  - **Hazard to Domestic Animals**
  - **Hazard to Water Bodies**
  - **Hazard to Aquatic Ecosystems**
  - **Hazard to Aquatic Life**

---

**DIRECTIONS FOR USE**

- Do not allow adults, children, or pets to enter the treated area until vapors have dissipated.
- Do not allow pets to enter the treated area until vapors have dissipated.
- In the home, allow food processing surfaces and appliances to be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.
- Remove pets, birds and cover any water inhabited by fish (such as aquariums and ornamental fish ponds) before application. Turn off aquarium filtering systems before spraying and wait approximately 15 minutes after application before turning the filter back on.
- This product is not for use on humans. If lice infestations should occur on humans, use a product labeled for use on humans.
- Application is prohibited directly into water sources or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
- Not for broadcast use on outdoor residential surfaces.

**KEEP OUT OF REACH OF CHILDREN**

- **See slide panel for additional precautions**

---

**READ ENTIRE LABEL BEFORE EACH USE**

---

**NOTICE TO DOCTORS**

- **Not for use on humans**
  - Use a product labeled for use on humans.
For use on humans. Spray only those articles and parts of bedding including mattresses and furniture that cannot be either laundered or dry-cleaned. Do not use on sheets or pillows cases.

Bedbugs: Spray mattresses, particularly around tufts and seams. Take beds apart and spray into all joints. Treat headboards, moldings and frames. Spray to the point of dampness but not run-off. After mattress is dry, cover with mattress cover and sheet. Do not use mattress without cover. Repeat if infestation occurs, but not more than once every few weeks.

To Kill House Dust Mites (Dermatophagoides spp.) a small can live spray controls house dust mites that may cause asthma, hay fever, rhinitis, watery eyes and sneezing. One treatment lasts for up to 6 weeks. On Upholstered Furniture—test fabric in an inconspicuous area to insure dyes will not bleed. Spray all fabric surfaces until damp. Do not use on delicate fabrics. Allow furniture to dry thoroughly before using. On Carpets—Spray over entire carpet until damp. Hold nozzle approximately 12 to 18 inches from the carpet surface and spray in a sweeping motion. Use an overlapping pattern to insure total coverage. After application, brush the surface of the carpet with a broom or brush to insure deep penetration. Allow carpet to dry thoroughly before resuming the treated area. Drying time can be accelerated by using a fan. On Mattresses—Spray the top, bottom and sides of mattresses until damp, paying particular attention to tufts and seams. Allow to dry thoroughly before using. After mattress is dry, cover with mattress cover and sheet. Do not use mattress without cover. Vacum entire area once dry. Since vacuuming dust up in the air those with allergies should have another person vacuum or should wear a dust mask and use vacuum with a high efficiency particulate (HEPA) filter.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Storage: Store in a cool, dry area away from children and pets and away from heat, sparks and open flame. Do not transport or store below 32°F (0°C).

Pesticide Disposal and Container Handling: Do not puncture or incinerate. If empty: Place in trash or offer for recycling if available. If partially filled: Call your local solid waste agency or 1-800-CLEANUP (258-2467) for disposal instructions.

NOTICE: To the extent consistent with applicable law, purchaser assumes all responsibility for safety and use not in accordance with directions.
