used, remember to apply no more than 12 grams of War Paint to a horse in any 7 day period. See application technique and illustrations.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed, or food contact surfaces.

PESTICIDE STORAGE: Store in a cool, dry and secure area. Store in original sealed container.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

CONTAINER HANDLING: Do not puncture or incinerate! Place in trash or offer for recycling if available. If punctured, call your local solid waste agency at 1-800-CLEANUP for disposal instructions.

This should be done instead of applying War Paint to the front of the legs, since this application will also control stable flies and bot flies simultaneously. Apply the product over the area where the bot eggs are attached.

FACIAL CONTROL: Apply under each eye. A 1 inch strip along the lower eyelid. (This will release only 1/2 gram to each eye.)

FACE FLY CONTROL:

HORN FLIES, BLACK FLIES AND HOUSE FLIES: Turn the applicator wheel 1/4 turn to place 2 grams of War Paint on the top of the applicator. Then apply 1/4 by 1 inch stripe under the horse's mane on the withers. Place the product far enough up the withers so the product will not end under the saddle or blanket if the horse is to be ridden.

STABLE FLIES AND BLOT FLY:

Apply 1/2 gram of War Paint to each leg. Turn the applicator wheel 1/4 turn to place 2 grams of War Paint on the top of the applicator. Then apply the material to the front of the horse's leg for inches below the knee or hock. Touch the applicator to the spot to be treated and move the applicator in the same direction up the horse's leg. Four strokes should do the job. Smooth out the material using the tip of the applicator to avoid streaking. This should be done instead of applying War Paint to the front of the legs, since this application will also control stable flies and bot flies simultaneously. If this technique is used, remember to apply no more than 12 grams of War Paint to a horse in any 7 day period. See application technique and illustrations.

STABLE FLY CONTROL: Apply to the front of each leg. 1/4 inch wide by 14 inch long stripe. Apply the product under the saddle and blanket.

BOT FLIES: To kill and repel bot flies during the egg laying season, War Paint should be applied over the bot eggs already on the horse. A four inch by one inch wide stripe should be painted over the area where the bot eggs are attached.

This should be done instead of applying War Paint to the front of the legs, since this application will also control stable flies and bot flies simultaneously. Apply the product over the area where the bot eggs are attached.

FACIAL CONTROL: Apply under each eye. A 1 inch strip along the lower eyelid. (This will release only 1/2 gram to each eye.)
CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

To the extent permitted by applicable law Manufacturer and Seller warrant that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. To the extent permitted by applicable law this warranty does not extend to the use of this product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or Manufacturer, and Buyer and User assume the risk of any such use. To the extent permitted by applicable law, MANUFACTURER AND SELLER MAKE NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the extent permitted by applicable law, in no event shall Manufacturer or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product.

Manufacturer and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitations of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of Manufacturer.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor for going for treatment.

If in Eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for further treatment advice.

If Swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give any liquid to the person.
• Do not administer anything by mouth to an unconscious person.

If on Skin or on Clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for further treatment advice.
