AzoTech is a formulation of two fungicides acting synergistically to inhibit the growth of many fungi associated with odors, staining, discoloration, and general biodeterioration caused by molds and mildew. This product is not intended to protect users or others against food-borne or disease causing organisms.

**Active Ingredients:**
- Azoxytriazine: methyl(E)-2-(3,5-dicyanophenyl)-3-(2-isydroxy-5-methylthiazolyl)thioacrylate .... 15.0%
- Thiabendazole: 2-chiLogo (4-phenylbenzenesulfonamide) .... 19.5%

**Other Ingredients:** 65.5%

Total: 100.0%

Contains 1.5 lb. azoxytriazine and 1.9 lb. thiabendazole per gallon; total 3.4 lb. active ingredient per gallon.

AzoTech weighs 9.8 lb. per gallon.

**UPAC (International Union of Pure and Applied Chemistry designation)**

AzoTech may be used to protect wallboard, paper, and paperboard products which will come into contact with food. It is a violation of Federal law to use this product in the production of pulp and paper that will contact food; beverage containers, including plastic piping for carrying water or beverages and containers for food or beverages. AzoTech is recommended for PVC (polyvinylchloride), polypropylene, polyethylene, and many other plastics which can be used in the manufacture of food and beverage containers.

**THIRD PARTY MANUFACTURING USE DIRECTIONS FOR INCORPORATION INTO MATERIALS**

Do not use this product in the manufacture of pulp and paper that will contact food. Paper, Wallpaper (Drywall and Gypsum Board) and Paperboard Products:

AzoTech may be used to protect wallboard, paper, and paperboard products which do not come into contact with food. Examples of paper products which are unlikely to be used in food contact and which may be protected with AzoTech are paperboard wall panel; insulation backing, newsprint, photographic paper, and drawing paper.

Add AzoTech with thorough agitation at any time during the formulation and processing procedure to components of drywall. Add AzoTech to the white water, or paper basis at a rate of 3.3 to 13.3 pounds of formulated product per 1,000 pounds of dry gypsum. AzoTech may be used to protect the gypsum core of wallboard to inhibit the growth of fungi. Add 0.3 to 1.0 pounds of formulated product per 1,000 pounds of dry gypsum.

**HAZARDOUS MATERIALS EXHIBITED BY THIS PRODUCT**

**CAUTION**

Harmful if swallowed or inhaled. Avoid breathing dust or vapors. Wash thoroughly with soap and water after handling or before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

**APPLICATIONS AND OTHER HANDLER MASTERS**

- Long-sleeved shirts and long pants
- Chemical-resistant gloves made of any waterproof material such as polyvinyl chloride, nitrile, rubber, or neoprene
- Shoes with soles

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, arroyos, canals, or other water bodies in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified. For your guidance contact your State Water Board or Regional Office of the EPA.

Notify State and/or Federal authorities and LANXESS Corporation immediately if you suspect that a spill of this material has entered ground waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified. For your guidance contact your State Water Board or Regional Office of the EPA.

**DIRECTIONS FOR USE OF THIS PRODUCT**

It is a violation of Federal law to use this product in a manner inconsistent with its label.

**GENERAL INFORMATION**

AzoTech is a formulation of two fungicides which act synergistically to inhibit the growth of fungi which may cause growth of many fungi associated with odors, staining, discoloration, and general biodeterioration caused by molds and mildew. AzoTech can be used in almost any paper, paperboard, used in the manufacture of food and beverage containers, including plastic piping for carrying water or beverages and containers for food or beverages. AzoTech is recommended for PVC (polyvinylchloride), polypropylene, polyethylene, and many other plastics which can be used in the manufacture of food and beverage containers.

The conditions of your use and application of our products, technical assistance and information (whether verbal, written or by way of production evaluations, including any suggested formulations and recommendations, are beyond our control). Therefore it is imperative that you test your end products, technical assist ance and information to determine your own satisfaction whether they are suitable for your intended use and applications.
