Keep out of reach of children. Danger poison.

Precautionary statements

Danger: Fatal if absorbed through skin. Corrosive. Causes irreversible eye damage. Causes skin burns. Do not get in eyes, on skin or on clothing. May be fatal if inhaled. Do not breathe vapor or spray mist. Harmful if swallowed. Avoid contact with skin, eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear goggles or face shield, coveralls worn over long-sleeved shirt and long pants, socks, chemical-resistant footwear, chemical-resistant gloves made of barrier laminate, butyl, nitrile, or neoprene rubber, polyvinyl chloride or vinyl, a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefilter TG-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefilter TG-14G), or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any N, R, P or HE prefilter.

Environmental hazards

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previous scoping the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply in marine or estuarine areas.

Biocheck Bit 20

For industrial use only as an antimicrobial to protect aqueous compositions such as latexes, oil-in-water emulsions, paints and coatings, inks and font solutions, water-based adhesives, aqueous pigment or mineral slurries, building and construction compositions, pesticoformulations, home cleaning products, liquid laundry additives, car care products, oil recovery materials, secondary oil recovery fluids, paper or textile coating compositions, pulp and paper mill systems, leather processing solutions, intended to protect fresh animal hides or skins, or seed coating. (*Not registered for this use in California)

Active ingredients:
1,2-benzenediol 3-one ........................................ 19.0%

Inert ingredient: ........................................ 81.0%
Total .................................................. 100.0%

Directions for use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

User safety requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

User safety recommendations

User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on cleaning clothing.
User should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into cleaning clothing.

For detailed directions for use, please refer to the LANXESS Corporation Technical Information Bulletin. Read these entire directions before using BIOCHECK BIT 20.

In case of emergency, call:
Chemtrec 800-424-9300 Worldwide 703-527-3887

First aid

Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center or when going for treatment.

If on skin or clothing: Take off contaminated clothes. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or other emergency number, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

Note to physician: Probable mucosal damage may contraindicate the use of gastric lavage. Treat for symptoms of acute dermatotoxicity, and eye and skin irritation concerns.

Poison control center: Call 1-800-222-1222

Drum

Storage and disposal

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Pesticide storage: Protect from frost. If frozen, allow to thaw and stir well before use.

Pesticide disposal: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide, spray rinse, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container handling: Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ½ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution for 30 seconds. Stand the container on its end and tip it back and forth, several times. Turn the container over onto its other end and tip it back and forth several times. Empty the residue into application equipment or mix tank or store rinsates for later use or disposal. Repeat this procedure two more times.

Tote

Storage and disposal

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Pesticide storage: Protect from frost. If frozen, allow to thaw and stir well before use.

Pesticide disposal: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide, spray rinse, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container handling: Offer for recycling if available or conditioning if appropriate. If not available, pressure rinse as follows: Empty the remaining contents into the application equipment or mix tank and continue to drain for 10 seconds after the flow begins to drip. Insert pressure rinsing nozzle in the side of container, and rinse at about 60 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

Pail

Storage and disposal

Prohibitions: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

Pesticide storage: Protect from frost. If frozen, allow to thaw and stir well before use.

Pesticide disposal: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide, spray rinse, or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container handling: Triple rinse as follows: Empty the remaining contents into application equipment or mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ½ full with water and recap. Shake for 10 seconds. Four minutes into application equipment or mix tank or store rinsates for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Emergencies: In emergency situations, such as spills, fire, or exposure: call 1-800-424-4990.
BIOCHEK® BIT 20D

FOR INDUSTRIAL USE ONLY AS AN ANTIMICROBIAL TO PROTECT AQUEOUS COMPOSITIONS SUCH AS LATICIES, OIL-IN-WATER EMULSIONS, PAINTS AND COATINGS, INKS AND FONT SOLUTIONS, WATER-BASED ADHESIVES, AQUEOUS PIGMENT OR MINERAL SLURRIES, BUILDING AND CONSTRUCTION COMPOSITIONS, PESTICIDE FORMULATIONS, HOME CLEANING PRODUCTS, LIQUID LAUNDRY ADDITIVES, CAR CARE PRODUCTS, OIL RECOVERY MATERIALS, SECONDARY OIL RECOVERY FLUIDS, PAPER OR TEXTILE COATING COMPOSITIONS, PULP AND PAPER MILL SYSTEMS, OR LEATHER PROCESSING SOLUTIONS, INTENDED TO PROTECT FRESH ANIMAL HIDES OR SKINS, OR SEED COATING* (*Not Registered for this use in California)

General

Many aqueous dispersions and emulsions can be spoiled during storage and use due to the growth in them of bacteria, fungi, molds, or other microorganisms. BIOCHEK BIT 20D, an aqueous dispersion of 1,2-benzisothiazolin-3-one (BIT), is an efficient microbial preservative for many aqueous systems, and exhibits:

- Effective control of a wide range of organisms at cost-effective concentrations.
- Long-term storage stability.
- Ease of use due to its liquid form and good compatibility in most aqueous compositions.
- A light color, with attendant advantages.

