Made in the USA

For use as a WIPETM OR PRELOGIC® NON-STERILE MEDICAL DEVICES, INSTRUMENTS AND IMPLANTABLES:
Instrumentation must be thoroughly cleaned to remove organic debris, debris, and dried. Thoroughly clean and rinse lumens of hollow instruments. After cleaning and drying, place instruments in a container. Spray Darby Surface Disinfectant Cleaner onto the surface of all instrument surfaces. FOLLOW with appropriate cleaning and disinfecting process. Please contact your local stocking supplier for further instructions.

For use as a WIPETM OR PRELOGIC® NON-STERILE ME
**Darby Surface Disinfectant Cleaner**

**First Aid**

**Eye Contact**: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for treatment advice.

**Skin Contact**: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.

For Chemical Emergency (Nal): Call 1-800-C454-2310, Monday through Friday, between 9 a.m. and 7 p.m. EST.

Have the product container or label with you when calling a poison control center or doctor, or going to a emergency room.

**Storage and Disposal**

Store container in a cool, dry, well-ventilated area away from extreme heat and freezing temperatures. For indoor use only. Never incinerate container.

**Personal Protection**

Wear barrier protection: protective gloves, glasses, mask, and eye coverings.

**Cleaning Procedure**

Blood and other bodily fluids must be thoroughly cleaned from surfaces and objects before disinfection with Darby Surface Disinfectant Cleaner.

**Contact Time**

A contact time of 3 minutes is required for HBV* and HIV1. This contact time will not be sufficient for some of the organisms listed on the label. Refer to label for proper times against other organisms.

**Infectious Materials Disposal**

Cleaning materials used that may contain blood or other bodily fluids must be thoroughly cleaned and disposed of in accordance with local regulations for infectious materials disposal.

**Active Ingredients**

- Isopropanol
- Hydrogen peroxide
- Sodium hypochlorite

**Precautions**

**Hazardous to Humans and Domestic Animals**

**CAUTION**

If swallowed, it may cause respiratory or gastro-intestinal irritation. Misuse may result in allergic reactions.

**Operational Trigger**

To Operate: Turn valve to "on" position and hold trigger. To Stop: Release trigger and turn valve to "off" position and hold trigger. Do not allow trigger to remain in the "on" position while not in use.

**Physical or Chemical Hazards**

- Combustible
- Do not use on or near heat or open flame.

**Net Contents**

24 fl oz/710 ml

**Distributed by**

Darby Dental Supply, LLC

**Made in the USA**

**For use as a precleaning immersion solution**

Pre-cleaning is recommended for use on hard non-porous inanimate surfaces

**Physical or Chemical Hazards**

- Combustible
- Do not use on or near heat or open flame.

**For use as a precleaning immersion solution**

Pre-cleaning is recommended for use on hard non-porous inanimate surfaces.

**Contraindications**

- Known hypersensitivity to the ingredients
- Allergic reaction to isopropanol or hydrogen peroxide

**Special Instructions for Cleaning and Disinfection**

**HIV-1** and **HBV**. This contact time will not be sufficient for disinfection with Darby Surface Disinfectant Cleaner.

**Personal Protection**

Wear barrier protection: protective gloves, glasses, mask, and eye coverings.

**Cleaning Materials Used**

Surrogates for Hepatitis B Virus (HBV) • Herpes Simplex Virus Types 1 and 2 (HSV-1 and HSV-2) • Bacteroides fragilis • Mycobacterium avium complex • Mycobacterium tuberculosis • Enterococcus faecalis • Trichophyton mentagrophytes • Staphylococcus aureus

**Bactericidal** | **Virucidal** | **Fungicidal** | **Tuberculocidal**

**Contact Time**

1 minute

**Disinfectant Cleaner**

Surface Disinfectant Cleaner is recommended for use on hard non-porous surfaces of dental and instrument trays, operating light fixtures, toothpaste containers, dental equipment, computer mouse pads and keyboards that may come into contact with exposed skin, stainless or painted surfaces, label consisting of non-porous vinyl, stainless steel, painted porcelain, Formica®, Formica®, and other critical care areas where control of cross-contamination between infected surfaces is important.

**Directions for Use**

For use as a precleaning immersion solution: Place instruments in a precleaning solution of Darby Surface Disinfectant Cleaner for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal** activity and effectiveness against Staphylococcus aureus, Pseudomonas aeruginosa, Trichophyton mentagrophytes, and other critical care areas where control of cross-contamination between infected surfaces is important.

**For Prewashing NON-INSTRUMENT SURFACES PRIOR TO DISINFECTION**

Rinse gross blood and heavy soil loads. Spray Darby Surface Disinfectant Cleaner directly onto surfaces. Allow to remain visibly wet for 2 minutes. Then remove organic debris, rinse and air dry.

**For Prewashing INSTRUMENTS PRIOR TO DISINFECTION**

Rinse gross blood and heavy soil loads. Using either a tray or an ultrasonic unit, immerse instruments in Darby Surface Disinfectant Cleaner for 3 minutes at room temperature (68°F/20°C). Thoroughly rinse and air dry.

**For use as a precleaning spray**

Place instruments in a precleaning solution of Darby Surface Disinfectant Cleaner for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal** activity and effectiveness against M. tuberculosis, P. aeruginosa, and other critical care areas where control of cross-contamination between infected surfaces is important.

**For use as a precleaning spray**

Place instruments in a precleaning solution of Darby Surface Disinfectant Cleaner for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal** activity and effectiveness against M. tuberculosis, P. aeruginosa, and other critical care areas where control of cross-contamination between infected surfaces is important.

**For use as an ultrasonic precleaning solution**

Place instruments in a precleaning solution of Darby Surface Disinfectant Cleaner for 3 minutes at room temperature (68°F/20°C) for Tuberculocidal** activity and effectiveness against M. tuberculosis, P. aeruginosa, and other critical care areas where control of cross-contamination between infected surfaces is important.
