KEEP OUT OF REACH OF CHILDREN
DANGER PELIGRO

See side panel of label for additional precautionary statements.

First Aid

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF SWALLOWED: Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration. Preferably mouth-to-mouth, if possible. If ventilation is needed, give artificial respiration.

NOTE TO PHYSICIAN: Probable mucous damage may contaminate the use of gastric lavage.

Effective in hard water up to 400 ppm hardness (Calculated as CaCO3) in the presence of 5% serum contamination.

Non-Dulling to Floor Finishes.

Meets OSHA Bloodborne Pathogen Standard for HIV, HBV and HCV.

ACTIVE INGREDIENTS:

Disoclyl Dimethyl Ammonium Chloride 5.07%

n-Alkyl (C14 50%, C12 40%, C16 10%)

dimethyl benzyl ammonium chloride 3.38%

INERT INGREDIENTS:

1.55%

TOTAL: 100.00%

EPA Reg. No. 10324-155-10648

DIRECTIONS FOR USE

This is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Before using this product, food products and packaging materials must be removed from the room or carefully protected. Do not use this product to clean, sanitize, or disinfect utensils, glassware, dishes, or interior surfaces of appliances.

Prior to use of this product, cover or remove all food and packaging material before disinfection and remove all animals and feeds from premises, animal transportation vehicles, and enclosures. Remove all litter, droppings, and manure from the floors, walls, and surfaces of barns, pens, stalls, chutes, and other surfaces of facilities and fixtures occupied or traversed by poultry or other animals. Empty all troughs, pens, and other feeding and watering containers. Thoroughly clean surfaces with soap and detergent and rinse with water. Do not use in milking units, milking parlors, or milk houses.

DISINFECTION/GENERAL DISINFECTION/VRUCIDAL/FUNGICIDAL/MOLD AND MILDEW PERFORMANCE IN INSTITUTIONS AND NON-MEDICAL FACILITIES: Mix 1 ounce of this product to 1 gallon of water (1:128).

For use with water hardness up to 400 ppm. For highly soiled areas, a preliminary cleaning is required. Apply solution to hard surfaces using a scrub brush, hand pump, or other treatment equipment. For wall and ceiling surfaces, use a sprayer or trigger sprayer device. For porcelain, chrome, or other non-porous surfaces, use a detergent agent or a combination of detergent and disinfectant.

For use on non-porous objects, use a detergent agent or a combination of detergent and disinfectant. For use on non-porous surfaces, use a detergent agent or a combination of detergent and disinfectant. For use on non-porous surfaces, use a detergent agent or a combination of detergent and disinfectant. For use on non-porous objects, use a detergent agent or a combination of detergent and disinfectant. For use on non-porous surfaces, use a detergent agent or a combination of detergent and disinfectant.

FOR USE AS A ONE-STEP CLEANER/DISINFECTANT:

1. Pre-clean heavily soiled areas.

2. Apply solution of 1 ounce of this product per 1 gallon of water (620 ppm active) to hard, non-porous surfaces using a sponge, brush, cloth, mop, or automatic scrubber. For wall and ceiling surfaces, use a sprayer or trigger sprayer device. For porcelain, chrome, or other non-porous surfaces, use a detergent agent or a combination of detergent and disinfectant.

3. Rub with brush, cloth, mop, or sponge. Treated surfaces must remain wet for 10 minutes. Wipe up excess liquid and allow to air dry.

FOR DISINFECTING HARD, NON-POUROUS SURFACES AGAINST AVIAN INFLUENZA A (H5N1) (H7N9) INFLUENZA A (H1N1) VIRUS: For use in hospitals, animal premises, and other animal use settings, follow the DISINFECT/GENERAL DISINFECTION/VRUCIDAL/FUNGICIDAL/MOLD AND MILDEW PERFORMANCE IN INSTITUTIONS AND NON-MEDICAL FACILITIES directions.

