Modified Vegetable Oil / Nonionic Surfactant

Principal Functioning Agents
Methylated vegetable oil, polyether modified polysiloxane, alkylphenol ethoxylate.....................................................100.0%
Total...............................................................................................................................................................................100.0%

All ingredients are exempt from the requirements of a tolerance as specified in 40 CFR 180.

Hazard Statements
Causes skin irritation. Causes serious eye irritation. Harmful if swallowed.

Precautionary Statements
Wash thoroughly after handling. Wear protective gloves/eye/face protection. Avoid breathing fumes/mist/vapor/spray. Do not eat, drink, or smoke while using this product. IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists, get medical advice/attention. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. Refer to back label for more First Aid statements.

Environmental Hazards
Do not contaminate water sources by cleaning of equipment or disposal of wastewaters.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

Storage: Do not store near heat or open flame. Store in original closed container. Store above 32º F. Store at ambient temperature.

Pesticide/Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill. Dispose of contents/container in accordance with local/national regulations.

Net Contents
2.5 Gallons (9.46 Liters) or 2 x 2.5 Gallons (18.93 Liters)
First Aid

If in Eyes: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists, get medical advice/attention. Call a poison control center or doctor for treatment advice.

If on Skin or Clothing: Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. Call a poison control center or doctor for treatment advice.

General Information

Clarion is a unique blend of highly refined and modified spray oil and nonionic organosilicone surfactant.

Clarion’s unique chemistry allows for enhanced wetting and absorption of those pesticides or products with labels recommending the addition of a spray adjuvant to improve performance.

The addition of Clarion to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics, the result being a more uniform spray deposit. Observe the initial application to insure thorough coverage without excessive runoff of the spray.

NOTE

The application rates on this label are based on pesticide labels which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased for optimum results, follow pesticide labeling for proper recommendations. Before using Clarion where a nonionic surfactant may not be recommended the user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial.

Not For Aquatic Use

Directions For Use

Clarion is intended for use with pesticides that are labeled for agricultural and non-agricultural uses. Not for aquatic use. The use of Clarion can increase pesticidal activity where the following factors occur, but is not limited to: 1) Low humidity and high temperatures; 2) Low water volume rates of less than 15 gallons per acre; and 3) when target species are larger than the label recommendations at time of application.

APPLICATION RATES PER 100 GALLONS:

Aerial: 6 - 16 pints          Ground: 3 - 5 pints

Mixing

Prior to pesticide application, clean mixing and application equipment according to pesticide label directions. To minimize foaming fill spray tank 2/3 or 3/4 full of water and begin agitation. If foaming is anticipated the addition of an antifoaming agent should be added before pesticides, nutrients, or Clarion.

Add pesticides and/or fertilizers as directed by label or in the following sequence:
1) Micronutrients and fertilizers;
2) Dry flowables and dispersible granules;
3) Flowables;
4) Water soluble pesticides;
5) Emulsifiable concentrates.

Continue agitation and add Clarion, when completed, reduce agitation and allow to mix for 1 to 2 minutes. While under minimal agitation, continue filing tank and allow to mix for 10 to 15 minutes prior to application.

NOTE: For optimum results, spray mixes containing Clarion should be applied within 36 hours.
