PLANT GROWTH REGULATOR FOR USE ON FIELD CROPS, VEGETABLES, TREE CROPS, SMALL FRUITS AND BERRIES, HERBS, ORNAMENTALS, SOD FARMS, TURF

HORMONE COMPOUNDS TO IMPROVE FERTILIZER EFFICIENCY AND STIMULATE PLANT GROWTH

ACTIVE INGREDIENTS:
- Indole-3-butyric Acid ................................................................. 0.0042%
- Gibberellic Acid ........................................................................ 0.0026%
- Kinetin ....................................................................................... 0.0084%

OTHER INGREDIENTS: .................................................................. 99.9848%

TOTAL .................................................................................................. 100.0000%

Contains 1.27 mgs of indole-3-butyric acid, 0.78 mgs of gibberellic acid and 2.54 mgs of kinetin/fluid ounce.
Concentrations based on biological activity.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See Inside Panel for Additional Precautionary Statements

EPA REG. NO. 5905-594
EPA Est. No.: Last letters of the batch code indicate producing establishment: 90753-CA-001 = CCA; 90753-IA-001 = OIA

NET CONTENTS: □ 2.5 Gallons (9.46 L) □ 275 Gallons (1040.99 L) □ Bulk

Manufactured For
HELENA CHEMICAL COMPANY
225 SCHILLING BOULEVARD, SUITE 300
COLLIERVILLE, TENNESSEE 38017
PRECAUTIONARY STATEMENTS

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear: Long-sleeved shirt and long pants, shoes plus socks.

USER SAFETY REQUIREMENT
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d) (4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS
Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS
For terrestrial uses:
- Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.
- Do not contaminate water when disposing of equipment washwater or rinsate.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted entry interval (REI). The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours unless wearing appropriate PPE. PPE and work clothing required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water, is:
- Coveralls
- Waterproof gloves
- Shoes plus socks.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Keep unprotected persons out of treated areas until sprays have dried.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or Tribe, consult the agency responsible for pesticide regulations.
Section Standard and that involves uses, and handlers of agricultural plants on farms, forests, and other areas during application. For any cultural plants on farms, forests, and other areas, this product must be applied in a way that will not exceed 2 pints of RECEPTO™ or the functional equivalent in the water supply line upstream from the point of pesticide introduction. As an option to the PRZ, Chemigation systems connected to public water systems must contain a functional, reduced-pressure zone, backflow preventer constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

Sprinkler CHEMIGATION

The system contains a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation line. The system must contain a functional check valve to prevent fluid from being withdrawn from the supply tank when the irrigation system is shut down. The system must contain a functional interlock to automatically shut down when the water pressure decreases to the point where pesticide distribution is adversely affected. The system must contain proper interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops, or in cases where there is no water pumps, when the water pressure decreases to the point where pesticide distribution is adversely affected. The system must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

CHEMIGATION SYSTEMS CONNECTED TO PUBLIC WATER SYSTEMS

Public water system means a system for the provision of treated water for human consumption, if such system is either automatically or manually shut down in the event of a backflow condition or in the event of any other event that will result in the flow of treated water from public water system. If you have questions about calibration, you should contact State Extension Service Specialists, equipment manufacturers or other experts. Do not apply when wind speed favors drift beyond the area intended for treatment.

Chemigation systems connected to public water systems must include a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the system is shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops, or in cases where there is no water pumps, when the water pressure decreases to the point where pesticide distribution is adversely affected. The system must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

RECEPTO™ should be applied at the end of the irrigation period in a sufficient amount of water to allow proper coverage of plant or crop but not to exceed 2 pints of RECEPTO™ per acre per application. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump. The pesticide injection pipeline must contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the system is shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops, or in cases where there is no water pumps, when the water pressure decreases to the point where pesticide distribution is adversely affected. The system must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

RECEPTO™ should be applied at the end of the irrigation period in a sufficient amount of water to allow proper coverage of plant or crop but not to exceed 2 pints of RECEPTO™ per acre per application. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump. The pesticide injection pipeline must contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the system is shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops, or in cases where there is no water pumps, when the water pressure decreases to the point where pesticide distribution is adversely affected. The system must use a metering pump, such as a positive displacement injection pump (e.g. diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
IN-FURROW/DRIP CHEMIGATION

1. Systems using a gravity flow pesticide dispensing system must meter the pesticide into the water at the head of the field and downstream of a hydraulic discontinuity such as a drop structure or weir box to decrease potential for water source contamination from backflow if water flow stops.

