15-0-5 Fertilizer with ACELEPRYN® Insecticide

GROUP 28 INSECTICIDE

For systemic control of white grubs and other listed pests invading landscape and recreational turfgrasses, golf courses, landscape ornamentals, interior plantscapes and ornamentals.

Not for sale, sale into, distribution and/or use in Nassau, Suffolk, Kings, Queens Counties of New York State.

Active Ingredient

Chloranthracene* 0.05%

Inert Ingredients 99.95%

TOTAL 100.00%

EPA Reg No. 9198-247

Underlined letter is first letter used in trade name on code bag

*Chloranthracene belongs to the anthracenid dimer chemical class.

Guaranteed Analysis

Total Nitrogen (N) 15.00%

Soluble Potash (K2O) 5.00%

Plant nutrients derived from urea and potassium chloride.

Chlorine (Cl) Max. 4.24%

*+5.0% nitrogen stabilized with maleic-anhydride co-polymer

Information regarding the contents and labels of use is available on the internet at http://www.regulatoryaffairs.co.uk

Florida Applications: We recommend that you follow the Florida Green Industries BMP’s at: http://www.fiae.org/dfmp/DFMP_Book_final.pdf

We recommend that you follow the Florida Golf Course BMP’s at: http://www.fiae.org/pdf/golf BMP.pdf

KEEP OUT OF REACH OF CHILDREN

CAUTION

If used as intended the active ingredients pose minimal risk to aquatic organisms. But care should be used when handling near or entering water to prevent harmful effects.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read and understand the entire label before using this product.

This product must be used only in accordance with the labeling and with the Worker Protection Standard, 40 CFR part 195. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, demography, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on the label about personal protective equipment, restricted-entry interval, and notification to workers (as applicable). Do not apply this product in a manner that will contact workers or others persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

For early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water: eat, drink, chew gum, or use tobacco.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural use, 40 CFR 195. The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Professional applications to golf courses, residential, industrial and commercial lawns and sports fields are not within the scope of the Worker Protection Standard.

Do not allow other workers to enter the treated area while application is in progress.

PRODUCT INFORMATION

This product may be applied for the control of white grubs and other listed pests invading landscape and recreational turfgrasses, golf courses, landscape ornamentals and interior plantscapes.

This product may be used on plants or turfgrasses that are being grown for aesthetic or recreational purposes or for ultimate modification in or around homes, lawns, commercial lawns, industrial facilities, residential dwellings, business and office complexes, shopping complexes, multi-family residential complexes, institutional buildings, airports, cemeteries, interior plantscapes, ornamental gardens, parks, wildlife refuges, playgrounds, schools, day-care facilities, golf courses (the box areas, greens, walkways, greens, collars etc.), athletic fields, solar farms and other landscapes areas.

This product must not be applied when the soil is saturated with water because adequate distribution of the active ingredient vertically in the soil profile cannot be achieved under this condition.

This product is in GROUP 28 of the EPA’s Insecticide and Arachnicide Group Based on Target Site of Action (EPA PR Notice 2001-5) and may be used in residential lawn maintenance programs.

Due to pest activity differences, consult your local cooperative extension service for guidance. To find your local extension agent, visit www.csrees.usda.gov.

APPLICATION EQUIPMENT

Apply this product using drop-type, rotary-type or hand-held application equipment. The application equipment must be properly calibrated according to the manufacturer’s directions to ensure uniform coverage over the treated area. During application, the equipment must be checked periodically to confirm that it is working properly and that the materials are being uniformly distributed.

APPLICATION TIMINGS

Weekly Uniform Application: Apply this product from late April to early September for preventative and early curative control of all major white grub species infesting turfgrass. The need for an application may be based on historical monitoring of the area, previous lawn or experience, current seasonal adult beetle population or other facts. The highest rate listed for white grubs control in Table 1 may be required in late August or early September when severe infestations and/or grubs are present at the time of application. Irrigate turf immediately after application or allow rainfall to move the product into the root zone.

Annual Bluegrass Weevil: Apply this product in late April or early May when overwintered adult annual bluegrass weevils are observed, to prevent damage from first generation larvae in late May and June. An application of this product at this time will also provide white grub control. The highest rates listed in Table 1 may be required for applications made after mid-May.

Billbugs: Apply this product when overwintered adult billbugs are first observed. This will usually occur in late April or early May in regions with cool-season turfgrasses. An application of this product at this time will also provide white grub control. The highest rates listed in Table 1 may be required for applications made after early May or when billbug species other than bluegrass billbug are present.

European Crane Fly: Apply this product between September and November to control European Crane Fly larvae in turfgrass. The highest rates listed in Table 1 may be required to achieve control when applications are made in November.

Turf Caterpillars: This product will provide effective caterpillar control in turfgrass. If the area being treated is maintained at a mowing height of one inch or greater, then the highest rate listed in Table 1 may be required during periods of high pest pressure.

