KEEP OUT OF REACH OF CHILDREN

ACTIVE INGREDIENT:
Tralopyril 6.00%
Zinc Pyrithione 4.80%

INERT INGREDIENTS: 89.20%
TOTAL 100.00%

This product contains petroleum distillates.
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Causes skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if inhaled. Avoid breathing spray mist, vapors or sanding dust. While spraying and/or sanding boat surfaces, wear a NIOSH/MSHA certified mask or respirator. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear coveralls worn over long-sleeved shirt and long pants, chemical resistant gloves, protective eyewear (goggles, dust face shield or safety glasses), socks, and chemical resistant footwear. Remove contaminated clothing and wash clothing before reuse. May pose an aspiration pneumonia hazard.

For applications by residential (non-commercial) users: Do not apply by airless spray; Do not apply more than one coat of this product within 24 hours; Apply only in outdoor, non-enclosed spaces.

While more than one coat of this product within 24 hours: Apply only in outdoor, non-enclosed spaces. (MSHA/NIOSH Regional Office)

PHYSICAL OR CHEMICAL HAZARDS: COMBUSTIBLE!

This product's state-of-the-art organic biocide combines the latest technology with the highest quality organic (CALIFORNIA) biocide to eliminate almost any kind of marine growth. Our new Pettit Marine Paints line of products contain no copper or other toxic materials. Pettit Marine Paints is a copper free antifouling protective coating resistant to slime, algae, barnacles and other marine and freshwater fouling organisms.

This product's state-of-the-art organic biocide technology coupled with an unique ablative vehicle minimizes coating build-up and keeps underwater surfaces smooth and clean. This product is for use in fresh, salt or brackish water on hulls and underwater parts below the waterline. This paint is intended for use on recreational and commercial vessels of any size.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PREPARATION OF SURFACE: The surface to be painted should be clean, dry and free of any contamination or foreign matter. Always prepare the surface to be painted by sanding and solvent cleaning before any paints or primers are applied. When sanding old antifouling paint use a dust mask to prevent the inhalation of sanding dust. Old, soft bottom paints must be completely removed before applying.

COVERAGE, APPLICATION AND TEMPERATURE: This product can be applied by brush or short nap roller. All painting should be done between 9:00 a.m. and 4:00 p.m. in order to avoid the possibility of dew or condensation spoiling the application. The temperature range of application should be between 50 and 90°F. On warm days, apply no more than three coats, should be applied for best performance, particularly in high wear areas such as the waterline. This product will cover approximately 500 square feet per gallon when applied at 2 dry films mill thickness.

PREPARATION OF PAINT: This product may exhibit pigment settling, especially if the paint has been on the shelf for several months. It is necessary to thoroughly mix the paint before using. If possible shake the can of paint on a mechanical paint shaker. Before using check the side and bottom of the can to make sure all the pigment has been mixed in. If mixing is going to be done with a wooden propeller or an electric drill mixer, pour half of the liquid from the top of the can into another can and then properly mix in any settled pigment, then remix the two parts together thoroughly.

THINNING: Use Pettit 120 Brushing Thinner for thinning this product if needed, particularly on warm or breezy days. Do not thin more than 10% (12 ounces per gallon) or inadequate paint film thickness will occur and premature erosion of the finish will be likely.

DRY TIMES:

<table>
<thead>
<tr>
<th>Time</th>
<th>Roll to recoat</th>
<th>Roll to launch</th>
</tr>
</thead>
<tbody>
<tr>
<td>90°F</td>
<td>2 hours</td>
<td>2 hours</td>
</tr>
<tr>
<td>70°F</td>
<td>3 hours</td>
<td>4 hours</td>
</tr>
<tr>
<td>50°F</td>
<td>6 hours</td>
<td>8 hours</td>
</tr>
</tbody>
</table>

The above dry times are minimums. This product may be recoated and launched after the minimum times shown. There is no maximum time before launching.

SYSTEMS

Mix paint thoroughly to ensure toxics are evenly dispersed throughout the can. All surfaces must be clean, dry and properly prepared prior to painting.

PREVIOUSLY PAINTED SURFACES: If the previous coating is in good condition, thoroughly sand with 80-grit sandpaper, then solvent clean with Pettit 120 Brushing Thinner to remove residue. Apply two finish coats of this product after the previously coating is soft or in poor condition, remove to the bare surface by sanding or using a paint and varnish remover. Proceed with appropriate bare system as described below.

BARE FIBERGLASS: All bare fiberglass, regardless of age, should be thoroughly cleaned with 92 Bio-Blue Pre-Paint Cleaner followed the instruction on the Bio-Blue can. Sand thoroughly with 80-grit sandpaper to a dull, frosty finish and wash the sanded surface with fresh water to remove sanding residue. Then apply two coats of this product following application instructions. Careful observation of the previous instructions will help ensure long-term adhesion of this and subsequent years' antifouling paint. To eliminate the sanding operation, scrub the surface using 92 Bio-Blue Pre-Paint Cleaner and a coarse Scotch-Brite® pad. Clean-up all residue with fresh water and allow the hull to dry thoroughly. Then apply one coat of Pettit 6998 Skip Sand Primer. Read and follow carefully the application and topcoating instructions on the Skip Sand Primer label. Let dry at least two coats of this antifouling paint.

BARE ALUMINUM: Sandblast to clean, bright metal and remove blasting residue with clean, dry compressed air or a clean brush. Immediately apply two coats of Pettit 4400/4401 Aluma Protect Epoxy Primer followed by two finish coats of this product. Read and follow carefully the instructions on the 4400/4401 Aluma Protect Epoxy Primer label. If the surface to be painted is smooth aluminum, apply one coat of 5455 Primer and allow to dry for 2 hours, then apply two finish coats of this product. Read and follow carefully the instructions for application and topcoating on the 6455/044 primer label.