2. Systems utilizing a pressurized water and pesticide injection system must meet the following requirements:
   a. The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
   b. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.
   c. The pesticide injection pipeline must contain a functional, normally closed, solenoid operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.
   d. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
   e. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
   f. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Maintain agitation in the supply tank while adding the required amount of RECEPTOR™, and throughout the application. RECEPTOR™ should be added to the supply tank at the end of water application (prior to last complete cycle in moving systems). If the system has a sand media type filter, RECEPTOR™ should be injected into the water after it clears the filter.

IMPORTANT: Read the entire Directions For Use and the Warranty And Disclaimer Statement before using this product. If terms are not acceptable, return the unopened product container at once.

GENERAL INFORMATION

RECEPTOR™ is a plant growth regulator designed for use with fertilizers and/or pesticides. RECEPTOR™ increases fertilizer use efficiency when used as part of a standard crop fertility program. RECEPTOR™ can also be effective in the rate of growth and development of plant systems. RECEPTOR™ is formulated with a unique set of carboxylic and polyphenolic acids that assist the plant growth regulator’s impact on fertilizer use efficiency and can have a positive effect on beneficial soil micro-organisms. RECEPTOR™ is can be mixed with most liquid fertilizers and plant nutritional products.

SPRAY MIX COMPATIBILITY

RECEPTOR™ is compatible with a wide range of fertilizer and pesticide products. Good agitation must be maintained for those applications that contain pesticides. Always check compatibility prior to mixing and apply any pesticide spray mixes as soon as possible. In the event of pesticide mixing problems, the addition of a compatibility agent is recommended.

If this product is to be tank mixed with fertilizers or with other pesticides, compatibility should be tested prior to mixing. To test for compatibility, use a small container and mix a small amount (0.5 to 1 quart) of spray, combining all ingredients in the same ration as the anticipated use. If any indications of physical incompatibility develop; such as separation, sedimentation, gel formation, etc., do not use this mixture for spraying. Indications of incompatibility usually will appear within 5 to 15 minutes after mixing.

MIXING SEQUENCE

1. Water
2. Fertilizer
3. RECEPTOR™
4. Compatibility agent (if needed)
5. Pesticides
APPLICATIONS WITH SOIL APPLIED LIQUID FERTILIZER

For in-furrow, banded, side-dressed and broadcast applications through conventional equipment, apply **RECEPTOR™** in conjunction with and/or following the application of fertilizers and/or pesticides. Always jar test for compatibility. Best results are obtained when **RECEPTOR™** is incorporated, injected, or applied in a zone or band in the soil at a minimum depth of two (2) to four (4) inches.

TRANSPLANT SOLUTIONS

Mix 6-10 fl. oz. with each 100 gallons of transplant solution.

GENERAL DOSAGE RECOMMENDATIONS

**Row or Band and Injection Applications:** Use **RECEPTOR™** at the rate of 1-2 pints per acre.

**Broadcast Applications:** Use **RECEPTOR™** at the rate of 1-2 pints per acre.

RECOMMENDED CROPS

The following is a broad listing of crops on which **RECEPTOR™** is recommended for use. All commodities within an established crop group, as classified under 40 CFR § 180.41, are considered to be appropriate for this product. A brief listing of crops within each grouping is given after the group name as an example of those crops represented. The examples given are not meant to be an exhaustive list of those crops within any grouping, and should not be construed as such.

For application rates for any given crop, use at the general dosage recommendation above, unless otherwise indicated.

### VEGETABLES

#### BRASSICA (COLE) LEAFY VARIETIES:
- Broccoli
- Brussels Sprouts
- Cabbage
- Chinese Cabbage
- Cauliflower
- Chinese Mustard
- Collards
- Kale
- Kohlrabi
- Mustard Greens
- Rape Greens

#### CUCURBITS:
- Cantaloupe
- Casaba Melons
- Cucumbers
- Gherkins
- Gourds
- Honeydew Melons
- Mango Melons
- Muskmelons
- Pumpkins
- Summer Squash
- Watermelons
- Winter Squash

#### LEAFY VEGETABLES (EXCEPT BRASSICA):
- Celery
- Cress
- Endive
- Fennel
- Lettuce
- Orach
- Spinach
- Swiss Chard

#### ROOT, Tuber and Bulb Vegetables:
- Artichokes
- Burdock
- Carrots
- Cassava
- Chicory
- Garlic
- Ginger
- Ginseng
- Horseradish
- Leek
- Onion
- Parsley
- Parsnip
- Potato
- Radish
- Rutabaga
- Salsify
- Shallot
- Sweet Potato
- Turnips
- Yams

#### FRUITING VEGETABLES:
- Bell Peppers
- Chile Peppers
- Cooking Peppers
- Eggplant
- Ground Cherry
- Pepinos
- Pimentos
- Sweet Peppers
- Tomatillo
- Tomatoes