DILUTION GUIDE:

- For General or Broad Spectrum claims: 1 oz/1 gal water
- For Public Health Virucidal claims: 1 oz/1 gal water
- For Animal Virucidal claims: 1 oz/1 gal water
- For Mold and Mildew/Fungicidal claims: 1 oz/1 gal water

This product is not to be used as a terminal sterilant/high-level disinfectant on any surface or instrument that is (1) introduced directly into the human body, either as or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not normally penetrate the blood barrier or otherwise enter normally sterile areas or the body. This product can be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

This product is a Hospital Use Disinfectant at 1 ounce of this product per 1 gallon of water (1:128 dilution) in the presence of 400 ppm hard water. When used as directed at 1:128 dilution 1 ounce of this product per 1 gallon of water, this product contains 620 ppm of active quaternary ammonium. This product is highly effective against a broad spectrum of pathogenic microorganisms.

KILLS HIV, HBV, and HCV on PreCleaned Environmental Surfaces: Objects previously soiled with Bloodbody Fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of hard non-porous objects and surfaces with blood or body fluids and in which the surfaces or objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (HIV-1) and Hepatitis C Virus (HCV).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV AND HCV ON SURFACES/OBJECTS SOILED WITH BLOODBODY FLUIDS.

Personal Protection: Clean up must always be done wearing protective latex gloves, gowns, masks and eye protection.

Cleaning Procedure: Blood and other body fluids containing HIV-1, HBV and HCV must be thoroughly cleaned from hard non-porous surfaces with a detergent agent or a combination of detergent and disinfectant. Disposal of Infectious Materials: Blood and other body fluids, cleaning materials and covering must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

Contact Time: Leave hard non-porous surfaces wet for 10 minutes.

SURGICAL INSTRUMENT PRESOAK: Add 1 ounce of this product per 1 gallon of water (620 ppm active). Place pre-cleaned instruments in solution to pre-soak for a minimum of 10 minutes, then proceed with normal sterilization procedure. Prepare a fresh solution at least daily or more often if use solution becomes visibly soiled.

Sterilization of Instruments: Instruments can be sterilized without rinsing. Sterilization can be accomplished with hot water, steam or gas sterilization equipment. Liquid sterilization procedures must use the same procedures for sterilization as those used for surgical instruments.
CLEANING AND DISINFECTING HARD, NON-POROUS SURFACES ON PERSONAL PROTECTIVE EQUIPMENT (RESPIRATORS): Pre-clean equipment if heavily soiled to ensure proper surface contact. Apply a 1-ounce product to 1 gallon of water use solution (660 ppm active). Gently mix for uniform solution. Apply use solution to surfaces of the respirator with a brush, cloth, mop, sponge, auto scrubber, mechanical spray device, hand pump, coarse pump, or trigger spray device or by immersion. Thoroughly wet all surfaces to be disinfected. For spray applications, spray 8-6 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. Thoroughly wet the contaminated areas with 1 oz of this product per 1 gallon of water (660 ppm active) and allow to stand undisturbed for 10 minutes. Carefully remove contaminated material and dispose of by burial or burning. Contact your local and state health department for additional disposal methods.

1. Thoroughly wet any area following the label directions and allow solution to stand undisturbed for 10 minutes.

TERRARIUM AND SMALL ANIMAL CAGE AND CAGE FURNITURE SANITIZATION: Animals require frequent sanitation on hot rocks and other hard-non-porous cage furniture items inside your terrarium. This can result in high bacteria and antibiotic levels that can lead to possible infection/disease in your animals. When used regularly this product can eliminate many of these high bacteria/antibiotic levels in your cage and on your cage furniture items. Use on clothing and not allowed in CA.

1. Remove all animals.

2. Thoroughly clean all surfaces and objects including the substrate in the terrarium or cage with soap or detergent and rinse with water.

3. Saturate all hard non-porous surfaces such as floors, walls, cages and other washable hard, non-porous surfaces with the disinfecting and virucidal* solution of 4 oz. of this product per gallon of water as to wet thoroughly and leave all saturated wet for a period of 10 minutes.

4. Apply by cloth, mop, brush, sponge, auto scrubber, mechanical spray device, hand pump, coarse pump or trigger spray device or by immersion. For spray applications, spray 8-6 inches from surface. Do not breathe spray. Rub with brush, cloth, or sponge. For smaller surfaces, use a trigger spray bottle to spray all surfaces with solution until thoroughly wet.

