FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

MONCUT® FUNGICIDE

TO CONTROL RHIZOCTONIA SPP. IN FIELD-GROWN FLOWER BULBS

EPA Reg. No. 71711-14 EPA SLN No. WA-150011

This label for Moncut Fungicide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2020.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, AND PRECAUTIONS ON THE EPA REGISTERED LABEL.

DIRECTIONS FOR USE

CROP AND DISEASE CONTROLLED

For in-furrow use of Moncut Fungicide on field grown flower bulbs (including but not limited to iris, lilies, tulips) to control Rhizoctonia spp. (including gray bulb rot).

USE RATE AND APPLICATION METHOD

Apply 1.63 to 6.53 lbs. of Moncut Fungicide per acre (see Application Rate Chart below) as an in-furrow spray by directing spray uniformly over the tops of planted bulbs in an 8 to 18 inch band prior to covering with soil (hilling). Apply in sufficient water which may range from 100 to 150 gallons of spray volume per acre. Do not apply more than 6.53 lbs. product (4.571 lbs. ai) per year. Use highest rate when disease conditions are expected to be severe or if field has a history of Rhizoctonia infestation.

USE PRECAUTIONS AND RESTRICTIONS

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

Do not use oil as carrier or add other additives to the finished spray.

Do not plant rotational crops other than brassica (cole) leafy vegetables, cotton, peanuts, potatoes, rice, soybeans, or turnip greens for 12 months following last application of Moncut Fungicide, with the following exceptions:

- Wheat may be planted 30 days after the last application.
- Leafy vegetables (such as lettuce, spinach, or celery) or small grain crops other than wheat (such as barley, rye, or oats) may be planted 150 days after the last application.
- Corn (such as field, sweet, or popcorn) or sorghum may be planted 240 days after the last application.

For use under this SLN label do not apply this product through any type of irrigation system.

WSDA Aquatic Advisory: This pesticide is toxic to fish and aquatic invertebrates. Moncut Fungicide should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program website at http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx, or contact the Washington Department of Fish & Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish & Wildlife Service for information regarding aquatic species listed as threatened or endangered. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.

This product is classified as having a high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of flutolanil from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours.

WSDA Container Disposal Guidance: Completely empty the contents of the pesticide container into application equipment and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.