#### LEGUMES:
- Beans including *Lupinus sp.*, *Phaseolus sp.*, and *Vigna sp.*
- Broad Beans
- Chick Peas
- Guar
- Jackbean
- Lablab Beans
- Lentils
- Peas
- Peanuts
- Soybeans
FIELD CROPS:

CEREAL GRAINS:
Barley, Buckwheat, Corn, Millet, Oats, Popcorn, Rice, Rye, Sorghum (milo), Wheat (winter and spring), Wild Rice

COTTON

FORAGE:
Alfalfa, Clovers, Grasses, Timothy, Vetch

TREE CROPS

CITRUS:
Calamondin, Grapefruits, Kumquats, Lemons, Limes, Oranges, Tangelos, Tangerines

NUTS:
Almonds, Beech Nut, Brazil Nut, Butternut, Cashew, Chestnut, Chinquapin, Filberts, Hickory Nut, Macadamia Nut, Pecan, Pistachio, Walnut

POME FRUIT:
Apple, Crabapple, Mayhaw, Pear, Quince

STONE FRUIT:
Apricots, Cherries (Sweet and Sour), Nectarines, Peaches, Plums, Prunes

SMALL FRUITS AND BERRIES:
Blackberries, Blueberries, Boysenberries, Cranberries, Currants, Dewberries, Elderberries, Gooseberries, Grapes, Huckleberries, Olallieberries, Raspberries, Strawberries, Youngberries

MISCELLANEOUS COMMODITIES (NOT LISTED ELSEWHERE ON THIS LABEL):
AVACADO, HOPS, KIWIFRUIT, BANANAS, DATES, FIGS, PINEAPPLE, OLIVES, MANGO, OKRA, MUSHROOMS, PAPAYA, PERSIMMON.

ORNAMENTALS:
(Flowers, shrubs, trees, deciduous nursery stocks (trees, shrubs, and flowers), bedding plants and greenhouse crops and other ornamentals): Apply 1 pint in 100 gallons of water as a drench solution for soil and media, or apply 1 pint in 100 gallons of water as a directed spray. The applied spray solution should be incorporated into the root zone by irrigation or rainfall.

SOD FARMS:
Apply 1 pint per acre with fertilizer and irrigate to incorporate into the soil profile. Apply as needed during growing season.

TURF:
Greens, Tees, Fairways, Turfgrass and Lawns – Apply 1-2 pints in 100 gallons of water per acre and incorporate into the roots zone by irrigation.

STORAGE

Do not contaminate water, food or feed by storage and use of this product. Store out of reach of children.

PESTICIDE STORAGE: Protect from freezing. Store out of reach of children.

CONTAINER DISPOSAL:
NONREFILLABLE CONTAINER (EQUAL TO OR LESS THAN 5 G): Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

NONREFILLABLE CONTAINER (GREATER THAN 5 G): Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

NONREFILLABLE CONTAINER: Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product are hazardous material and should be disposed of by approved methods. Contact your local waste management facility for more information.

CONTAINER DISPOSAL:
NONREFILLABLE CONTAINER (EQUAL TO OR LESS THAN 5 G): Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

NONREFILLABLE CONTAINER (GREATER THAN 5 G): Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

REFILLABLE CONTAINER: Refill this container with product until it is full, cover, and securely fasten the container lid before final disposal. Seal, or store rinsate for later use or disposal. Repeat this procedure two more times.

IN CASE OF EMERGENCY, CALL CHEMTREC: 1-80

WARRANTY AND LIMITATIONS OF LIABILITY

Read the Conditions of Sale—Warranty and Limitations of Liability. The directions on this label are believed to be reliable as to the crop to which the product is applied. Application of the product may result in failure to follow the label directions or good application practice (the “Company”) or seller. In addition, failure to follow label direction may result in damage or loss to crops or property. The Company makes no other warranties or representations implied warranty of merchantability or fitness for any purpose referred to in the directions for use subject to the Company shall not be liable for any indirect, incidental, or consequential damages or expenses. The Company and the seller offer this product and the benefits therefrom, subject to the Company’s limitations of warranty, liability and remedies.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Protect from freezing. Store out of direct sunlight.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL:
- NONREFILLABLE CONTAINER (EQUAL TO OR LESS THAN 5 GALLONS): Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available.
- NONREFILLABLE CONTAINER (GREATER THAN 5 GALLONS): Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Offer for recycling, if available.
- REFILLABLE CONTAINER: Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

IN CASE OF EMERGENCY, CALL CHEMTREC: 1-800-424-9300.

WARRANTY AND DISCLAIMER STATEMENT

Read the Conditions of Sale–Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the "Company") or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:
1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