5. Allow surfaces to remain wet for a period of 10 minutes.

6. Thoroughly scrub all treated surfaces except: gravel with soap or detergent and rinse with potable water before returning to terrarium.

7. Saturate gravel as above and let stand for 10 minutes. Place in bucket of clean water and swirl for 15-30 seconds. Thoroughly air dry before returning to terrarium.

8. Do not return animals to the habitat until it is dry and ventilated.

9. Clean terrarium at least once weekly or more as needed. Change cloth, sponge or towels frequently to avoid redeposition of soil.

10. Prepare a fresh solution at least daily or more often if use solution becomes visibly soiled.

Note: Do not apply this product directly onto the small animal. If this product comes into contact with the small animal's skin, then immediately wash the material off the animal with lukewarm water. If the small animal ingests the product, contact your veterinarian immediately. Substrates for desert terrariums (i.e. gravel) must be completely dry before returning to terrarium to avoid high humidity levels. Always replace substrate if a foul odor persists.

REPTILE TANK CLEANING AND DISINFECTION DIRECTIONS: Remove all reptiles from the enclosure prior to cleaning and disinfecting. Remove all filter or draping from surfaces. Empty all equipment used for feeding or watering reptiles. Thoroughly clean all surfaces with soap or detergent and rinse with water. Saturate with disinfecting and virucidal* solution of 1 oz of this product per gallon of water (660 ppm active) to hard non-porous surfaces of the enclosure. Apply by cloth, mop, brush, sponge, auto scrubber, mechanical spray device, hand pump, coarse pump or trigger spray device or by immersion until thoroughly wet. For spray applications, spray 8-6 inches from surface. Do not breathe spray. Allow surfaces to remain wet for 10 minutes. Wipe dry. Rinse all surfaces that come in contact with food or water before reusing. Allow the enclosure to ventilate for a minimum of 10-15 minutes before replacing the reptiles. Change cloth, sponge or towels frequently to avoid redeposition of soil.

Prepare a fresh solution at least daily or more often if use solution becomes visibly soiled.

Note: Do not apply this product directly onto the reptiles. If the product comes into contact with the reptile's skin, then immediately wash the material off the animal with lukewarm water. If the reptile ingests this product, contact your veterinarian immediately.

FOR USE AS A CLEANER: Apply 1/4 - 1 oz of use solution to surfaces. Rinse and allow to air dry. For heavy-duty use, apply 2 ounces of use solution to clean surfaces.

DIRECTIONS FOR ALTERNATE CONTAINERS/DELIVERY SYSTEMS

TRIGGER SPRAYERS: Fill container from dispenser: Apply to surfaces according to directions above.

MOP BUCKETS: Fill bucket from dispenser. Set up "Wet Floor" signs. Mop floor surfaces as specified in directions above.

REFILLS

To Refill Concentrate From Large Containers Into Smaller Containers: This product may be used to fill and refill clean, properly labeled containers for dilution elsewhere within your facility. Make sure the small container has been cleaned and properly labeled according to state and local regulations. Also make sure other items (funnels or hand pumps) are properly cleaned and dried. To refill, simply pour from the larger container directly into the smaller one being careful not to spill any product. Keep both containers sealed when not in use.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

CONTAINER HANDLING/PESTICIDE STORAGE: Store only in original container. Do not reuse empty container. Thoroughly wash, dry feed, seed, fertilized material from all packaging and label. Keep this product under looked storage sufficient to make it inaccessible to children or persons unfamiliar with proper use.

REPELLENT INSTRUCTIONS: Triplet rinse as follows: Fill the container 1/4 full with water and recap. Agitate vigorously and drain for 10 seconds after the flow begins to drip. Repeat Pesticide Disposal instructions for inside disposal. Repeat two more times. Wipe container and put in trash or offer for recycling as available.

PESTICIDE DISPOSAL: Pesticides wastes are hazardous. Improper disposal of excess pesticide, spray pond or sink is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste/Residues Services division at the nearest EPA Regional Office for guidance.

REPELLENT DISPOSAL: Non-refillable container. Do not reuse this container to hold materials other than pesticides or diluted pesticides. Offer for recycling if available or puncture and dispose in a sanitary landfill, or by other procedures approved by state and local authorities. Follow Pesticide Disposal instructions.
