Eradicate M

Active Ingredients: Cedar Wood Oil 90%
Inert Ingredient: Ethyl Lactate 10%
Total 100%

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS: This product may cause dermal sensitization. Avoid contact with eyes and skin. May cause skin or eye irritation. Maybe harmful if inhaled. May cause respiratory tract irritation. Maybe harmful if swallowed. FIRST AID If product gets in eyes, flush out with water for at least 15 minutes and seek medical attention. If on skin, wash with soap and water. If irritation persists, call physician. If inhaled, move person into fresh air. If not breathing, call 911 and give artificial respiration. Never give anything by mouth to an unconscious person. Rinse mouth with water.

Environmental Hazards: Toxic to aquatic life. Physical Hazards: Keep away from heat and open flames. Do not incinerate container. Should be disposed following local and state regulations. Temperatures of over 130 degrees Fahrenheit can cause container to burst.

Personal Protective Equipment: Wear eye protection, long sleeve shirt, long pants, socks plus shoes and chemical resistant gloves when mixing and applying this product. Fogging (cold) applicators must also wear a full face respirator with approved NIOSH approved cartridges. Wear appropriate respirator and protective clothing to minimize contact with skin. Use an approved respirator if exposure limits are exceeded or when ventilation is insufficient.

ERADICATE M is specially created for use outside around shrubs, trees and lawns in Residential, Commercial, Industrial and Governmental, Poultry/Dairy/Horse Facilities and use by Agriculture/Horticulture and pest control operators.

Directions For Use:
Eradicate M provides control when applied to turf/ornamentals areas experiencing infestations of grubs, cut worms and spider mites. The cedar wood Oil formulation creates a barrier of entry making the treated area off limits to flying or crawling pest such as flies, gnats, mosquitoes, mites and ants. Eradicate M is a contact killer and may be able to penetrate insect eggs and larvae by promoting dehydration with direct application. Not for direct topical application on humans or animals.

RECOMMENDED MIXTURE: Mixing concentrate with warm water will bring optimal mixing results, but is not required. Small Areas: use 3 oz. Eradicate M to 1 Gallon Water. Use with air compressed sprayer/backpack sprayer. Large Areas: 64 ounces Eradicate M per 100 gallons of water. Call your representative for more dilution details.

Eradicate M can be applied with a hand held sprayer, backpack sprayer, tank sprayer or boom sprayer. Spray outdoor areas beginning with the buildings and working outward. For larger applications of agriculture, horticulture, dairy/poultry/horse facilities, Eradicate M can be used with a tank sprayer. For foliage, bushes, trees should be sprayed top and bottom of foliage/leafage until run off. NOTE: To reduce over spray, foliage/trees over 8 feet tall do not spray when winds exceed 10 miles per hour. Non-thermal (cold fog) equipment may be used for control of flying insects (such as mosquitoes, flies, gnats) in residential areas, commercial areas, woodlands, animal quarters, barns, woodlands, golf courses, non-crop waste area, range land and pastures when insects are most active and conditions are conducive to keeping the fog in the air column close to the ground. Applications during the cooler hours of early morning or evening are preferable.

Spraying in direct sunlight or temperatures above 80 degrees may damage and cause yellowing of delicate or sensitive plants. Testing mixture on foliage, trees and plants before application is recommended.

INDOORS: Do not apply indoors when people or pets are present. For indoor application, use a hand-held pump sprayer or powered sprayer. Indoor application can be made by following small area mixture and spraying baseboards, doors and windows and cracks/crevices.

STORAGE/DISPOSAL: Store in cool, dry area, away from direct sunlight. When container is empty, triple rinse jug and disposed in trash following local and state sanitation laws. LIMITATION OF LIABILITY: Buyer assumes all responsibility for safety and use not in accordance with label, directions and precautionary statement Wisdom International offers this product as a minimum risk pest control product and qualifies for exemption from EPA registration under the Federal Insecticide Fungicide and Rodenticide Act.