Chinch Bugs: For suppression of chinch bugs, apply this product before egg hatch.

APPLICATION RATES FOR LAWNS, GOLF COURSES AND OTHER RECREATIONAL TURFGRASS AREAS

Table 1 provides the application rates that will control the listed turfgrass pests. For maximum residual effectiveness or for optimal control of large pest infestations, apply this product at up to 500 pounds per acre (0.23 lb ai/A) to control any of the pests listed in Table 1. Payload: Do not apply more than 750 pounds per acre (3.25 lb ai/A) of active ingredient of product per acre per year in broadcast applications to turfgrass.

APPLICATION RATES FOR ORNAMENTAL PLANTS

Table 2 provides the application rates that will control the pests of landscape ornamentals and interior plants. Black plastic or other weed barrier materials that are impermeable to water should be removed before application. For maximum residual effectiveness or for optimal control of large pest infestations, this product may be applied up to 1,000 pounds per acre (0.3 lb A/A) to control any of the pests listed in Table 2.

RESISTANCE MANAGEMENT

Some insects are known to develop resistance to products used repeatedly for control. When this occurs, the recommended doses fail to suppress the pest population below threshold levels. Because the development of resistance cannot be predicted, the use of this product should conform to resistance management strategies established for the use area. These strategies may include incorporation of cultural and biological control practices, alternation of active classes of insecticides, and targeting the most susceptible life stages. Consult your local Cooperative Extension Service specialist or pest control advisor for the latest information on resistance management in your area.

RESTRICTIONS

- Not for use on plants being grown for sale or other commercial use, or for commercial seed production.
- Do not formulate this product into or end-use products.
- Do not apply this product in commercial nurseries and greenhouses.
- Do not apply more than 750 pounds (equivalent to 0.5 lb of active ingredient) of product per acre per year in broadcast applications to turfgrass.
- Do not apply more than 300 pounds (equivalent to 0.2 lb of active ingredient) of product per acre in a single application on sod forms.
- Wait a minimum of 7 days to reseed.
- Do not apply by air.
- The following restrictions are required to permit use of this product in the State of New York: Golf Courses:
  - Greens, tee boxes: Do not apply this product within 25 feet of a water body (lake, pond, river, stream, wetland, or drainage ditch)
  - Fairways: Do not apply this product within 50 feet of a water body (lake, pond, river, stream, wetland, or drainage ditch)
  - All other use sites: Do not apply this product within 100 feet of a water body (lake, pond, river, stream, wetland, or drainage ditch)

Suggested Spreader Settings

These suggested spreader settings are not intended to replace calibration. Please calibrate your spreader before applying product.

<table>
<thead>
<tr>
<th>Spreader Model</th>
<th>Ground Speed</th>
<th>Width of Coverage</th>
<th>Low Rate</th>
<th>Medium Rate</th>
<th>High Rate</th>
<th>Heavy Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product (ft/lb)</td>
<td></td>
<td></td>
<td>0.1 lb/a</td>
<td>0.5 lb/a</td>
<td>1.0 lb/a</td>
<td>1.5 lb/a</td>
</tr>
<tr>
<td>1.0 lb/a</td>
<td></td>
<td></td>
<td>0.5 lb/a</td>
<td>1.0 lb/a</td>
<td>1.5 lb/a</td>
<td>2.0 lb/a</td>
</tr>
</tbody>
</table>

These spreader settings were established using standard equipment available from the spreader manufacturer at width limits and speeds typically used within the industry. Calibrate all spreader equipment at the time of application to achieve labeled application rates.

STORAGE AND DISPOSAL

- Do not contaminate water, food, or feed by storage or disposal.
- PESTICIDE STORAGE: Store product in original container only in a location inaccessible to children and pets. Do not contaminate water, other pesticides, fertilizer, food or feed in storage.
- PESTICIDE DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.
- CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Warranty Disclaimer and Limitation of Liability.

WARRANTY DISCLAIMER AND LIMITATION OF LIABILITY:

Manufacturer warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purpose stated on the label when used in strict accordance with the directions. To the extent consistent with applicable law, manufacturer makes no other express or implied warranty of MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. To the extent consistent with applicable law, it is manufacturer's intent to LIMIT ANY LIABILITY FOR SPECIAL, CONSEQUENTIAL OR INCIDENTAL, ECONOMIC DAMAGES in regard to purchase price or replacement of product, or buyer's choice. To the extent consistent with applicable law, manufacturer disclaims any liability for compensatory or other damages arising out of any use contrary to label directions. Use contrary to label directions is not permitted.

LEGAL RIGHTS:

This limited warranty gives you specific legal rights; you may have other rights that vary from state to state/jurisdiction to state/jurisdiction.
