**Principal Functioning Agents**

Diethylene glycol, polyether-poly(dimethylsiloxane)-copolymer, alkylphenol ethoxylate, dimethylpolysiloxane

Total: 100.0%

All ingredients are exempt from the requirements of a tolerance as specified in 40 CFR 180.

**Hazard Statements**

Harmful if swallowed. Causes skin irritation. Causes serious eye irritation.

**Precautionary Statements**

Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/eye/face protection. Call a poison center or doctor/physician if you feel unwell. IF SWALLOWED: Call a poison center or doctor/physician if you feel unwell. Rinse mouth. IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists: Get medical advice/attention. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. Refer to back label for more First Aid statements.

**Storage and Disposal**

Do not contaminate water, food, or feed by storage or disposal.

**Storage:** Keep container tightly closed. Store in a well-ventilated space. Store in a dry place. Keep cool. Store in original container only. Keep in a secure and locked storage area. Do not add water to the contents of this container.

**Disposal:** Triple rinse container, empty rinse water into spray tank. Dispose of contents/container in accordance with local/national regulations.

**Environmental Hazards**

Do not contaminate water sources by cleaning of equipment or disposal of wastewaters. NOT FOR AQUATIC USE.
First Aid
Call a poison center or doctor/physician if you feel unwell.
If Swallowed: Rinse mouth. If person is conscious, immediately give large quantities of water and induce vomiting. Do not induce vomiting or give fluids by mouth to an unconscious person. Seek medical attention immediately. Call a poison center or doctor/physician if you feel unwell.
If Inhaled: Move person to fresh air and check to ensure adequate respiration. Seek medical attention immediately.
If in Eyes: Immediately wash eyes with large amounts of water for at least 15 minutes, lifting the lower and upper lids. Seek medical attention IMMEDIATELY. If eye irritation persists: Get medical advice/attention.
If on Skin or Clothing: Take off contaminated clothing and wash before reuse. Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. Applicators and other handlers should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove protective clothing and equipment after handling. Wash the outside of gloves before removing. Wash thoroughly and change into clean clothing.
In Case of Emergency or Spill Contact CHEMTREC at 1-800-424-9300.

General Information
Cadence is a new generation surfactant based on organomodified siloxane technology for use in water-based pesticide formulations. Cadence is a highly effective humectant, nonionic surfactant, wetting agent and defoaming agent. Careful observation of spray application is recommended to determine proper and efficient pesticide application. This will optimize the pesticide and surfactant load levels. Read CAUTION statements carefully before use.

While Cadence has been proven to be a highly efficient surfactant; timing, weather conditions, methods of application, crop conditions, and/or mixture with other chemicals not specifically recommended are beyond the control of the seller. Therefore, the user should carefully observe spray deposits, rate efficiencies, compatibilities and effectiveness in initial application and adjust the adjuvant rates accordingly.

NOT A PLANT FOOD INGREDIENT NOT FOR AQUATIC USE

Mixing
Unless instructed otherwise by plant protectant label: 1) Fill tank 2/3 full of water. As a preventative measure, add KALO Anti-Foam™ agent before other tank mix ingredients. 2) Add plant protectants or nutrients as directed by label. 3) Add Cadence last while filling and agitating tank.

CONDITIONS OF SALE – LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES
Read the Conditions of Sale – Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded. The directions of this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of KALO, Inc., the manufacturer or seller. In addition, failure to follow label directions may cause injury to crops, animals, workers or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind express or implied concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at KALO, Inc.’s election, one of the following:

1. Refund of the purchase price paid by buyer or user for product purchased, or
2. Replacement of the product used

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company, the manufacturer and seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

Directions For Use
Pesticide manufacturers may recommend a rate of nonionic surfactant to be used with their product. Follow the pesticide or active ingredient label recommendations on use of surfactant. However, if the pesticide or active ingredient label does not have a specific recommendation for surfactant use but does not prohibit the use of a nonionic surfactant, Cadence should be applied at the rates listed below. Careful observation of spray performance in a trial application with the combination of chemicals to be applied is recommended to determine proper and efficient surfactant rates.

For use as spray adjuvant with herbicide: Use 16 ounces per 100 gallons or 1.6 ounces per acre using a 10 gallon per acre spray rate.

As an adjuvant with herbicides, micronutrients or defoliants: Use 6 to 16 ounces per 100 gallons of spray solution.

As an adjuvant with insecticides/miticides or fungicides: Use 6 to 12 ounces per 100 gallons of spray solution.

For use with aerial applications: Use 12 to 16 ounces per 100 gallons of spray.

As a Soil Wetting Agent
Golf course tees and greens: Apply at a concentration of 0.1% v/v, or use the following spray rates per 1,000 square feet: 1/8 ounce of Cadence in 1 gallon of water, or 1/5 ounce of Cadence in 1.5 gallons of water, or 1/4 ounce of Cadence in 2 gallons of water.

Repeat as needed to overcome hydrophobic soil condition. Irrigation is not needed, but will help incorporate the treatment into the soil.

For Large Turf Areas Such as Golf Fairways
Boom sprayers: Apply at concentration of 0.05 to 0.1% (6 to 13 ounces) per 100 gallons of tank mix/water.

Injection through irrigation: Adjust proportioning valve to inject at the ratio 1:1000, based on weekly application. To accommodate 100:1 proportioners, mix a 10% solution of Cadence and water and inject at 100:1.

As a mulch, meat or potting soil wetting agent: Apply at a concentration of 0.05 to 0.1% v/v of water (6 to 13 ounces) per 100 gallons. Repeat as needed.

As a dew control agent: Cadence will prevent dew formation on turf areas such as tees and greens. Apply Cadence with a boom sprayer or hand sprayer. Use a concentration of 0.1% Cadence in water (13 ounces) per 100 gallons every 7 to 10 days.

For use with liquid fertilization: Apply Cadence to liquid fertilizer/water solutions at the rate of 6 to 13 ounces per 100 gallons of mix.

For use with hand sprayer: Add a concentration of 0.1% v/v, or use the following spray rates per 1,000 square feet: 1/8 ounce of Cadence in 1 gallon of water, or 1/5 ounce of Cadence in 1.5 gallons of water, or 1/4 ounce of Cadence in 2 gallons of water.

Apply Cadence to liquid fertilizer/water solutions at the rate of 6 to 13 ounces per 100 gallons of mix.

As a dew control agent: For hand sprayer: Add a concentration of 0.1% v/v, or use the following spray rates per 1,000 square feet: 1/8 ounce of Cadence in 1 gallon of water, or 1/5 ounce of Cadence in 1.5 gallons of water, or 1/4 ounce of Cadence in 2 gallons of water.

Injection through irrigation: Adjust proportioning valve to inject at the ratio 1:1000, based on weekly application. To accommodate 100:1 proportioners, mix a 10% solution of Cadence and water and inject at 100:1.
