ZoGuard Plus for Cats contains Fipronil and S-Methoprene (insect growth regulator) to effectively kill fleas (all stages) and ticks (including those that may transmit Lyme disease). The active ingredients in ZoGuard Plus for Cats feature a sustained release formula developed for fast-acting and long-lasting control of fleas, ticks, and chewing lice for 1 month on cats only.

- **Fast-acting:**
  - Rapid elimination of chewing lice infestation
  - Effective against fleas, ticks, and chewing lice for 1 month on cats only.

- **Long-lasting:**
  - Kills fleas, ticks, and chewing lice for up to 6 weeks.
  - ZoGuard™ Plus for Cats kills adult fleas for up to six weeks. Apply monthly if your cat is at high risk for flea reinfestation.

- **Effective:**
  - Breaks the Flea Life Cycle
  - Kills brown dog ticks, American dog ticks, lone star ticks, adult deer ticks, and prevents the development of flea pupae for up to 1 month on cats only.

- **Preventive:**
  - Zo to effectively kill fleas (all stages) and deer ticks for up to 1 month on cats only.

- **Easy to apply:**
  - Hold the cat for a few seconds to give the solution time to be absorbed into the cat's coat. When finished, wrap the tube in plastic wrap and discard in a non-recycling container.

- **Side Effects:**
  - Monitor your cat after application. Cats may experience some temporary irritation at the site of product application, increased vocalization, and other signs or effects of local or systemic dermal reactions, such as itching, scratching, redness, or swelling that resolve within 24 hours. If these or other side effects occur, consult your veterinarian or call 1-866-345-7689.

- **Precautions:**
  - For external use on cats only. Individual sensitivities, while rare, may occur after application of any pesticide product on cats. Careful consideration should be used with puppies, for the death rate of unsupervised puppies to cats has been reported.

- **Dosage:**
  - Treat cats over 8 weeks of age and over 1.5 lbs weighing less than 1.5 lbs. Do not double-dose cats. Use entire contents of tube vial on each cat. Separate the treated cat from all other cats and dogs for 24 hours after treatment has been applied.

- **Care Instructions:**
  - Remove product tubes from the package. Hold the tube with the tip pointing up and away from the face and body. Use scissors to cut off the short end at the notches along the line. Pointing up and away from the face and body. Use scissors to cut off the narrow end at the notches along the line.

- **Disposal:**
  - Place tube over cat and use open end to part cat's hair. Apply contents of one tube of ZoGuard Plus for Cats as a spot on treatment to the first cephalic or interscapular area, as shown in the diagram. Do not treat your cat with more than one tube or dose per application area per treatment, because severe skin irritation or skin necrosis may occur. Immediately bath or wash your cat after application.
