ADJUVANT HW
Acid Activator

DIRECTIONS FOR USE: ADJUVANT HW is used as an acid activator in the activation of sodium chlorite solutions in a chlorine dioxide generator.

ADJUVANT HW is typically used at 3 to 6 times the feed rate of the sodium chlorite product. Your CH2O technical sales representative can guide you in the proper feed rate during installation and set-up of the chlorine dioxide generator system.

NEVER combine the chlorite and acid products without using a generator. When the two products are mixed, the reaction can be explosive and liberate heat and toxic gases. Proper use of a generator will contain any reaction and dilute the chlorine dioxide to a safe and usable strength. Be sure to read the Safety Data Sheet for this product before handling or use.

PRECAUTIONARY STATEMENTS: DANGER. This is an acid product. Eye contact will cause severe eye damage with possible burns. Prolonged or repeated skin contact will cause irritation with possible severe burns. Ingestion will cause damage to the stomach and other tissue contacted. Excessive inhalation of product dust/mist can cause irritation and/or burns to the respiratory system. Do not breathe dust/mist/vapors/spray. Wear impervious gloves and safety glasses or goggles when handling product. If vapors are present at or above TLV respiratory protection must be worn. Wear additional protective clothing as necessary to minimize contact with product.

FIRST AID: If exposed, immediately contact Poison Control Center or physician. EYES: Flush with large amounts of water for several minutes, lifting upper and lower lids occasionally. Remove contact lenses if present and continue rinsing. Get medical attention if irritation persists. SKIN: Wash exposed areas thoroughly with soap and water. Remove contaminated clothing and launder before reuse. If skin feels slippery, continue washing until skin feels gone. Contact a physician if irritation persists. INGESTION: Rinse mouth. Give large quantities of water. DO NOT induce vomiting. If vomiting occurs administer additional fluids. Contact a physician for further directions. Never give anything by mouth to an unconscious person. INHALATION: Remove individual to fresh air. Keep at rest in a position comfortable for breathing. If breathing is difficult, give oxygen.