Properties of BIOCHEK® BIT 20D

Composition: An aqueous dispersion of 1,2-Benzisothiazolin-3-one at 19% average in very fine particle form.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. BIOCHEK BIT 20D is an effective preservative in most aqueous compositions. The concentration required to give protection depends on several factors. These include the susceptibility of the system to microbiological degradation, the extent to which micro-organisms can gain access, the species involved, pH, temperature, and length of time for which protection is required.

For protection against bacterial attack, a concentration within the range 0.02 - 0.25% BIOCHEK BIT 20D is almost invariably sufficient. In dilute fluid systems, spoilage is usually controlled with dosages not greater that 0.09%. Control of mold growth, particularly on paste products of high solids content, may occasionally require demand dosages above 0.25%. Do not use concentrations greater than 0.50%.

Trials at different concentrations are recommended. Typical applications, and the suggested range of concentrations on which trials can be based, are:
<table>
<thead>
<tr>
<th>Type of material to be protected</th>
<th>Lbs BIOCHEK® BIT 20D to use per 1000 Lb of material to be protected</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Latices</strong>, such as: polymer latices based on monomers such as acrylate, butadiene, PVA or styrene, synthetic rubber/latex</td>
<td>0.5 to 1.5 lb (0.05 - 0.15%)</td>
</tr>
<tr>
<td><strong>Oil-in-water emulsions</strong>, such as textile spin-finish solutions, cutting/rolling oils, soluble oils (metal and engineering industries), and photographic emulsions. Note: limit amount of BIOCHEK BIT 20D in metalworking fluid concentrate (to be diluted before use) to 3.0 % to reduce the possibility of dermal sensitization.</td>
<td>0.5 to 1.8 lb (0.05 – 0.18%)</td>
</tr>
<tr>
<td><strong>Paints and coatings</strong>, such as aqueous coatings, water-based paints, and emulsion paints</td>
<td>0.5 to 2.5 lb (0.05 – 0.25%)</td>
</tr>

---|---
Seed Coating* (*Not Registered for this use in California) | 0.5 to 5 lb (0.05 – 0.50%)  
BIOCHEK BIT 20 is effective for the protection of in-can preservation of Seed Coatings Materials which includes, but is not limited to, colorants, dyes, seed coatings, and pesticide formulations up to 500 ppm of BIOCHEK BIT 20.  
BIOCHEK BIT 20 is exempt from tolerance under 40 CFR 180.920: Materials exempted from the requirements of a tolerance when used in accordance with good agricultural practice as an inert (or occasionally active) ingredients in pesticide formulations applied to growing crops only.

Pulp & paper mill system slime control
The preferred method of addition is by shock dosing because this ensures that a high concentration of BIOCHEK BIT 20D is present in the system for several hours. If a slime control agent is added by continuous methods over periods of several hours, its concentration in the system at all times is low. This can lead to the development of resistant organisms, which is less likely to occur when the shock dosing method is used.

It is not possible to give precise recommendations as to the quantity of BIOCHEK BIT 20D to add to control slime formation, because the magnitude of the problem varies greatly from mill to mill, depending on the furnish employed, the cleanliness of the mill system, and the additional nutrients (for example, starch) that may be added to the stock.  
The following quantities of BIOCHEK BIT 20D are suggested for trial:
**Shock dosing:** If this preferred method is adopted, add 2.5 to 9 ounces of BIOCHEK BIT 20D for each ton of paper produced per day as a single shock dose, the actual quantity to be used depending on the severity of the slime problem. This addition may be made to any part of the stock preparation or backwater system. Alternatively, the addition may be made to those parts of the system where it is known that slime deposits accumulate.

**Continuous addition:** If this method is adopted, add BIOCHEK BIT 20D continuously for either the single period of 8 hours during every 24 hours or for two separate periods of 4 hours during every 24 hours. Meter BIOCHEK BIT 20D into the recirculated backwater at a rate of 7 to 8.5 ounces for each ton of paper produced during the dosing period.
