WARNING
KEEP OUT OF REACH OF CHILDREN

HOT-UP ULTRA
SPRAY ADJUVANT

Nonionic Surfactant and
Water Conditioning Agent

PRINCIPAL FUNCTIONING AGENTS:
Paraffinic Oil, Ammonium Sulphate
And Alkyl Polyglucoside.............55.6%
Constituents Ineffective as
Spray Adjuvants......................44.4%
TOTAL..................................100%
(contains petroleum distillates)
All ingredients are exempt from tolerance in 40 CFR 180.

A specially formulated product
designed to enhance the performance of Glyphosate and other herbicides.
HAZARDS IDENTIFICATION

GHS: Classified as hazardous according to criteria of NOHSC.
Classification: Acute Toxicity - Oral: Category 4
Eye Irritation: Category 2A
Skin irritation: Category 2
Signal Word: Warning
Hazard Statements: H319 - Causes serious eye irritation
H315 - Causes skin irritation
H302 - Harmful if swallowed
Precautionary Statements: Wash hands thoroughly after use. Do not eat drink or smoke when using this product. Wear protective gloves and eye protection.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

If contact is made with a spray solution containing pesticides, follow the “Statement of Practical Treatment/First Aid” on the pesticide label(s).

GENERAL INFORMATION

HOT-UP Ultra Spray Adjuvant improves your spray results by:
• Protecting your herbicides from deactivation due to hard water (eg. Ca & Mg ions)
• Aiding droplet retention and increased spreading on weed surfaces
• Assisting herbicide penetration through waxy weed surfaces

HOT-UP Ultra is a specialized blend of nonionic surfactants, highly refined mineral oil and ammonium sulphate and that is suitable for use as a Spray Adjuvant with certain herbicides. Herbicidal activity is enhanced by wetting and penetrating weed surfaces and by preventing the reduction of activity associated with adverse water quality or environmental conditions. HOT-UP Ultra may reduce the antagonism that certain combinations of herbicides exhibit.

DIRECTIONS FOR USE

For Terrestrial Use Only – Not For Aquatic Use

Environmental Hazards:
Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

General Use Rates:
NOTE: 2 quarts of HOT-UP Ultra provides 0.6 lbs. of ammonium sulfate
Use HOT-UP Ultra 1.0 quart to 1.0 gallon per 100 gallons of the spray solution (see chart).

The high end of the HOT-UP Ultra usage rate is also recommended when:
• Mixing in hard water (>340ppm hardness as CaCO₃)
• Conditions are hot or dry
• Treating difficult to control weeds
• Weeds are stressed
**MIXING**

Follow the directions on the herbicide product's label.

**NOTE:** To minimize the loss of activity that may be experienced when using certain herbicides in adverse conditions eg. Glyphosate in hard water, it is advisable to add HOT-UP Ultra to the water prior to adding the herbicide.

**EQUIPMENT MAINTENANCE**

Components of HOT-UP Ultra may be mildly corrosive to copper, brass or galvanized parts. Thoroughly flush tanks, pumps and nozzles with water after use.

**STORAGE AND DISPOSAL**

Store in original container only. Do not contaminate water, food, or feed by storage or disposal. Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at [www.acrecycle.org](http://www.acrecycle.org).

Decontaminated containers may also be disposed of in a sanitary landfill.
