ENVIRONMENTAL HAZARDS

This product is extremely toxic to fresh water and estuarine fish and invertebrates. Runoff from treated areas into a body of water may be hazardous to fish and aquatic invertebrates.

Do not apply over bodies of water (lakes, rivers, permanent streams, natural ponds, commercial fish ponds, swamps, marshes, estuaries), except when necessary to target areas where adult mosquitoes are present, and weather conditions will facilitate movement of applied material away from the water in order to minimize incidental deposition into the water body. Do not contaminate water when disposing of equipment rinsate or wash waters.

When used for mosquito adulticiding:

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow drift when bees are foraging the treatment area, except when applications are made to prevent or control a threat to public health or other health dangers determined by a state, tribal or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes, or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

When applied outdoors for fly control:

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow drift when bees are foraging the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**STORAGE AND DISPOSAL**

This product is for use on or near crops, vegetables, or any other treatment area. Do not allow this product’s diode rate to exceed 20 ft/s. Where alcohol is used, control the alcohol to prevent any risk of fire or explosion. The diode rate of the product is based on the diode rate of the equipment used. The equipment must be adjusted so that the volume median diameter (VMD) is between 8 - 30 microns (8 μ ≤ Dv0.5 ≤ 30 μ) and that 90% of the spray is contained in droplets smaller than 20 microns (Dv0.9 ≤ 20 μ). This product is approved for application as an Ultra-Low Volume (ULV) aerosol to control adult mosquitoes, black flies, gnats, and non-biting midges, stable flies, horseflies, and deerflies.
