**DecoShield™ MOSQUITO REPELLENT REFILL**

For use with DecoShield™ from RESCUE™

2-pack

Lasts up to 8 days

- All-natural essential oils
- Protects an area up to 300 square feet
- Pleasant scent

Repelente contra insectos

**Instructions:**

1. Open pouch and remove one refill tube. Save the orange tube for later use.
2. Place DecoShield™ upright on a flat surface. Remove top cap, exposing inner tip and cone.
3. Carefully cut open refill tube and empty contents into top of cone. Wait 5 minutes for oils to fully drain through funnel. Replace top cap.
4. For best results, activate and place DecoShield™ 10 minutes before people congregate outdoors.
5. Each refill tube lasts up to 2-4 days (see below chart). The natural color of the essential oils will turn the inner cylinder a light yellow to yellow-orange, which grows darker with refills.

**Average Daily Repellency Duration:**

- 70°F: 4 days
- 80°F: 3 days
- 90°F: 2 days

If DecoShield™ is refilled two or three times in 4 days of repellency are over (see above chart)—oils might pool at the bottom and possibly spill if tipped over. As long as DecoShield™ remains upright, the inner cylinder will eventually redissolve all the oil and continue to repel insects.

**Storage/Disposal:** Store unused refill tube in original package in cool, dry place. Place in trash after use. Keep out of reach of children. CAUTION: Wash hands after handling product.

**Eye Wash:** Rinse eye(s) of person in case of contact with product. Irritate if product was applied to the eye(s). Under medical supervision, eye(s) should be irrigated with water for at least 15 minutes, or until foreign material is removed.

**WARNING:**

**INGREDIENTS:**

- Citronella 1% (20% as water)
- Repellent 4% (20% as water)
- Citronellol 4% (20% as water)
